Strategic Communication Theory and Practice Carl H. Botan, 2017-12-18 A guide to strategic communication that can be applied across a range of subfields at all three levels—grand strategic, strategic, and tactical communication. Communication is a core function of every human organization so when you work with communication you are working with the very core of the organization. Written for students, academics, and professionals, *Strategic Communication Theory and Practice: The Cocreational Model* argues for a single unified field of strategic communication based in the three large core subfields of public relations, marketing communication, and health communication, as well as strategic communicators working in many other subfields such as political communication, issues management, crisis communication, risk communication, environmental and science communication, social movements, counter terrorism communication, public diplomacy, public safety and disaster management, and others. *Strategic Communication Theory and Practice* is built around a cocreational model that shifts the focus from organizational needs and the messages crafted to achieve them, to a publics-centered view placing publics and their ability to cocreate new meanings squarely in the center of strategic communication theory and practice. The author—a noted expert in the field—outlines the theories, campaign strategies, common issues, and cutting edge challenges facing strategic communication, including the role of social media, ethics, and intercultural

strategic communication. As the author explains, the term strategic communication properly refers only to the planned campaigns that grow out of research and understanding what publics think and want. This vital resource answers the questions of whether, and how, strategic-level skills can be used across fields, as it:

- Explores the role of theory and the cocreational meta-theory in strategic communication
- Outlines ethical practices and problems in the field
- Includes information on basic campaign strategies
- Offers the most recent information on risk communication, preparedness and terrorism communication, and employment in strategic communication
- Redefines major concepts, such as publics, from a cocreational perspective

**The World of Philip and Alexander** Elin C. Danien, University of Pennsylvania. University Museum of Archaeology and Anthropology, 1990-01-29

The magnetism of the man known as Alexander the Great, along with that of his father, Philip of Macedon, is almost tangible, felt by people in all times since that brilliant young conqueror moved through the world more than two thousand years ago. Scholars whose fields touch that power continue to be intrigued by these two men and the ways in which their actions altered or contributed significantly to Western culture. Contributors discuss the fourth century B.C. from the point of view of the historical significance of Philip (A. J. Graham and A. J. N. W. Prag), the foundations of Alexander's empire in Egypt (Murray C. McClellan), the ancient Olympic games (David Gilman Romano), religion (Irene Bald Romano), and Alexander's last great battle in India

(Gregory L. Possehl).

**Political Culture and the Making of Modern Nation-States** Edward Weisband, Courtney I P Thomas, 2015-11-17 This book focuses on transformations of political culture from times past to future-present. It defines the meaning of political culture and explores the cultural values and institutions of kinship communities and dynastic intermediaries, including chiefdoms and early states. It systematically examines the rise and gradual universalization of modern sovereign nation-states. Contemporary debates concerning nationality, nationalism, citizenship, and hyphenated identities are engaged. The authors recount the making of political culture in the American nation-state and look at the processes of internal colonialism in the American experience, examining how major ethnic, sectarian, racial, and other distinctions arose and congealed into social and cultural categories. The book concludes with a study of the Holocaust, genocide, crimes against humanity, and the political cultures of violation in post-colonial Rwanda and in racialized ethno-political conflicts in various parts of the world. Struggles over legitimacy in nation-building and state-building are at the heart of this new take on the important role of political culture.

*Alexander L. George: A Pioneer in Political and Social Sciences* Dan Caldwell, 2018-07-20 Alexander L. George was one of the most productive and respected political scientists of the late twentieth century. He and his wife, Juliette George, wrote one of the first psychobiographies, and Professor

George went on to write seminal articles and books focusing on political psychology, the operational code, foreign policy decisionmaking, case study methodology, deterrence, coercive diplomacy, policy legitimacy, and bridging the gap between the academic and policymaking communities. This book is the first and only one to contain examples of the works across these fields written by Alexander George and several of his collaborators. • This is a collection of Alexander L. George's works from the major fields to which he contributed. • There are biographical essays by his wife and co-author (Juliette L. George), daughter (Mary George Douglass), former student (Dan Caldwell), and professional colleague (Janice Gross Stein). • There are 25 photographs of Alexander L. George and his family which have not previously been published.

Promoting Health and Wellness in Underserved Communities Anabel Pelham, Elizabeth Sills, 2023-07-03 Starting from the premise that our health status, vulnerability to accidents and disease, and life spans – as individuals and communities – are determined by the organization, delivery, and financing (or lack thereof) of health care, this book explores how educators and community caretakers teach the complex web of inter-connection between the micro level of individual health and well-being and the macro level of larger social structures. Through the lenses of courses in anthropology, ESL, gerontology, management information systems, nursing, nutrition, psychology, public health, and sociology, the contributors offer

examples of intergenerational and interdisciplinary practice, and share cutting-edge academic creativity to model how to employ community service learning to promote social change.

