Teen Life in Latin America and the Caribbean Cynthia Tompkins, Kristen Sternberg, 2004-04-30 Teens in Latin America and the Caribbean generally face a difficult path to adulthood. Poverty and unemployment, violence, political instability, and emigration are frequently the norm in their native countries. Those from poorer families must often work as well as attend school, and opportunities for higher education and good jobs are limited. Wealthier teens, on the other hand, are sheltered from harshness and enjoy private schools, vacations abroad, and access to American consumer products. Yet family is important no matter what the class, and most of these teens share a love of parties, music, and current fashions. Latin America and the Caribbean are important regions to the United States, since large numbers of Americans can trace their roots there. Teen Life in Latin America and the Caribbean allows U.S. teens to understand the unique challenges and opportunities of teens in 15 Latin American or Caribbean countries. Photos complement the text.

Energy Services for the Urban Poor in Africa Bereket Kebede, Ikhupuleng Dube, 2013-07-18 Africa has been experiencing higher rates of urbanization than any other continent, and today about one-third of the continent's population live in urban areas. But studies of energy services for urban residents, especially the poor, are still rare. The supply of electricity to poor city dwellers has not kept pace with urbanisation: in 1970 some 40 million had no access to electricity; by the year 2000 there were over 100 million. The urban poor continue to rely on wood fuel, charcoal, kerosene and dung cakes for energy, with all their environmental drawbacks. This book examines the affordability of modern energy sources for the poor; the relevance of energy subsidies; the impact of subsidies on public finances; and how electricity tariffs affect the operations of small and medium enterprises, the main source of livelihood for the majority of the urban poor outside the formal economic sector.

African Minorities in the New World Toyin Falola, Niyi Afolabi, 2007-11-13 This book discusses the minority status of African immigrants in the New World by revisiting the concept of a 'new' African diaspora and its multiple implications for citizenship and immigration policy.

Globalization, the IMF, and International Banks in Argentina Christian Hernandez, 2019-08-27 This book examines how the ideas, interests, and biases of international financial institutions, private banks, and the press affect economic and political change during periods of crisis. It suggests that the monetary and financial trials of Argentina then and now serve as a microcosm for the Western world's current backlash against globalization.

Presidents Without Parties Javier Corrales, 2010-11-01 Using Latin American examples, presents a new theory of how the interaction between presidents and ruling parties mediated economic governance.

Guide to Performance-Based Road Maintenance Contracts Asian Development Bank, 2018-04-01 Road asset management is one of the top priorities of the Central Asia Regional Economic Cooperation (CAREC) Transport and Trade Facilitation Strategy 2020. The implementation of performance-based road maintenance contracts (PBCs)—an essential element of road asset management—promotes effective and efficient maintenance of road networks. Well-designed PBCs keep roads in predefined good condition at relatively low cost. This guide aims to help policy makers in CAREC member countries

understand and implement PBCs. After a brief history of the development of PBCs, it discusses the various types of PBCs and their relative advantages and disadvantages. It highlights PBC implementation in selected developed, developing, and transitional countries, including CAREC member countries, to illustrate best practices.

Failed Mark Weisbrot, 2015-09-01 Why has the Eurozone ended up with an unemployment rate more than twice that of the United States more than six years after the collapse of Lehman Brothers? Why did the vast majority of low- and middle-income countries suffer a prolonged economic slowdown in the last two decades of the 20th century? What was the role of the International Monetary Fund in these economic failures? Why was Latin America able to achieve substantial poverty reduction in the 21st century after more than two decades without any progress? *Failed* analyzes these questions, explaining why these important economic developments of recent years have been widely misunderstood and in some cases almost completely ignored. First, in the Eurozone, Mark Weisbrot argues that the European authorities' political agenda, which included shrinking the welfare state, reducing health care, pension, and other social spending, and reducing the bargaining power of labor played a very important role in prolonging the Eurozone's financial crisis and pushing it into years of recession and mass unemployment. This conclusion is based not only on public statements of European officials, but also on thousands of pages of documentation from consultations between the IMF and European governments after 2008. The second central theme of *Failed* is that there are always practical alternatives to prolonged economic failure. Drawing on the history of other financial crises, recessions, and recoveries, Weisbrot argues that regardless of initial conditions, there have been and remain economically feasible choices for governments of the Eurozone to greatly reduce unemployment—including the hardest hit, crisis-ridden country of Greece. The long-term economic failure of developing countries, its social consequences, as well as the subsequent recovery in the first decade of the 21st century, constitute the third part of the book's narrative, one that has previously gotten too little attention. We see why the International Monetary Fund has lost influence in middle income countries. *Failed* also examines the economic causes and consequences of Latin America's second independence and rebound in the twenty-first century, as well as the challenges that lie ahead.

