*Parent-Child Separation* Jennifer E. Glick, Valarie King, Susan M. McHale, 2021-11-26 This book examines the similarities in children's short- and long-term development and adjustment when they have been separated from their parents because of larger institutional forces. It addresses the unique circumstances and the similarities faced by parents and children under three different institutional contexts of separation: parental migration and deportation, parental incarceration, and parental military deployment. Chapters describe the difficulties faced by families in each of these circumstances, along with the challenges in conducting research under the multidimensional and dynamic complexities of parent-child separation. Finally, the volume offers recommendations for creating supportive structures and interventions for families facing separation that can bolster youth well-being in childhood and beyond. Featured areas of coverage include: · Parental migration. · Parental incarceration. · Parental military deployment. · Undocumented migration and deportation. · Child-parent relationship and child resilience and adjustment. *Parent-Child Separation* is a must-have resource for researchers, professors, clinicians, professionals, and graduate students in developmental psychology, family studies, public health, clinical social work, educational policy, and migration studies as well as all interrelated disciplines, including sociology, criminology, demography, prevention science, political science, and economics.

**Women in European Holocaust Films** Ingrid Lewis, 2018-01-19 This book considers how women's experiences have been treated in films dealing with Nazi persecution. Focusing on fiction films made in Europe between 1945 and the present, this study explores dominant discourses on and cinematic representation of women as perpetrators, victims and resisters. Ingrid Lewis contends that European Holocaust Cinema underwent a rich and complex trajectory of change with regard to the representation of women. This change both reflects and responds to key socio-cultural developments in the intervening decades as well as to new directions in cinema, historical research and politics of remembrance. The book will appeal to international scholars, students and educators within the fields of Holocaust Studies, Film Studies, European Cinema and Women's Studies.

**Unsettling Gaza** Joyce Dalsheim, 2011-03-18 Based on fieldwork in the Jewish settlements in and near the Gaza Strip prior to the Israeli withdrawal, *Unsettling Gaza* critically examines secular liberalism, religiosity, and the complexities of being Israeli. The book holds up a mirror in which the liberal left and the radical right each find themselves reflected in the face of the other.

**Dynamics of Identification and Conflict** Markus Virgil Hoehne, Echi Christina Gabbert, John R. Eidson, 2022-10-01 Dealing with the dynamics of identification and conflict, this book uses theoretical orientations ranging from political ecology to rational choice theory, interpretive approaches, Marxism and multiscale analysis. Case studies set in Africa, Europe and Central Asia are grouped in three sections devoted to pastoralism, identity and migration. What connects all of these anthropological explorations is a close focus on processes of identification and conflict at the level of particular actors in relation to the behaviour of large aggregates of people and to systemic conditions.

**Women Without a Past?** Joanne Sayner, 2007 Contains autobiographies written by women who experienced Nazism from different perspectives: Elfriede Brüning, Hilde Huppert, Greta Kuckhoff, Elisabeth Langgässer, Melita Maschmann, Inge Scholl and Grete Weil. This book examines autobiography as a form of writing at the centre of debates on the 'self', 'truth' and 'history'.

Metaphor, Nation and the Holocaust Andreas Musolff, 2010-08-13 This book is the first to provide a cognitive analysis of the function of biological/medical metaphors in National Socialist racist ideology and their background in historical traditions of Western political theory. Its main arguments are that the metaphor of the German nation as a body that needed to be rescued from a deadly poison must be viewed as the conceptual basis rather than a mere propagandistic by-product of Nazi genocidal policies culminating in the Holocaust, and that this metaphor is closely related to the more general metaphor complex of the nation as a human body/person, which is deeply ingrained in Western political thought. The cognitive

approach is crucial to understanding the nature and the origins of this metaphor complex because it goes beyond the rhetorical level by analyzing the ideological and practical implications of the conceptual mapping body-state in detail. It provides an innovative perspective on the problem of how the Nazis managed to 'revive' a clichéd metaphor tradition to the point where it became a decisive factor in European and world history. Musolf reveals how such a perspective allows us to explain why the body-state metaphor continues to be attractive for use in contemporary political theories.

**Fascism and the Masses** Ishay Landa, 2018-01-17 Highlighting the mass nature of interwar European fascism has long become commonplace. Throughout the years, numerous critics have construed fascism as a phenomenon of mass society, perhaps the ultimate expression of mass politics. This study deconstructs this long-standing perception. It argues that the entwining of fascism with the masses is a remarkable transubstantiation of a movement which understood and presented itself as a militant rejection of the ideal of mass politics, and indeed of mass society and mass culture more broadly conceived. Thus, rather than massifying society, fascism was the culmination of a long effort on the part of the élites and the middle-classes to de-massify it. The perennially menacing mass – seen as plebeian and insubordinate – was to be drilled into submission, replaced by supposedly superior collective entities, such as the nation, the race, or the people. Focusing on Italian fascism and German National Socialism, but consulting fascist movements and individuals elsewhere in interwar Europe, the book incisively shows how fascism is best understood as ferociously resisting what Elias referred to as the civilizing process and what Marx termed the social individual. Fascism, notably, was a revolt against what Nietzsche described as the peaceful, middling and egalitarian Last Humans.

