American Yachts in Naval Service Kenneth Howard Goldman, 2020-11-02 Before there was a U.S. Navy, several Colonial navies were all-volunteer--both the crews and the vessels. From its beginnings through World War II, the Navy has relied on civilian sailors and their fast vessels to fill out its ranks of small combatants. Beginning with the birth of the yacht in the Netherlands in the 17th century , this illustrated history traces the development of yacht racing, the advent of combustion-engine power and the contribution privately owned vessels have made to national defense. Vessels conscripted during the Civil War served both the Union and Confederacy--sometimes changing sides after capture. The first USS Wanderer saw the slave trade from both sides of the law. Aboard the USS Sylph, Oscar-winning actor Ernest Borgnine fought the Third Reich's U-boats under sail. USS Sea Cloud made history as the first racially integrated ship in the Navy, three years before President Truman desegregated the military.

Planning Inclusive Yachts Paolo

Ferrari, 2021-02-01 This book proposes a novel approach to the design of accessible and inclusive sailing yachts, inspired by the principles of "Design for All." The goal is to allow anyone, including users with disabilities and individuals belonging to the weaker segments, to sail without barriers. Starting from an analysis of existing pleasure boats, the author identifies a series of factors limiting the accessibility or usability of external and internal spaces. In turn, he discusses the most suitable solutions to each. By proposing an extensive set of design solutions

applicable to the confined spaces on yachts, and which comply with the relevant anthropometric and dimensional rules, the book offers a timely snapshot of the potential benefits and applicability of an inclusive approach to yacht design, setting a new reference standard for inclusive and accessible nautical design.

Shaped by Wind & Wave Dudley Dix, 2012-02 This book is a collection of random writings by a boat designer explaining boat design in layman's terms, explanations of various boatbuilding methods, how to loft the lines of a boat, how to turn the hull over and various other boating subjects that you will not find in other books about boat design. It includes a chapter on recommendations for sailing around the Cape of Good Hope and also one about the only circumnavigation ever in an open boat.

American Yacht List , 1896

Law of Yachts & Yachting Richard Coles, Filippo Lorenzon, 2013-07-31 The book is the first comprehensive treatise on the law relating to yachts and provides its readers with a thorough analysis of maritime law as relevant to the superyacht sector. Written by a team of leading yachting practitioners and researchers, it covers the legal issues arising during the life of a yacht. The book is written for the legal practitioner, yacht-broker and manager concerned with the operation of professionally crewed yachts including financing, registration, chartering, insurance, compliance and casualty management. Key Features - •This is the first and only practitioners' book on the area •It covers all major aspects of yachting law in a single book •The Law of Yachts and Yachting is highly comprehensive - despite its main focus on contract and tort law, it contains references to public law and international law and practice •References to case law, English, foreign and international •Appendices containing essential source materials

The Windvane Self-Steering Handbook Bill

Morris, 2004-02-24 Here is the definitive manual for choosing, purchasing, installing, maintaining, repairing, using, and even building a windvane self-steerer, that amazing device that relieves longdistance sailors from the the helm while using not one amp of precious electrical power. This user-friendly guide includes: How vane gears work A clear discussion of how to match vane design with boat Invaluable instructions for how to sail with a windvane-- settings, sail trim, and more A detailed look at nine commercial models, plus plans and instructions for readers to build their own

South Atlantic Capsize Dudley Dix, 2015-04-30 In January 2014 the 38ft sailboat Black Cat set out to race across the South Atlantic Ocean in the Cape to Rio Race. On the second day of the race they broke their rudder while surfing at 22 knots and were subsequently capsized by a massive wave in a big storm. This book tells the story of the race, the boat, the crew and what happened on that day, how crew, food and equipment were thrown around the interior, what happened to the crewman who was in the cockpit at the time, what damage was done to the boat and what the crew did to cope with and recover from the situation in which they found themselves.

Illustrated Custom Boatbuilding Bruce Roberts-Goodson, 2013-11-04 This book caters specifically for the needs of prospective buyers of production and custom built boats, outlining the pros and cons of all types of boatbuilding materials. It will help owners decide what material is most suitable for their needs and how to customise and modify the boat to suit their particular requirements. With his vast experience of boat design, Bruce Roberts-Goodson gives advice (for both sail and powerboats) on: construction materials and methods special tools required

suitable building sites designing and building the interiors engines for sail and power electrical systems for sail and power rigging, sail plans and keels plumbing and equipment Bruce Roberts-Goodson has a thriving boat design business, and with many hundreds of enquiries each day, he is well placed to know what questions customers want answered and what the current trends are.

Seawise Donald M Street,2004-09 D. M. Street Jr., a lifetime sailor of tremendous experience wrote this book in 1979. In the Prologue he reviews what he said in 1979 and updates it to the 21st Century in the light of new equipment available to the yachtsman and in the light of the considerable sailing he has done since that time. Now aged 74, D. M. Street Jr. bases his views (not always popular ones) on a lifetime at sea. Most yachtsmen think of Street and Iolaire--the 46-ft. engineless yawl built in 1905 that Street has owned since 1957--as the author of Caribbean Guides. They forget (or do not realize) the breadth of his varied experience in delivering and navigating other boats. Thirty six trips between North America and the islands or the reverse; a dozen trans-atlantics; four Fastnet Races; One Bermuda Race; plus other distance races and regattas too numerous to mention, on various different boats. He has cruised the entire eastern Caribbean, east coast of North America, European waters: Ireland, England, the Baltic, France, Brittany, Normandy, the Western Mediterranean. He has also cruised all the Atlantic Islands: Madeiran Archipelago, Canaries, Cape Verdes,

Bermuda, and the Azores. Few yachting authors have has as extensive and varied experience cruising both inshore and off shore. He has been an enthusiastic racer all his life, racing boats of all types from dinghies to J-boats where he has served as Rock, Tide & Wind Pilot on Shamrock V. Since 1985 he and his sons have competitively raced their 1937 Dragon Gypsy in Glandore, Ireland.

The Bouvier Affair Alexandra Bregman, 2019-04-11
When Russian oligarch Dmitry Rybolovlev realized he was being cheated by his art advisor Yves Bouvier, he was immediately on the warpath for fraud. From Switzerland to Monaco, 37 masterpiece artworks were caught in the middle of complicated money laundering and bribery accusations, where no one was quite who they seemed.
