on Xi Jinping's era, and contains examples of whether and how specific topics and tactics reoccur across generations. The state development strategy section then goes on to include chapters on shaping China's strategic narratives, neoliberal discourse within state developmentalism, and keyword evolution. The practical policies part looks at the issues of re-education, health, class, and ethnicity, analysing how the leaders talk about China's poor, frame the representations of megaprojects on social media, and discursively display diplomatic strength. As a study of the rule of Xi Jinping and the rhetoric of the contemporary Chinese political system, this book will be of huge interest to students and scholars of Chinese politics and political science more broadly.

China Debates Its Global Role Shaun Breslin, Ren Xiao, 2021-09-30 What do China's scholars make of the nature of China's global rise? And what is the significance of academic debates for Chinese policy goals and preferences? In this book, leading Chinese specialists outline how their colleagues are studying and interpreting different dimensions of China's evolving global role, opening these Chinese language debates to a new audience. Collectively they show that while some ideas and ways of thinking are more prominent than others, there is no homogeneity of scholarship and no single conception of what China thinks and wants. Not only has the range of issue areas under discussion actually increased as China's global role and impact has changed, but there also remains considerable diversity when it comes to thinking on what China can, might, and should try to do as a global power, and how China's global role should be studied and theorized. The chapters in this book were originally published in the journal, *The Pacific Review*.

Chinese Communist Party School and its Suzhi Education Chunqi Zhou, 2023-03-03 Zhou applies network governance theories to Chinese education and focuses on Chinese education policy implementation, particularly with the Chinese Communist Party Schools (CCPS). The CCPS is the institution which follows the Chinese Communist Party (CCP)'s ideas and decisions to educate key education leaders at all levels with different political purposes. In the Chinese education policymaking process, the CCP is the leading power which provides policy directions, but the education department is the main vehicle for the delivery of education policy. Using document analysis and interviews, Zhou argues that an education policy implementation process can be successful from top to bottom level in cooperation with the education department. He further posits that formulating and implementing Chinese education policy can be characterised as a form of network governance, which coordinates actors' and stakeholders' motivation to comply with collective decisions in Chinese education implementation. The book offers fresh data for the study of policy networks in Chinese education, the study of CCPS and Chinese network governance. This book will be of interest to scholars and postgraduate students studying Chinese education, comparative educational policy and comparative education research.

Mao and Markets Christopher Marquis, Kunyuan Qiao, 2022-11-15 A thoroughly researched assessment of how China's economic success continues to be shaped by the communist ideology of Chairman Mao. It was long assumed that as China embraced open markets and private enterprise, its state-controlled economy would fall by the wayside, that free markets would inevitably lead to a more liberal society. Instead, China's growth over the past four decades has positioned state capitalism as a durable foil to the orthodoxy of free markets, to the confusion of many in the West. Christopher Marquis and Kunyuan Qiao argue that China's economic success is based on—not in spite of—the continuing influence of Communist leader Mao Zedong. They illustrate how Mao's ideological principles, mass campaigns, and socialist institutions have enduringly influenced Chinese entrepreneurs' business strategies and the management of their ventures. Grounded in case studies and quantitative analyses, this book shows that while private enterprise is the engine of China's growth, Chinese companies see no contradictions between commercial drive and a dedication to Maoist ideology.
