Fired Up or Burned Out Michael L. In Pursuit of Knowledge Deborah Rhode, 2006-09-25 Although academics have never lacked for critics, publications on the profession tend to be either popularized polemics, which are engaging but misleading, or scholarly analyses, which are intellectually responsible but of little interest to anyone but specialists. *In Pursuit of Knowledge* offers an alternative: a unique portrait of academic life that should appeal to both experts and a general audience. Drawing on a wide range of disciplines, including higher education, history, law, sociology, economics, and literature, the book focuses on the ways in which the pursuit of status has undermined the pursuit of knowledge. Deborah Rhode argues that both individual scholars and institutions in higher education are caught in an arms race of reputation. The result has been to skew priorities in scholarship, erode commitments to teaching, compromise efforts of public intellectuals, and impede effectiveness in administration. The book offers several solutions to counter these pervasive problems in our research institutions. Rhode makes a case for increasing accountability and realigning reward systems. She argues that what is needed is a greater sense of responsibility among universities and their faculties to narrow the gap between academic ideals and practices. *In Pursuit of Knowledge* is meticulously researched and elegantly written. It is also exceptionally entertaining in its use of quotations culled from over a hundred academic novels, including works by Kingsley Amis, Saul Bellow, David Lodge, and C.P. Snow. (For example, from P.G. Wodehouse's *The Girl in Blue*, The Agee woman told us for three quarters of an hour how she came to write her beastly book, when a simple apology was all that was required.) The result is a highly readable but also deeply reflective analysis of the academic profession.

The Liberation Trilogy Box Set Rick Atkinson, 2013-10-22 The definitive chronicle of the Allied triumph in Europe during World War II, Rick Atkinson's *Liberation Trilogy* is now together in one boxed set. From the War in North Africa to the Invasion of Normandy, the *Liberation Trilogy* recounts the hard fought battles that led to Allied victory in World War II. Pulitzer Prize-winning and New York Times bestselling author Rick Atkinson brings great drama and exquisite detail to the retelling of these battles and gives life to a cast of characters, from the Allied leaders to rifleman in combat. His accomplishment is monumental: the *Liberation Trilogy* is the most vividly

told, brilliantly researched World War II narrative to date.

The Day of Battle Rick Atkinson, 2008-09-16 In the second volume of his epic trilogy about the liberation of Europe in World War II, Pulitzer Prize-winning author Atkinson tells the harrowing story of the campaigns in Sicily and Italy.

The Obama Phenomenon Charles P. Henry, Robert Allen, Robert Chrisman, 2011-09-28 Barack Obama's campaign and electoral victory demonstrated the dynamic nature of American democracy. Beginning as a special issue of *The Black Scholar*, this probing collection illustrates the impact of the Obama phenomenon on the future of U.S. race relations through readings on Barack Obama's campaign as well as the idealism and pragmatism of the Obama administration. Some of the foremost scholars of African American politics and culture from an array of disciplines--including political science, theology, economics, history, journalism, sociology, cultural studies, and law--offer critical analyses of topics as diverse as Obama and the media, Obama's connection with the hip hop community, the public's perception of first lady Michelle Obama, voter behavior, and the history of racial issues in presidential campaigns since the 1960s. Contributors are Josephine A. V. Allen, Robert L. Allen, Herb Boyd, Donald R. Deskins Jr., Cheryl I. Harris, Charles P. Henry, Dwight N. Hopkins, John L. Jackson, Maulana Karenga, Robin D. G. Kelley, Martin Kilson, Clarence Lusane, Julianne Malveaux, Shaun Ossei-Owusu, Dianne M. Pinderhughes, Sherman C. Puckett, Scharn Robinson, Ula Y. Taylor, Alice Walker, Hanes Walton Jr., and Ronald Williams II.

Robert E. Lee and Me Ty Seidule, 2021-01-26 Ty Seidule scorches us with the truth and rivets us with his fierce sense of moral urgency. --Ron Chernow In a forceful but humane narrative, former soldier and head of the West Point history department Ty Seidule's *Robert E. Lee and Me* challenges the myths and lies of the Confederate legacy--and explores why some of this country's oldest wounds have never healed. Ty Seidule grew up revering Robert E. Lee. From his southern childhood to his service in the U.S. Army, every part of his life reinforced the Lost Cause myth: that Lee was the greatest man who ever lived, and that the Confederates were underdogs who lost the Civil War with honor. Now, as a retired brigadier general and Professor Emeritus of History at West Point, his view has radically changed. From a soldier, a scholar, and a southerner, Ty Seidule believes that American history demands a reckoning. In a unique blend of history and reflection, Seidule deconstructs the truth about the Confederacy--that its undisputed primary goal was the subjugation and enslavement of Black Americans--and directly challenges the idea of honoring those who labored to preserve that system and committed treason in

their failed attempt to achieve it. Through the arc of Seidule's own life, as well as the culture that formed him, he seeks a path to understanding why the facts of the Civil War have remained buried beneath layers of myth and even outright lies—and how they embody a cultural gulf that separates millions of Americans to this day. Part history lecture, part meditation on the Civil War and its fallout, and part memoir, *Robert E. Lee and Me* challenges the deeply-held legends and myths of the Confederacy—and provides a surprising interpretation of essential truths that our country still has a difficult time articulating and accepting.

