Gesture-Based Communication in Human-Computer Interaction Antonio Camurri,Gualtiero Volpe,2011-04-02 Research on the multifaceted aspects of modeling, analysis, and synthesis of - man gesture is receiving growing interest from both the academic and industrial communities. On one hand, recent scienti?c developments on cognition, on - fect/emotion, on multimodal interfaces, and on multimedia have opened new perspectives on the integration of more sophisticated models of gesture in c- putersystems.Ontheotherhand,theconsolidationofnewtechnologiesenabling “disappearing” computers and (multimodal) interfaces to be integrated into the natural environments of users are making it realistic to consider tackling the complex meaning and subtleties of human gesture in multimedia systems, - abling a deeper, user-centered, enhanced physical participation and experience in the human-machine interaction process. The research programs supported by the European Commission and s- eral national institutions and governments individuated in recent years strategic ?elds strictly concerned with gesture research. For example, the DG Infor- tion Society of the European Commission (www.cordis.lu/ist) supports several initiatives, such as the “Disappearing Computer” and “Presence” EU-IST FET (Future and Emerging Technologies), the IST program “Interfaces & Enhanced Audio-Visual Services” (see for example the project MEGA, Multisensory - pressive Gesture Applications, www.megaproject.org), and the IST strategic - jective “Multimodal Interfaces.” Several EC projects and other funded research are represented in the chapters of this book.

Red Families v. Blue Families Naomi Cahn,June Carbone,2010-03-08 Red Families v. Blue Families identifies a new family model geared for the post-industrial economy. Rooted in the urban middle class, the coasts and the blue states in the last three presidential elections, the Blue Family Paradigm emphasizes the importance of women's as well as men's workforce participation, egalitarian gender roles, and the delay of family formation until both parents are emotionally and financially ready. By contrast, the Red Family Paradigm--associated with the Bible Belt, the mountain west, and rural America--rejects these new family norms, viewing the change in moral and sexual values as a crisis. In this world, the prospect of teen childbirth is the necessary deterrent to premarital sex, marriage is a sacred undertaking between a man and a woman, and divorce is society's greatest moral challenge. Yet, the changing economy is rapidly eliminating the stable, blue collar jobs that have historically supported young families, and early marriage and childbearing derail the education needed to prosper. The result is that the areas of the country most committed to traditional values have the highest divorce and teen pregnancy rates, fueling greater calls to reinstall traditional values. Featuring the groundbreaking research first hailed in The New Yorker, this penetrating book will transform our understanding of contemporary American culture and law. The authors show how the Red-Blue divide goes much deeper than this value system conflict--the Red States have increasingly said no to Blue State legal norms, and, as a result, family law has been rent in two. The authors close with a consideration of where these different family systems still overlap, and suggest solutions that permit rebuilding support for both types of families in changing economic circumstances. Incorporating results from the 2008 election, Red Families v. Blue Families will reshape the debate surrounding the culture wars and the emergence of red and blue America.