International Relations in Latin America Andrea Oelsner, 2013-10-11 This work studies the development of bilateral relations in two pairs of states (dyads): Argentina-Brazil and Argentina-Chile. It takes on a moderate constructivist approach that incorporates into the analysis of international relations the role of identities, ideas and perceptions as well as of material forces, and understands that the former are affected and changed during interaction. It also uses to securitization theory to explain how issues come or cease to be considered security matters through social constructions.

Geodynamics of a Cordilleran Orogenic System: The Central Andes of Argentina and Northern Chile Peter G. DeCelles, Mihai N. Ducea, Barbara Carrapa, Paul A. Kapp, 2015-01-01 This memoir brings together results from a multidisciplinary study of the processes that have formed the highest, widest

part of the Andean Cordilleran orogenic belt in northern Argentina and Chile. The region features a tectonically erosive forearc, protracted arc magmatism, a high-elevation hinterland plateau and strongly shortened retroarc thrust belt, and a Paleocene-Recent foreland basin system--

Late Cenozoic of Península Valdés, Patagonia, Argentina Pablo Bouza,Andrés Bilmes,2017-01-09 This book presents extensive and new information on the Cenozoic marine and continental systems of one of the most important World Heritage sites of Southern South America: The Península Valdés. Using an interdisciplinary approach, that includes geological, biological and archeological perspectives of more than 30 specialists, an integrated description and analysis of the Cenozoic environments of the study region is presented. The volume brings together an update of the geology, climate, geomorphology, soils, biodiversity, archeology and human impact of the Península Valdés. The scope of this book extends to any natural science researcher of the world interested on the Cenozoic history of the Península Valdés.

Geodynamic Processes in the Andes of Central Chile and Argentina S.A.

Sepúlveda, L.B. Giambiagi,S.M. Moreiras,L. Pinto,M. Tunik,G.D. Hoke,M. Farías ,2015-04-09 This Special Publication arises from the UNESCO-sponsored IGCP 586-Y project 'The tectonics and geomorphology of the Andes (32°–34°S): interplay between short-term and long-term processes'. It includes state-of-the-art reviews and original articles from a multidisciplinary perspective that investigate the complex interactions of tectonics and surface processes in the subduction-related orogen of the Andes of central Chile and Argentina (c. 27° –39°S). It aims to improve our understanding of tectonic and landscape evolution of the Andean range at different time scales, as well as the mutual relationship between internal and external mechanisms in Cenozoic deformation, mountain building, topographic evolution, basin development and mega-landslides occurrence across the flat slab to normal subduction segments. The geodynamic processes of the Andes of central Chile and Argentina are analysed from a number of subdisciplines of the Earth sciences, including tectonics, petrology, geophysics, geochemistry, structural geology, geomorphology, engineering geology, stratigraphy and sedimentology.

From Doha to Cancún Ivan Mbirimi,Bridget Chilala,Roman Grynberg,2003 This paper brings together articles relating to key issues of trade liberalisation under negotiation in the Doha Development Round. The focus is on the likely direction and outcome of negotiations on each issue and how the proposed outcomes could affect developing countries. Published as part of the Secretariat's efforts to prepare developing countries for multilateral trade negotiations, this title aims to bring fresh perspectives to the negotiations in Geneva.

Strengthening Argentina's Integration into the Global Economy Martha Martínez Licetti,Mariana Iototy,Tanja Goodwin,José Signoret,2018-05-14

Integration into global markets can improve the efficiency of the Argentinian economy, providing opportunities for private investment to flourish and for the associated benefits to accrue to consumers. Among many policies that are important for integrating into the global economy, particularly relevant are trade, investment, and competition policies. They all share a common attribute: the capacity to shape the incentives of firms to improve resource allocation and to strengthen productivity while integrating into international markets. Once properly combined, investment, trade, and competition policies have mutually reinforcing relationships in the sense that growth dividends stemming from reforms in one policy area are reinforced when properly combined with reforms in the other two. Against this backdrop, this report follows a three-pronged approach. It presents a set of robust empirical analyses – drawing from both general and partial equilibrium exercises – to assess the potential impacts from trade, competition, and investment policy reforms. It offers a new comparative review of international experience with structural microeconomic reform programs to bring insights for Argentina's design and sequencing of such reforms. Finally, it presents individual reform recommendations for each institution in charge of the three respective policy areas in an integrated step-by-step framework from the firm perspective to illustrate the critical challenges to investment and internationalization for Argentinian firms.