Nuclear Logics Etel Solingen, 2009-02-09 Nuclear Logics examines why some states seek nuclear weapons while others renounce them. Looking closely at nine cases in East Asia and the Middle East, Etel Solingen finds two distinct regional patterns. In East Asia, the norm since the late 1960s has been to forswear nuclear weapons, and North Korea, which makes no secret of its nuclear ambitions, is the anomaly. In the Middle East the opposite is the case, with Iran, Iraq, Israel, and Libya suspected of pursuing nuclear-weapons capabilities, with Egypt as the anomaly in recent decades. Identifying the domestic conditions underlying these divergent paths, Solingen argues that there are clear differences between states whose leaders advocate integration in the global economy and those that reject it. Among the former are countries like South Korea, Taiwan, and Japan, whose leaders have had stronger incentives to avoid the political, economic, and other costs of acquiring nuclear weapons. The latter, as in most cases in the Middle East, have had stronger incentives to exploit nuclear weapons as tools in nationalist platforms geared to helping their leaders survive in power. Solingen complements her bold argument with other logics explaining nuclear behavior, including security dilemmas, international norms and institutions, and the role of democracy and authoritarianism. Her account charts the most

important frontier in understanding nuclear proliferation: grasping the relationship between internal and external political survival. *Nuclear Logics* is a pioneering book that is certain to provide an invaluable resource for researchers, teachers, and practitioners while reframing the policy debate surrounding nonproliferation.

**Conflict and Cooperation in Sino-US Relations** Jean-Marc F. Blanchard, Simon Shen, 2015-02-20 Numerous crosswinds are buffeting the more than 40-year-old People's Republic of China--American relationship, yet only once since Nixon's historic trip to China in 1972 has a major conflagration seemed a real possibility. Anchoring the relationship throughout multiple storms are the two countries' broad areas of collaboration such as deep links in culture, economics, and education. However, for some observers, the conflictual aspects of the relationship seem to be gaining prominence. *Conflict and Cooperation in Sino-US Relations* offers a timely and current look at one of the world's weightiest bilateral relationships. It goes beyond detailing the conflict and cooperation that have been integral facets of China--US interactions since 1972, to gauging the relationship's evolution and future trends, examining its nuances regarding diverse issues such as the Asia-Pacific leadership structure, the South China Sea, and the Korean peninsula. The book further delves into the causes of conflict and cooperation, offers diverse solutions for tempering frictions between Beijing and Washington, and considers the efficacy of some of the mechanisms (e.g.,

military-to-military exchanges) that China and the US currently employ to manage their relationship. The chapters suggest that extreme anxieties about China-US relations may be misplaced, but that there nonetheless are some worrisome signs even in areas like economics and the environment that are perceived as naturally cooperative. While the book does not offer any silver bullets, various contributors contend that successful management of Sino-American relations may require greater American accommodation of China's interests. This book will be of great interest to students and scholars of Chinese politics, American politics, international relations, and Asian studies, as well as to policy-makers working in the field.

Good Fences, Bad Neighbors Boaz Atzili, 2012-02 Border fixity—the proscription of foreign conquest and the annexation of homeland territory—has, since World War II, become a powerful norm in world politics. This development has been said to increase stability and peace in international relations. Yet, in a world in which it is unacceptable to challenge international borders by force, sociopolitically weak states remain a significant source of widespread conflict, war, and instability. In this book, Boaz Atzili argues that the process of state building has long been influenced by external territorial pressures and competition, with the absence of border fixity contributing to the evolution of strong states—and its presence to the survival of weak ones. What results from this norm, he argues, are conditions that make internal conflict and the spillover of

interstate war more likely. Using a comparison of historical and contemporary case studies, Atzili sheds light on the relationship between state weakness and conflict. His argument that under some circumstances an international norm that was established to preserve the peace may actually create conditions that are ripe for war is sure to generate debate and shed light on the dynamics of continuing conflict in the twenty-first century.

*New Dynamics in US-China Relations* Mingjiang Li, Kalyan M.