**Racialization and Religion** Nasar Meer, 2015-04-10 This volume locates the contemporary study of anti-Semitism and Islamophobia squarely within the fields of race and racism. As such, it challenges the extent to which discussion of the racialization of these minorities remains unrelated to each other, or is explored in distinct silos as a series of internal debates. By harnessing the explanatory power of long-established organizing concepts within the study of race and racism, this collection of articles makes a historically informed, theoretical and empirical contribution to aligning these analytical pursuits. The collection brings together a range of perspectives on this subject, including a comparison between Islamophobia in early modern Spain and twenty-first century Europe, an examination of the 'new anti-Semitism', and an analysis of online anti-Muslim and anti-Semitic jokes. This book was originally published as a special issue of *Ethnic and Racial Studies*.

**Atrocity, Deviance, and Submarine Warfare** Nachman Ben-Yehuda, 2013-08-08 In the early 20th century, the diesel-electric submarine made possible a new type of unrestricted naval warfare. Such brutal practices as targeting passenger, cargo, and hospital ships not only violated previous international agreements; they were targeted explicitly at civilians. A deviant form of warfare quickly became the norm. In *Atrocity, Deviance, and Submarine Warfare*, Nachman Ben-Yehuda recounts the evolution of submarine warfare, explains the nature of its deviance, documents its atrocities, and places these developments in the context of changing national identities and definitions of the ethical, at both social and individual levels. Introducing the concept of cultural cores, he traces the changes in cultural myths, collective memory, and the understanding of unconventionality and deviance prior to the outbreak of World War I. Significant changes in cultural cores, Ben-Yehuda concludes, permitted the rise of wartime atrocities at sea.

**The SAGE Handbook of Conflict Resolution** Jacob Bercovitch, Victor Kremenyuk, I William Zartman, 2008-12-03 'The SAGE Handbook of Conflict Resolution demonstrates the range of themes that constitute modern conflict resolution. It brings out its key issues, methods and dilemmas through original contributions by leading scholars in a dynamic and expanding field of inquiry. This handbook is exactly what it sets out to be: an indispensable tool for teaching, research and practice in conflict resolution' - Peter Wallensteen, Professor of Peace and Conflict Research, Uppsala University and University of Notre Dame 'Bercovitch, Kremenyuk and Zartman are among the most important figures in the conflict resolution field.'

They have pieced together, with the help of more than 35 colleagues from numerous countries, a state-of-the-art review of the sources of international conflict, available methods of conflict management, and the most difficult challenges facing the individuals and organizations trying to guide us through these conflict-ridden times. The collection is brimming with penetrating insights, trenchant analyses, compelling cases, and disciplined speculation. They help us understand both the promise of as well as the obstacles to theory-building in the new field of conflict resolution' - Lawrence Susskind, Professor and Director of the MIT - Harvard Public Disputes Program 'The last three sentences of this persuasive book: We conclude this volume more than ever convinced that conflict resolution is not just possible or desirable in the current international environment. It is absolutely necessary. Resolving conflicts and making peace is no longer an option; it is an intellectual and practical skill that we must all possess. If you are part of that we, intellectually or professionally, you will find this book a superb companion' - Thomas C Schelling, Professor Emeritus, Harvard University and University of Maryland Conflict resolution is one of the fastest-growing academic fields in the world today. Although it is a relatively young discipline, having emerged as a specialized field in the 1950's, it has rapidly grown into a self-contained, vibrant, interdisciplinary field. The SAGE Handbook of Conflict Resolution brings together all the conceptual, methodological and substantive elements of conflict resolution into one volume of over 35 specially commissioned chapters. The Handbook is designed to reflect where the field is today by drawing on the contributions of experts from different fields presenting, in a systematic way, the most recent research and practice. Jacob Bercovitch is Professor of International Relations, and Fellow of the Royal Society, at the University of Canterbury in Christchurch, New Zealand. Victor Kremenyuk is deputy director of the Institute for USA and Canada Studies, Russian Academy of Sciences, Moscow. He is also a research associate at IIASA. I. William Zartman is Jacob Blaustein Professor of Conflict Resolution and International Organization at the Nitze School of Advanced International Studies of Johns Hopkins University

Holocaust a History Deborah Dwork, Robert Jan Pelt, 2003-08-26 Unrivaled in scope, Holocaust is a story of all Europe, of the vast sweep of events in which this great atrocity was rooted, from the Middle Ages to the modern era.

