**Genomic Designing for Biotic Stress Resistant Cereal Crops** Chittaranjan Kole,2021-08-31 This book presents deliberations on molecular and genomic mechanisms underlying the interactions of crop plants to the biotic stresses caused by different diseases and pests that are important to develop resistant crop varieties. Knowledge on the advanced genetic and genomic crop improvement strategies including molecular breeding, transgenics, genomic-assisted breeding, and the recently emerging genome editing for developing resistant varieties in cereal crops is imperative for addressing FHNEE (food, health, nutrition, energy, and environment) security. Whole genome sequencing of these crops followed by genotyping-by-sequencing has provided precise information regarding the genes conferring resistance useful for gene discovery, allele mining, and shuttle breeding which in turn opened up the scope for 'designing' crop genomes with resistance to biotic stresses. The eight chapters each dedicated to a cereal crop in this volume elucidate on different types of biotic stresses and their effects on and interaction with the crop; enumerate on the available genetic diversity with regard to biotic stress resistance among available cultivars; illuminate on the potential gene pools for utilization in interspecific gene transfer; present brief on classical genetics of stress resistance and traditional breeding for transferring them to their cultivated counterparts; depict the success stories of genetic engineering for developing biotic stress-resistant crop varieties; discuss on molecular mapping of genes and QTLs underlying stress resistance and their marker-assisted introgression into elite varieties; enunciate on different genomics-aided techniques including genomic selection, allele mining, gene discovery, and gene pyramiding for developing adaptive crop varieties with higher quantity and quality of yields, and also elaborate some case studies on genome editing focusing on specific genes for generating biotic stress-resistant crops.

**Mountain, Water, Rock, God** Luke Whitmore,2018-11-27 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. In Mountain, Water, Rock, God, Luke Whitmore situates the disastrous flooding that fell on the Hindu Himalayan shrine of Kedarnath in 2013 within a broader religious and ecological context. Whitmore explores the longer story of this powerful realm of the Hindu god Shiva through a holistic theoretical perspective that integrates phenomenological and systems-based approaches to the study of religion, pilgrimage, place, and ecology. He argues that close attention to places of religious significance offers a model for thinking through connections between ritual, narrative, climate destabilization, tourism, development, and disaster, and he shows how these critical components of human life in the twenty-first century intersect in the human experience of place.

**Directory of Publishers and Booksellers in India** K.r Gupta,2004 This Revised And Enlarged Edition Of The Directory Of Publishers And Booksellers In India Contains Much Larger Number Of Addresses Of Publishers And Booksellers. The Directory Would Be Of Great Value For Librarians For Getting Information About Publishers And Booksellers In India For Their Procurement Of Books.The Directory Would Also Be Useful For Those Who Provide Materials And Services For Publishers And Booksellers E.G. Paper Manufacturers & Distributors, Computers (Software & Hardware) Suppliers, Packaging Machinery & Materials Suppliers, Printers & Binders, Epabx-Manufacturers & Distributors, Office Furniture And Equipment And Photocopy Machines Suppliers, Slotted Angle Racks Manufacturers And Suppliers, Etc.

**Food Safety and Preservation** Alexandru Mihai Grumezescu,Alina Maria Holban,2018-04-18 Food Safety and Preservation: Modern Biological Approaches to Improving Consumer Health explores the most recent and investigated hot topics in food safety, microbial contamination, food-borne diseases and advanced preservation methods. It brings together the significant, evidence-based scientific progress of various approaches to improve the safety and quality of foods, also offering solutions to help address food industry challenges. Recent studies and technological advancements in biological control are presented to control foodborne pathogens. In addition, analytical methods for reducing potential biological hazards make this book essential to researchers, scientists, technologists and grad students. Covers all aspects of food contamination, from food degradation, to food-borne diseases Examines validated, biological control approaches to reduce microbial and chemical contamination Includes detailed discussions of risk and safety assessments in food preservation