Kemburi, 2014-10-17 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies, as well as to play the leading role in maintaining peace and stability in the region. However, Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region, these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia-Pacific alongside the strategies employed in the management of this relationship. In turn, it illuminates the sources of conflict and cooperation in US-China relations, looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic

forces, and Taiwan. Finally, it explores the role of regional states in shaping US-China relations, and in doing so covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar, and Cambodia. With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security and how Asian states view their relations with the US and China respectively. *New Dynamics in US-China Relations* will be of huge interest to students and scholars of Asian politics, US politics, international relation and security studies, as well as practitioners involved in framing and implementing foreign, security and economic policy pertaining to the Asia Pacific.

The G8, the United Nations, and Conflict Prevention Radoslava N. Stefanova, 2017-03-02 This innovative and forward looking work examines the Genoa summit agenda with a view to strengthening international conflict prevention institutions and identifying and analyzing economic early warning indicators. It devotes particular attention to the Italian contribution and approach and the ways in which it can be effectively implemented following the summit. The first book to compare the role of the G8 and the United Nations in conflict prevention and human security, *The G8, the United Nations, and Conflict Prevention* will be essential reading for academics, government officials and members of the business and media communities.

Exhalation / Expiration for Wind Ensemble Alexandra Fol, 2011-11-21 Doctoral Thesis / Dissertation from the year 2011 in the subject Musicology, grade: Pass, McGill University (Schulich School of Music), course: Composition, language: English, abstract: Exhalation / Expiration, a composition for a wind ensemble of thirty-four players, continues a series of musical homages by the composer honouring her father, Alexander Fol. The composition unites different musical devices to accomplish a metaphorical mapping of the infection of a healthy body with a mortal sickness, followed by the organism's gradual demise. The work's duration is twenty-one-and-a-half minutes. The design of these materials, which incorporates the form, harmony, rhythm and orchestration, applies an approach to musical semiotics informed by the philosophical doctrine of Thracian Oral Orphism, as well as by medical research on terminally ill cancer patients. The author defines two types of musical signs, the event-type and the process-type, and decides upon a musical realization thereof at the formal and structural levels. In the composition, the signs are organized as musical symbols that portray the gradual transition between the types of music symbolizing health – 'A' – and sickness – 'B' – represented by types of harmonic, rhythmic and orchestrational treatment.

**Jane Alexander** Jane Alexander, DaimlerChrysler, 2002 Somewhere between realism and metaphor, humanity and bestiality, South Africa and the rest of the world, Jane Alexander's sculptures give shape to the brutal, painful,

tragic, bizarre, incomprehensible, and fragile existence of her multicultural society--and, to a lesser extent, others. Existing in a no-man's-land where the difference between victim and perpetrator is blurred and meaningless, her life-size figures, made from fiberglass, wood, clay, and found objects, sometimes dressed as people do, sometimes naked as people and animals are, are uncanny in their astonishing naturalism, a naturalism thwarted by bandages, animal masks, incomprehending animal eyes, and violent lacerations. This is the first extensive publication dedicated to Alexander's work.

*Leaders in conflict* Stephen Dyson, 2015-11-01 Beneath the violence of the US war in Iraq was a subterranean conflict between President Bush and Secretary of Defense Rumsfeld, rooted in their different beliefs and leadership styles. Bush was prepared to pay a high cost in American lives, treasure, and prestige to win. Rumsfeld favoured turning the war over to the Iraqis, and was comfortable with the risk that Iraq would disintegrate into chaos. Only after Bush removed Rumsfeld in late 2006 did he bring US strategy into line with his goals, sending additional troops to Iraq and committing to continued US involvement. In *Leaders in conflict*, Stephen Benedict Dyson shows that Bush and Rumsfeld thought about international politics, and about leadership, in divergent ways, and demonstrates the impact these differences had on the course of the war. The book is based upon more than two dozen interviews with administration insiders, and will appeal to those interested in the US presidency, US foreign policy, leadership and wartime decision making.

**Made In Texas: Geogre W. Bush And The Southern Takeover Of American Politics** Michael Lind, 2003 The southern takeover of American Politics.

**EU Regulatory Decision Making and the Role of the United States** Oliver Ziegler, 2012-09-05 Oliver Ziegler raises the question of what role economic interests of the United States play in the regulatory decision making process

of the European Union. Critics often assume that U. S. dominance in the world economy, fueled by a powerful business elite, has significantly affected EU regulations at the expense of environmental and consumer protection standards. The author falsifies this proposition. He shows, first, that the EU often adopts regulations against the explicit opposition of the U. S. thereby ignoring the principles of transatlantic regulatory cooperation. Second, he demonstrates that business interests in the EU are usually not homogenous and often come second to environmental and consumer concerns. In addition, the author shows the increasing role of the European Parliament in EU regulatory decision making.
