Every Californian's Guide to Estate Planning Liza W. Hanks, 2020 Estate planning books often fall into two categories: Those that are overwhelming and full of jargon, focusing on strategies to avoid taxes, or those that provide a general overview of wills, trusts, and estate planning tools and issues at a basic level. *Every Californian's Guide to Estate Planning* is different: It focuses on estate planning issues that are unique to people who call California home.

The Wills of Our Ancestors Stuart A. Raymond, 2013-01-19 “Almost every book on English research highlights the need to examine the wills of our ancestors. . . . [this book] gives us an easy to read detailed guide.” —FGS Forum What are wills, and how can they be used for family and local history research? How can you interpret them and get as much insight from them as possible? Wills are key documents for exploring the lives of our ancestors, their circumstances, and the world they knew. This practical handbook is the essential guide to understanding wills. Wills expert Stuart Raymond traces the history and purpose of probate records and guides readers through the many pitfalls and possibilities these fascinating documents present. He describes the process of probate, gives a detailed account of the content of the various different types of record, and advises readers on how they can be used to throw light into the past, offering factual evidence that no genealogist or local historian can afford to ignore. In a series of concise, fact-filled chapters, Raymond explains how wills came into being, who made them and how they were made, how the probate system operates, how wills and inventories can be found, and how much can be learned from them. In addition to covering probate records in England and Wales, he includes the Channel Islands, Ireland, the Isle of

Man and Scotland. This introduction is aimed primarily at family historians who are interested in the wills of particular individuals who are seeking proof of descent and local historians who are interested in the wealth of local historical information that can be gathered from them.

Burke and Wills EB Joyce, DA McCann, 2011-11-02 This book challenges the common assumption that little or nothing of scientific value was achieved during the Burke and Wills expedition. The Royal Society of Victoria initiated the Victorian Exploring Expedition as a serious scientific exploration of hitherto unexplored regions of inland and northern Australia. Members of the

expedition were issued with detailed instructions on scientific measurements and observations to be carried out, covering about a dozen areas of science. The tragic ending of the expedition meant that most of the results of the scientific investigations were not reported or published. Burke and Wills: The Scientific Legacy of the Victorian Exploring Expedition rectifies this historic omission. It includes the original instructions as well as numerous paintings and drawings, documents the actual science undertaken as recorded in notebooks and diaries, and analyses the outcomes. It reveals for the first time the true extent and limits of the scientific achievements of both the Burke and Wills expedition and the various relief expeditions which followed. Importantly, this new book has led to a re-appraisal of the shortcomings and the successes of the journey. It will be a compelling read for all those interested in the history of exploration, science and natural history, as well as Australian history and heritage.

2009 Andrea Bonomi, Paul Volken, 2010-12-23 The current rich volume of the Yearbook attempts to strike a balance in the multifaceted expressions of the increasing importance of private international law at national and supranational levels. The vitality of private international law within the European Union is evidenced by both legislative projects and the rich case law of the European Court of Justice. While the European Commission's draft for a Regulation on succession - which probably constitutes the most detailed and ambitious attempt ever to codify PIL in this area - begins its legislative process, a new initiative on the application of foreign law is being considered by the European institutions. Both of these developments are discussed in the Doctrine section. But the newest Yearbook of PIL also examines interesting developments taking place on other continents. For example, the present volume includes a special section focusing on Chinese PIL and reports on the renewed interest with conflict of laws in the U.S. doctrine.

Cyndi's List Cyndi Howells, 1999 REF This is a multi-title review. The titles include: 'Cyndi's List (880 pg)', 'Instant Information on the Internet (117 pg)', and 'Instant Information on the Internet (86 pg)' - Although Internet directories such as Howells's wildly popular site, (www.cyndislist.com), offer well-organized access to genealogy sites online, many researchers still want to plan searches with a book in hand. Now Howells (*Netting Your Ancestors*) has created a print version, with some exceptions, of her web site. Including over 100 categories and over 40,000 links (most with brief annotations), this book has something for nearly any genealogy-related topic that comes to mind. Schaefer's 'Instant Information' series offers pared-down compilations of basic information search sites. Her book on the United States categorizes web sites by state and includes vital records information sites, prominent research libraries and societies, indexes and databases, and general information sites. In the British Isles book, Schaefer discusses British counties and expands her lists to include major sites for churches and the Celtic language as well as a place-name index. All three books provide easy access to useful genealogy sites. While Howells strives for exhaustive coverage of genealogy links, Schaefer offers very general site lists. Though Howells's book comes with a solid price tag, the purchase of each new (and planned) title in Schaefer's series would quickly rack up the same price or more. Still, for those who want only a brief, focused guide, Schaefer's books are an economical alternative. Elaine M. Kuhn, Allen Cty. P.L., Fort Wayne, IN-

Modern Studies in Property Law - Warren Barr, 2015-08-27 This book contains a collection of peer-reviewed papers presented at the Tenth Biennial Modern Studies in Property Law Conference held at the University of Liverpool in April 2014. It is the eighth volume to be published under the name of the Conference. The Conference and its published proceedings have become an established forum for property lawyers from around the world to showcase current research in the discipline. This collection reflects the diversity and contemporary relevance of modern research in property law. Incorporating a keynote address by Sir John Mummery, retired Lord Justice of Appeal, on 'Property in the Information Age', a number of chapters consider the contribution of property law to issues central to the human condition; the home, health and death. Other papers illustrate an enduring need to question and explore fundamental concepts of the subject as well as to consider the challenges of reforming the law. Data protection and human rights Great Britain: Parliament: Joint Committee on Human Rights, 2008-03-14 This report from the Joint Committee of Human Rights (HLP 72/HCP 132, ISBN 9780104012468) examines issues surrounding data protection and human rights, particularly in relation to the recent loss of data by government departments. Personal data should be handled in accordance with the Data Protection Act (PGA 1998 chp. 29, ISBN 9780105429982), whilst the Human Rights Act (PGA 1998 chp. 42, ISBN 9780105442981) safeguards the right to respect personal information. The Committee has expressed concern about the recent lapses in the protection of data in particular where the sharing of information takes place, and that such sharing needs to be justifiable and appropriate. The Committee fundamentally disagrees with the Government's approach about data protection and does not agree that the two Acts offer sufficient protection, and that further primary legislation is needed to make clear the importance of data protection inside and outside government. The Committee also states that the recent lapses are indicative of a symptomatic failure within government to safeguard personal data and that human rights are far from being a mainstream consideration in Government department's. The Committee states that Government needs to set out proposals to rectify this situation. The Committee supports the extension of the Information Commissioner's powers to defend human rights, but expresses

regret that it has taken the loss of personal data affecting 25 million people for the Government to take the issue of personal data more seriously. For a related publication, see (HCP 154, session 2007-08, Protection of private data, ISBN 9780215037923).