What has Capital Liberalization Meant for Economic and Financial Statistics

Mr. Robert M. Heath, 2015-04-30 The liberalization of capital flows both in the domestic economy and cross-border has been among the most important policies adopted by IMF member countries over recent decades. The impact has been wide-ranging. This paper looks at the impact on the field of economic and financial statistics in the past two decades, as statisticians have responded to the changing policy needs. The paper considers the historical context of changes that have occurred, draws out the key trends, and asks where these trends might lead statisticians in the foreseeable future. The paper considers that there has been nothing short of a revolution in the field of economic and financial statistics over the past two decades led by a need for greater transparency; greater standardization; new data sets to support understanding of financial interconnections and financial sector risks; and the strengthening of the governance of the statistical function through greater independence of statistical agencies.

Doing Ethics In A Diverse World Robert Traer, 2018-05-04 Nothing is more difficult today than deciding what to do about abortion, gay marriage, economic injustice, war, torture, global warming, euthanasia, capital punishment, and a host of other controversies, particularly in a world in which people of varying religious, cultural, and ethnic backgrounds commonly live side by side. Can we draw on the wisdom of the past to address these contemporary ethical dilemmas? Can we see more clearly how we should consider what is right and wrong, and good and bad, and then work through these divisive problems toward decisions that make sense to us? While challenging moral relativism, *Doing Ethics in a Diverse World* uses a pluralist approach that draws on religious as well as secular positions and on Eastern as well as Western traditions. The book's approach reasons by analogy from the rule of law, including international human rights law, as a means to constructing ethical presumptions about duty, character, relationships, and rights. These presumptions are weighed against the predicted consequences of acting on them, which either confirm the presumptions or support alternative actions.

Parents of Invention Christopher Brown-Syed, 2011-06-07 This fascinating tale of the rise and fall of mini-computer-based integrated library systems (ILS) offers both an explanation of the technical workings—still being used daily—and a historical investigation. *Parents of Invention: The Development of Library Automation Systems in the Late 20th Century* traces the rise and fall of mini-computer-based ILS. In doing so, it offers an insider's view of the process of creation, the technical challenges, and the lasting contributions of librarians and programmers at a time when librarians and their automation needs forced computer companies to innovate. Organized around a series of interviews with computer programmers, librarians, and salespeople, the book discusses developments from the late 1970s to the

mid-1990s, focusing on the 1980s when both ILS and the mini-computer were dominant. It documents the time when a small group of computing vendors joined with large libraries around the world to perfect systems that automated functions such as circulation, acquisitions, cataloging, and online public access catalogs. A concluding chapter, contributed by Louise O'Neill, brings the story up to date with a discussion of current developments in library automation, including the adoption of open-source systems, open-access principles, and the Semantic Web.

Crashing the Tea Party Paul Street, Anthony R. Dimaggio, 2015-12-03 The Tea Party has been the most high profile and controversial social movement in the US of recent times. But real analysis of the Tea Party remains slim - is it a genuine social movement or a topdown interest group created by the Republican Party and corporate funding? *Crashing the Tea Party* is based on first-hand observation of local Tea Party chapters, and undertakes a critical journalistic and scholarly examination from the national and local level. Paul Street and Anthony DiMaggio provide a carefully documented account which challenges conventional wisdoms. *Crashing the Tea Party* fills the gap in public understanding about this particular social movement, and how social movements in general relate today to the ideologies of left and right and the mass media.

Theatricality of Robert Lepage Aleksandar Saša Dundjerović, 2007-08-24 The *Theatricality of Robert Lepage* studies several productions, including *The Dragons' Trilogy*, *Vinci and Tectonic Plates*, *The Seven Streams of River Ota*, *Zulu Time*, and *The Far Side of the Moon*. Dundjerović provides major new insights into Lepage's creative process through an examination of his workshops, open rehearsals, and performances, as well as interviews with Lepage and his collaborators. Outlining the key production elements of Lepage's theatricality, Dundjerović provides a practitioner's view of how Lepage creates as a director, actor, and writer and explores Lepage's practice within both the local Québécois and the international theatre context.

Ralph Johnson Bunche Beverly Lindsay, 2024-03-18 Nobel Peace Prize winner Ralph Johnson Bunche (1904-71) was one of the twentieth century's foremost diplomats and intellectuals. In the wake of centennial celebrations of his birth, leading scholars and diplomats assess Bunche's historical importance and enduring impact on higher education, public policy, and international politics. Their essays reveal not only the breadth of Bunche's influence, such as his United Nations work to broker peace during times of civil war in Africa, the Middle East, and Asia, but also the depth of his intellectual perspectives on race, civil rights, higher education, and international law. Probing his publications, speeches, and public policy initiatives, the volume offers telling insights into the critical roles of universities, public intellectuals, and diplomats in working together to find solutions to domestic and international problems through public and scholarly engagement. In this way, the volume highlights the very connections that Bunche exhibited as an academic, intellectual, and diplomat. Contributors include Lorenzo DuBois Baber, John Hope Franklin, Jonathan Scott Holloway, Charles P. Henry,
