First Introduction to the Critique of Judgment Immanuel Kant,1965

Roots of Wisdom Helen Buss Mitchell,2005

Introduction to the International Human Rights Regime Manfred Nowak,2021-10-01 Human rights are the only universally recognized system of contemporary values which, during the last 50 years, has been gradually developed and defined by all States in a comprehensive international legal framework. The international human rights regime is closely related to international peace and security, development and a global trend towards pluralist democracy, good governance and the rule of law. International humanitarian and criminal law can today be considered as specific aspects of international human rights law, which after the end of the Cold War has become increasingly complex and difficult to oversee. The present textbook attempts to provide a first and at the same time comprehensive introduction into the idea and significance of human rights, its philosophical and theoretical foundations, historical development, the main structures and procedures of international human rights protection by the United Nations and regional organizations (Council of Europe, Organization of American States, African Union, OSCE and others), and modern trends, such as preventive mechanisms, international criminal law, human rights as essential elements of peace-keeping and peace-building operations, humanitarian intervention or the relationship between human rights and terrorism. The book perceives human rights as an inter-disciplinary topic and illustrates the theory of human rights with a considerable number of practical case-studies, graphics, statistics, procedural charts and textboxes. It serves as a textbook for students of law, political science, international relations and other academic fields related to human rights, but may as well be used as a first introduction for those working in the field, for NGO activists, legal practitioners and others interested in the fascinating world of universal human rights.

Human Rights at the UN Roger Normand,Sarah Zaidi,2008-01-09 Human rights activists Roger Normand and Sarah Zaidi provide a broad political history of the emergence and development of the human rights movement in the 20th century through the crucible of the United Nations, focusing on the hopes and expectations, concrete power struggles, national rivalries, and bureaucratic politics that molded the international system of human rights law. The book emphasizes the period before and after the creation of the UN, when human rights ideas and proposals were shaped and transformed by the hard-edged realities of power politics and bureaucratic imperatives. It also analyzes the expansion of the human rights framework in response to demands for equitable development after decolonization and organized efforts by women, minorities, and other disadvantaged groups to secure international recognition of their rights.

Human Rights Christian Tomuschat,2008-07-10 Human Rights between Idealism and Realism presents human rights in action, focusing on their effectiveness as legal tools designed to benefit human beings. By combining conceptual analysis with an emphasis on procedures and mechanisms of implementation, this volume provides a multidimensional overview of human rights. After examining briefly the history of human rights, the author analyses the intellectual framework that forms the basis of their legitimacy. In particular, he covers the concept of universality and the widely used model that classifies human rights into clusters of different 'generations'. The volume then moves on to analyse of the activities of the political institutions of the United Nations, the expert bodies established by the relevant treaties, and the international tribunals specifically entrusted at the regional level with protecting human rights. The author explains how and why the classical array of politically inspired informal devices has been enriched by the addition of international criminal procedures and by endeavours to introduce civil suits against alleged individual violators of human rights. Finally, the volume is rounded off by a consideration of the importance of humanitarian law as an instrument for the protection of human life and dignity and an exploration of the future of human rights.

Human Rights and the End of Empire Alfred William Brian Simpson,2004 The European Convention on Human Rights of 1950 established the most effective international system of human rights protection ever created. This is the first book that gives a comprehensive account of how it came into existence, of the part played in its genesis by the British government, and of its significance for Britain in the period between 1953 and 1966.

The Judicial Application of Human Rights Law Nihal Jayawickrama,2002-12-12 10 The right to life

Un Law, Fundamental Rights Antonio Cassese,1979-02-10 In its forty-fourth session the General Assembly of the United Nations proclaimed the 1990s as the Decade of International Law . One of the main purposes of the decade is the promotion of effective means for peaceful international dispute settlement, and, especially, strengthening the role of & respect for the International Court of Justice, the principal judicial organ of the United Nations. The editors of this book contribute to this aim by bringing together a variety of opinions by international legal experts on peaceful dispute settlement. The subject is approached from different angles, ranging from the role of the International Law Commission & the Non-Aligned Movement to human rights & space law disputes, in order to identify areas of international law where room exists for further development of existing means for peaceful settlement of international disputes. A general conclusion which can be drawn from this survey is that the focus of attention should not be aimed primarily at strengthening the role of the International Court of Justice, e.g. by amending some of its rules or by trying to increase its political acceptability through diplomatic efforts. Instead, the focus should be on small scale improvements within specific areas of international law with an emphasis on the relation between dispute settlement & supervision. Furthermore, it seems essential for a real improvement to give non-governmental organisations or private persons a greater role in upholding the rule of international law, whether in domestic courts or in international fora. This work has been published previously in the Leiden Journal of International Law, Special Issue (3 LJIL 90).

Human Rights: Concept and Standards Janusz Symonides,2017-09-19 Presenting reflections on the historical perspectives and philosophical foundations of human rights, this book provides a detailed analysis of civil and political rights, as well as the rights of persons belonging to such vulnerable groups as women, children and minorities, indigenous people, refugees, displaced persons and migrant workers.

Human Rights in a Changing World Antonio Cassese,1990

The Legacy of Nuremberg: Civilising Influence or Institutionalised Vengeance? David Arnon Blumenthal,Timothy L.H. McCormack,2007-12-12 In this new collection of essays the editors assess the legacy of the Nuremberg Trial asking whether the Trial really did have a civilising influence or if it constituted little more than institutionalised vengeance. Three essays focus particularly on the historical context and involve rich analysis of, for example, the atmospherics of the Trial itself and the attitudes of German society at the time to the conduct of the Trial. The majority of the essays deal with the contemporary legacies of the Nuremberg Trial and attempt to assess the ongoing relevance of the Judgment itself and of the principles encapsulated in it. Some essays consider the importance of the principle of individual criminal responsibility under international

law and argue that the international community has to some extent failed to fulfil the promise of Nuremberg in the decades since the Trial. Other essays focus on contemporary application of aspects of the substantive law of Nuremberg - particularly the international crime of aggression, the law of military occupation and the use of the crime of conspiracy as an alternative basis of criminal responsibility. The collection also includes essays analysing the nature and operation of a number of international criminal tribunals since Nuremberg including the permanent International Criminal Court. The final grouping of essays focus on the impact of the Nuremberg Trial on Australia examining, in particular, Australia's post-World War Two war crimes trials of Japanese defendants, Australia's extensive national case law on Article 1(F) of the Refugee Convention and Australia's national implementing legislation for the Rome Statute.

The Charter of the United Nations Bruno Simma,2002 This is the authoritative, article-by-article account of the legislative history, interpretation, and practical application of each and every United Nations Charter provision. Written by a team of distinguished scholars and practitioners, this book is the product of a combination of academic research with the insights of practice, and is an indispensable work of reference for all those interested in this significant international organization. The Commentary will be crucial in providing new directions for the development of international law and the United Nations in the twenty-first century.
