The Business of Media Distribution Jeffrey C. Ulin,2019-05-30 In this updated edition of the industry staple, veteran media executive Jeff Ulin relates business theory and practice across key global market segments—film, television, and online/digital—providing you with an insider’s perspective that can't be found anywhere else. Learn how an idea moves from concept to profit and how distribution dominates the bottom line: Hollywood stars may make the headlines, but marketing and distribution are the behind-the-scenes drivers converting content into cash. The third edition: Includes perspectives from key industry executives at studios, networks, agencies and online leaders, including Fox, Paramount, Lucasfilm, Endeavor, Tencent, MPAA, YouTube, Amazon, and many more; Explores the explosive growth of the Chinese market, including box office trends, participation in financing Hollywood feature films, and the surge in online usage; Illustrates how online streaming leaders like Netflix, Amazon, Apple, YouTube, Hulu and Facebook are changing the way TV content is distributed and consumed, and in cases how these services are moving into theatrical markets; Analyzes online influences and disruption throughout the distribution chain, and explains the risks and impact stemming from changing access points (e.g., stand-alone apps), delivery methods (over-the-top) and consumption patterns (e.g., binge watching); Breaks down historical film windows, the economic drivers behind them, and how online and digital delivery applications are changing the landscape. Ulin provides the virtual apprenticeship you need to demystify and manage the complicated media markets, understand how digital distribution has impacted the ecosystem, and glimpse into the future of how film and television content will be financed, distributed and watched. An online eResource contains further discussion on topics presented in the book.

*Animation: A World History* Giannalberto Bendazzi,2015-11-06 A continuation of 1994’s groundbreaking *Cartoons*, Giannalberto Bendazzi’s *Animation: A World History* is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, *Animation: A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume III catches you up to speed on the state of animation from 1991 to present. Although characterized by such trends as economic globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history.

The Middle School Student's Guide to Academic Success Blake Nemelka,Bo Nemelka,2016-08-30 It’s never too early to start achieving your goals! Get started on the road to success with this unique guide to middle school and beyond—brought to you by FranklinCovey, the company behind the 7 Habits series and *The Leader in Me*. Middle school is full of changes—maybe it’s a new, bigger school, maybe it’s friendships starting to get more complicated, or maybe it’s a combination of a lot of things. But these changes don’t have to be bad, in fact they could be the best thing for us—because when things start to change we have the opportunity to grow. That’s why even though middle schoolers have a ton of other things going on, middle school is the perfect time for them to start altering their habits and goals for their future success. Sure it might sound a little scary, but with a little help it can also be exciting! Framed as twelve conversations to start having, rather than checklists or rules, this unique guide helps students start thinking about what they want their futures to look like and readying themselves to achieve those goals. In *The Middle School Student’s Guide to Academic Success*, portions of which were previously published as *Beat the Middle*, authors Blake and Bo Nemelka offer tried and true advice, opportunities for reflection and action that middle schoolers can tailor to their individual goals and interests, and ways for parents and guardians to help them along the way. Beginning with topics students can get started on now—like setting goals, improving your GPA, working on time management skills, and balancing extracurricular activities—and moving forward to future subjects including college applications, scholarships, and money management—this book is the ultimate guide to helping readers become not only successful middle schoolers, but successful people.

**The Transhumanism Handbook** Newton Lee,2019-07-03 Modern humanity with some 5,000 years of recorded history has been experiencing growing pains, with no end in sight. It is high time for humanity to grow up and to transcend itself by embracing transhumanism. Transhumanism offers the most inclusive ideology for all ethnicities and races, the religious and the atheists, conservatives and liberals, the young and the old regardless of socioeconomic status, gender identity, or any other individual qualities. This book expounds on contemporary views and practical advice from more than 70 transhumanists. Astronaut Neil Armstrong said on the Apollo 11 moon landing in 1969, “One small step for a man, one giant leap for mankind.” Transhumanism is the next logical step in the evolution of humankind, and it is the existential solution to the long-term survival of the human race.

**NEW HEROES ON SCREEN** Rocío Carrasco Carrasco,2018-04-16 This book analyses the representation of new models of masculinity in US recent science fiction cinema. By examining the figure of the “new hero”, a male protagonist with visible unconventional features, it explores new ways of gender representation on screen. Lynch’s *Dune* (1984) and the Wachowsky brothers’ *The Matrix* (1999) share many traits concerning gender representation and offer the type of the androgynous hero who stands for innovative prototypes of masculinity. As a result of these films’ analysis, the book uncovers the tangible controversy in current US society about gender tolerance.

*Pixar's America* Dietmar Meinel,2016-08-26 This book examines the popular and critically acclaimed films of Pixar Animation Studios in their cultural and historical context. Whether interventionist sheriff dolls liberating oppressed toys (*Toy Story*) or exceptionally talented rodents hoping to fulfill their dreams (*Ratatouille*), these cinematic texts draw on popular myths and symbols of American culture. As Pixar films refashion traditional

American figures, motifs and narratives for contemporary audiences, this book looks at their politics - from the frontier myth in light of traditional gender roles (WALL-E) to the notion of voluntary associations and neoliberalism (The Incredibles). Through close readings, this volume considers the aesthetics of digital animation, including voice-acting and the simulation of camera work, as further mediations of the traditional themes and motifs of American culture in novel form. Dietmar Meinel explores the ways in which Pixar films come to reanimate and remediate prominent myths and symbols of American culture in all their cinematic, ideological and narrative complexity.

**Diet and Health** National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Diet and Health, 1989-01-01 Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. *The Magus of Java* Kosta Danaos, 2000-06-01 The story of John Chang, the first man to be documented performing pyrokinesis, telekinesis, levitation, telepathy, and other paranormal abilities. • The author, a mechanical engineer, provides scientific explanations of how these powers work. • For the first time, the discipline of Mo-Pai is introduced to the West. In 1988 the documentary Ring of Fire was released to great acclaim. The most startling sequence in the film is that of a Chinese-Japanese acupuncturist who demonstrates his full mastery of the phenomenon of chi, or bio-energy, by generating an electrical current within his body, which he uses first to heal the filmmaker of an eye infection and then to set a newspaper on fire with his hand. Ring of Fire caused thousands to seek out this individual, John Chang, in pursuit of instruction. Of the many Westerners who have approached him, John Chang has accepted five as apprentices. Kosta Danaos is the second of those five. In his years of study with John Chang, Danaos has witnessed and experienced pyrokinesis, telekinesis, levitation, telepathy, and much more exotic phenomena. He has spoken with spirits and learned the secrets of reincarnation. Most important, he has learned John Chang's story. John Chang is the direct heir to the lineage of the sixth-century b.c. sage Mo-Tzu, who was Confucius's greatest rival. His discipline, called the Mo-Pai, is little-known in the West and has never before been the subject of a book. Now, John Chang has decided to bridge the gap between East and West by allowing a book to be published revealing the story of his life, his teachings, and his powers. It will surely expedite what may well become the greatest revolution of the twenty-first century--the verification and study of bio-energy.