**Plant-Metal Interactions** Sudhakar Srivastava,Ashish K. Srivastava,Penna Suprasanna,2019-07-26 Metal toxicity and deficiency are both common abiotic problems faced by plants. While metal contamination around the world is a critical issue, the bioavailability of some essential metals like zinc (Zn) and selenium (Se) can be seriously low in other locations. The list of metals spread in high concentrations in soil, water and air includes several toxic as well as essential elements, such as arsenic (As), cadmium (Cd), chromium (Cr), aluminum (Al), and selenium (Se). The problems for some metals are geographically confined, while for others, they are widespread. For instance, arsenic is an important toxic metalloid whose contamination in Southeast Asia and other parts of world is well documented. Its threats to human health via food consumption have generated immense interest in understanding plants' responses to arsenic stress. Metals constitute crucial components of key enzymes and proteins in plants. They are important for the proper growth and development of plants. In turn, plants serve as sources of essential elements for humans and animals. Studies of their physiological effects on plants metabolism have led to the identification of crucial genes and proteins controlling metal uptake and transport, as well as the sensing and signaling of metal stresses. Plant-Metal Interactions sheds light on the latest development and research in analytical biology with respect to plant physiology. More importantly, it showcases the positive and negative impacts of metals on crop plants growth and productivity.

**Electrical Diseases of the Heart** Ihor Gussak,A. A. M. Wilde,P. A. Friedman,Charles Antzelevitch,M. J. Ackerman,W.-K. Shen,2008-09-08 This book provides a unique contemporary and succinct distillation of the current status of

recently delineated electrical diseases of the heart, emphasizing their common and diverse clinical features. The latest developments in the field of experimental and clinical cardiac electrophysiology, genetics, pharmacology and interventional therapies of various clinical arrhythmogenic entities are featured and discussed in terms of recent advances in basic and clinical science. The book is divided into seven major parts. Each part consists of chapters (total of 64) dealing with related topics.

**Food Quality and Safety Systems** Food and Agriculture Organization of the United Nations,1998 One important element of FAO's work is building the capacity of food control personnel, including government authorities and food industry personnel carrying out food quality and safety assurance programmes. Such programmes should include specific food risk control procedures such as the Hazard Analysis and Critical Control Point (HACCP) system. FAO has prepared this manual in an effort to harmonise the approach to training in the HACCP system based on the already harmonised texts and guidelines of the Codex Alimentarius Commission. The manual is structured to provide essential information in a standardised, logical and systematic manner while adhering to effective teaching and learning strategies. Each section is made up of specific training modules which can be combined and customised to meet the specific needs of the students. 1998 (first edition), 2009 (this reprint). Also published in French, Russian and Spanish.

***Bioactive Marine Natural Products*** Dewan S. Bhakuni,D.S. Rawat,2006-06-30 Bioactive Marine Natural Products is the first book available that covers all aspects of bioactive marine natural products. It fills the void in the literature for bioactive marine natural products. The book covers various aspects of marine natural products and it is hoped that all the major classes of bioactive compounds are included. Different classes of marine organisms and the separation and isolation techniques are discussed. The chemistry and biology of marine toxins, peptides, alkaloids, nucleosides and prostanoids are discussed in detail. Biological, toxicological and clinical evaluations are also dealt with to ensure that the book may be adopted at any stage by any practicing organic chemist or biologist, working in academia or in R and D divisions of pharmaceutical companies. Each chapter in the book includes an abstract to highlight the major points discussed in the text and concluding remarks are given. References to books, monographs, review articles and original papers are provided at the end of each chapter.

**The Prevention of Violence in Sport** Manuel Comeron,2002 This is the first in a series of publications which consider different themes covered by the Council of Europe's projects on violence prevention in everyday life. It looks at the issue of spectator violence in sport, in particular football hooliganism. As this problem becomes international, generating similar problems in Europe and throughout the world, a common co-ordinated preventive response is required. This book examines a number of initiatives designed to explore solutions for developing integrated preventive activities that can be adapted to local needs.
