Global Crime Today Mark Galeotti,2014-02-25 Crime is recognized as a constant factor within human society, but in the twenty-first century organized crime is emerging as one of the distinctive security threats of the new world order. The more complex, organized and interconnected society becomes, its crime becomes too. This book recognizes that the new century will be defined in part by a struggle between an ‘upperworld’, defined by increasingly open economic systems and democratic politics, and a transnational, entrepreneurial, dynamic and richly varied underworld, willing and able to use and distort these trends for its own ends. In order to understand this challenge, this book gathers together experts from a variety of fields to understand how organized crime is changing. From the Sicilian Mafia and the Japanese Yakuza, to the new challenges of Russian and East European gangs and the ‘virtual mafias’ of the cybercriminals, this book offers a clear and concise introduction to many of the key players moving in this global criminal underworld. This book is a special issue of Global Crime

Laughter Out of Place Donna M. Goldstein,2013-09-20 Donna M. Goldstein presents a hard-hitting critique of urban poverty and violence and challenges much of what we think we know about the culture of poverty in this compelling read. Drawing on more than a decade of experience in Brazil, Goldstein provides an intimate portrait of everyday life among the women of the favelas, or urban shantytowns in Rio de Janeiro, who cope with unbearable suffering, violence and social abandonment. The book offers a clear-eyed view of socially conditioned misery while focusing on the creative responses—absurdist and black humor—that people generate amid daily conditions of humiliation, anger, and despair. Goldstein helps us to understand that such joking and laughter is part of an emotional aesthetic that defines the sense of frustration and anomie endemic to the political and economic desperation among residents of the shantytown.

Models, Algorithms and Technologies for Network Analysis Mikhail V. Batsyn,Valery A. Kalyagin,Panos M. Pardalos,2014-10-30 This volume compiles the major results of conference participants from the Third International Conference in Network Analysis held at the Higher School of Economics, Nizhny Novgorod in May 2013, with the aim to initiate further joint research among different groups. The contributions in this book cover a broad range of topics relevant to the theory and practice of network analysis, including the reliability of complex networks, software, theory, methodology, and applications. Network analysis has become a major research topic over the last several years. The broad range of applications that can be described and analyzed by means of a network has brought together researchers, practitioners from numerous fields such as operations research, computer science, transportation, energy, biomedicine, computational neuroscience and social sciences. In addition, new approaches and computer environments such as parallel computing, grid computing, cloud computing, and quantum computing have helped to solve large scale network optimization problems.

Migrants and Refugees in Europe Simone Baglioni,Francesca Calò,2023-01-03 EPDF and EPUB available Open Access under CC-BY-NC-ND licence. The motivations of migrants for travelling to Europe vary, and the quality of the processes involved in their settlement and contribution to social and economic development are inextricably linked to their prospects of finding and sustaining good-quality work. This book explores the labour market integration of migrants, refugees and asylum seekers across seven European countries: the Czech Republic, Denmark, Finland, Greece, Italy, Switzerland and the UK. Using empirical data from the Horizon2020 SIRIUS Project, it investigates how legal, political, social and personal circumstances combine to determine the work trajectory for

migrants who choose Europe as their home.

China vs America Oliver Letwin,2021-08-24 China's rise as a global superpower has completely reshaped the landscape of international politics. As the country's authoritarian regime becomes increasingly assertive on the world stage, the United States grows ever more hostile to its Asian rival. Repressive moves by China in Xinjiang and Hong Kong, military activities in the South China Sea and Western measures against Chinese companies have only exacerbated tensions. While the great powers of East and West battle over hegemony, the world is being led inexorably towards a new Cold War. During his time as a Cabinet minister attending National Security Council meetings, Oliver Letwin realised that there was no agreement among Western politicians and academics on how to conduct a peaceful long-term relationship with China. China vs America traces the contours of history, both ancient and modern, to explain how China has emerged as a challenger to American power in the twenty-first century and why this has created such uneasiness in the West. In this robust and controversial assessment, Letwin argues that the international rules-based order is completely ill-equipped to foster a positive relationship between China and the United States and that the global community must act now to correct the collision course these two behemoths are currently on before it's too late.
