Language Learning Online: Towards Best Practice Uschi Felix,2003-01-01 This important and accessible book identifies the key elements in the quest for best practice in online language teaching. The authors, all of them international experts who have made significant contributions to the debate about how to exploit the new technologies, consider online language teaching from three crucial perspectives: design, tools and pedagogy. Their recommendations are such that they can actually be realised in spite of the limitations of today's educational environments. The book demonstrates that the new technologies offer far greater potential for authentic encounters and constructivist learning than even the best classroom simulations; that automated exercise and feedback structures can be individualised and meaningful; and that if we have to teach fully by distance, these ventures no longer need to represent impoverished versions of live classes but can engender a strong sense of community. To achieve this we need to understand what elements constitute good design both in technical and pedagogical terms, to think seriously about providing the best feedback possible, and to have the courage to take the risks associated with letting go of traditional learner/teacher relationships.

Encyclopedia of Library and Information Science, Second Edition - Miriam Drake,2003-05-20 A

revitalized version of the popular classic, the Encyclopedia of Library and Information Science, Second Edition targets new and dynamic movements in the distribution, acquisition, and development of print and online media-compiling articles from more than 450 information specialists on topics including program planning in the digital era, recruitment, information management, advances in digital technology and encoding, intellectual property, and hardware, software, database selection and design, competitive intelligence, electronic records preservation, decision support systems, ethical issues in information, online library instruction, telecommuting, and digital library projects.

Managing the Telecommuting Employee Michael Amigoni,Sandra Gurvis,2009-10-18 A bigger and bigger part of the workforce is telecommuting. And managers need new skills to get the most out of this increasingly far-flung staff. This indispensable guide includes case studies, checklists, and sample forms and charts. It shows managers how to use teleconferencing technology to communicate with distanced workers, make the best use of scheduling software to monitor productivity, and even end the arrangement if it's not working. One of the best ways for companies to save money in lean times is to send their employees home to work. But that requires a different kind of workforce and a different kind of management. This book shows how to make the long-distance relationship work for everyone!

How to Use Computers and Cyberspace in the Clinical Practice of Psychotherapy Jeri Fink,1999 Venture into a new clinical office where an agoraphobic can manipulate a projected image of himself into an actual crowd, where a woman afraid of flying can desensitize herself through virtual reality exposure, where an ill-socialized adolescent or a depressed elderly patient can visit a virtual community. Dr Jeri Fink introduces the brave new world of psychotechnology with a mix of imagination, enthusiasm and authority. She logs on by exploring computer assisted therapeutic interventions for treating individuals and groups based on accepted theories of practice; next, she raises and answers questions about such pivotal attendant issues as the rise of Internet Addiction Disorder and the implications of cybertherapies for managed care;

and finally, she supplies a resource guide to the Internet as a channel for professional communications as well as for professional reference.

Cyber Worship in Multifaith Perspectives Mohamed Taher,2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning Niess, Margaret L.,Gillow-Wiles, Henry,2021-06-25 The COVID-19 pandemic

drastically transformed the classroom by keeping students and teachers apart for the sake of safety. As schools emptied, remote learning rapidly expanded through online services and video chatrooms. Unfortunately, this disrupted many students and teachers who were not accustomed to remote classrooms. This challenge has forced K-12 teachers to think differently about teaching. Unexpectedly and with little time to prepare, they have been confronted with redesigning their curriculum and instruction from face-to-face to online virtual classrooms to protect students from the COVID-19 virus while ensuring that these new online initiatives remain sustainable and useful in the post-pandemic world. As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction, their instruction both in online and face-to-face will impact what and how students learn in the 21st century. The Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K-12 virtual learning. The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world. The following chapters present instructional strategies for multiple grade levels and content areas: best practices that work, clearly describing why they work, and the teachers' pedagogical reasoning that supports online implementations. The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face-to-face and virtual environments as an essential design component. Covering such topics as K-12 classrooms,

pedagogical reasoning, and virtual learning, this text is perfect for professors, teachers, students, educational designers and developers, instructional technology faculty, distance learning faculty, and researchers interested in the subject.

Countering the Financing of Terrorism Thomas J. Biersteker,Sue E. Eckert,2007-09-12 Groups committing acts of terrorism have adapted their means of financing to elude detection since the 9/11 attacks in the United States. Surveying the global community's multi-year effort to cut off terrorist funding, this volume offers a much-needed analysis of a complex, widely discussed, yet poorly understood subject. While

books on terrorism have touched upon the topic, this is the first comprehensive, balanced, and scholarly overview of terrorist financing, its methods, and efforts to counter it. Bringing together leading analysts of terrorism, international relations, global finance, law, and criminology, Countering the Financing of Terrorism provides a critical assessment of the international effort to restrict terrorist financing. It evaluates the costs and benefits and offers recommendations for more effective policies for the future.

Pervasive Collaborative Networks Luis M. Camarinha-Matos, Willy Picard, 2008-08-08 COLLABORATIVE NETWORKS Becoming a pervasive paradigm In recent years the area of collaborative networks is being consolidated as a new discipline (Camarinha-Matos, Afsarmanesh, 2005) that encompasses and gives more structured support to a large diversity of collaboration forms. In terms of applications, besides the "traditional" sectors represented by the advanced supply chains, virtual enterprises, virtual organizations, virtual teams, and their breading environments, new forms of collaborative structures are emerging in all sectors of the society. Examples can be found in e-government, intelligent transportation systems, collaborative virtual laboratories, agribusiness, elderly care, silver economy, etc. In some cases those developments tend to adopt a terminology that is specific of that domain; often the involved actors in a given domain are not fully aware of the developments in the mainstream research on collaborative networks. For instance, the grid community adopted the term "virtual organization" but focused mainly on the resource sharing perspective, ignoring most of the other aspects involved in collaboration. The European enterprise interoperability community, which was initially focused on the intra-enterprise aspects, is moving towards inter-enterprise collaboration. Collaborative networks are thus becoming a

pervasive paradigm giving basis to new socio-organizational structures.