*Entanglements of Modernity, Colonialism and Genocide* Jack Palmer, 2018-05-08 This book offers a novel sociological examination of the historical trajectories of Burundi and Rwanda. It challenges both the Eurocentric assumptions which have underpinned many sociological theorisations of modernity, and the notion that the processes of modernisation move gradually, if precariously, towards more peaceable forms of cohabitation within and between societies. Addressing these themes at critical historical junctures – precolonial, colonial and postcolonial – the book argues that the recent experiences of extremely violent social conflict in Burundi and Rwanda cannot be seen as an 'object apart' from the concerns of sociologists, as it is commonly presented. Instead, these experiences are situated within a specific route to and through modernity, one 'entangled' with Western modernity. A contribution to an emerging global historical sociology, *Entanglements of Modernity, Colonialism and Genocide* will appeal to scholars of sociology and social theory with interests in postcolonialism, historical sociology, multiple modernities and genocide.

**Understanding Willing Participants, Volume 2** Nestor Russell, 2018-12-27 Horrified by the Holocaust, social psychologist Stanley Milgram wondered if he could recreate the Holocaust in the laboratory setting. Unabated for more than half a century, his (in)famous results have continued to intrigue scholars. Based on unpublished archival data from Milgram's personal collection, volume one of this two-volume set introduces readers to a behind the scenes account showing how during Milgram's unpublished pilot studies he step-by-step invented his official experimental procedure—how he gradually learnt to transform most ordinary people into willing inflictors of harm. The open access volume two then illustrates how certain innovators within the Nazi regime used the very same Milgram-like learning techniques that with increasing effectiveness gradually enabled them to also transform most ordinary people into increasingly capable executioners of other men, women, and children. Volume two

effectively attempts to capture how step-by-step these Nazi innovators attempted to transform the Führer's wish of a Jewish-free Europe into a frightening reality. By the books' end the reader will gain an insight into how the seemingly undoable can become increasingly doable.

The Handbook of Stress Science Andrew Baum, PhD, Richard Contrada, PhD, 2010-09-29 [F]or those who are entering the field or who want to broaden their perspective, I believe that this Handbook is indispensable. More than just a contribution to the field, the Handbook may well become a classic.--PsychCRITIQUES The editors fully achieved their goal of producing a state-of-the-science stress reference for use by investigators, educators, and practitioners with clinical and health interests.--Psycho-Oncology This is an important book about the scientific study of stress and human adaptation. It brings together both empirical data and theoretical developments that address the fundamental question of how psychosocial variables get inside the body to influence neurobiological processes that culminate in physical disease. From the Foreword by David C. Glass, PhD Emeritus Professor of Psychology Stony Brook University Edited by two leading health psychologists, The Handbook of Stress Science presents a detailed overview of key topics in stress and health psychology. With discussions on how stress influences physical health-including its effects on the nervous, endocrine, cardiovascular, and immune systems-the text is a valuable source for health psychologists, as well as researchers in behavioral medicine, neuroscience, genetics, clinical and social psychology, sociology, and public health. This state-of-the-art resource reviews conceptual developments, empirical findings, clinical applications, and investigative strategies and tools from the past few decades of stress research. It represents all major approaches to defining stress and describes the themes and developments that characterize the field of health-related stress research. The five sections of this handbook cover: Current knowledge regarding the major biological structures and systems that are involved in the stress response Social-contextual contributions to stress and to processes of adaptation to stress, including the workplace, socioeconomic status, and social support The concept of cognitive appraisal as it relates to stress and emotion psychological factors influencing stress such as, personality, gender, and adult development The evidence linking stress to health-related behaviors and mental and physical health outcomes Research methods, tools, and strategies, including the principles and techniques of both laboratory experimentation and naturalistic stress research

*Reflections on the Holocaust* Wolfgang Mieder, David Scrase, 2001 Contains 12 essays on the Holocaust, but does not have a biography or bibliography of Hilberg.

**IDisorder: Understanding Our Obsession with Technology and Overcoming Its Hold on Us** Larry D. Rosen, 2013-08-06 A technology and psychology expert looks at the stress and illness that results from a smartphone, iPad, and iTouch driving users to distraction and offers solutions.

**Handbook of Women, Stress and Trauma** Kathleen A. Kendall-Tackett, 2013-01-11 The Handbook of Women, Stress and Trauma focuses on the stresses and traumas that are unique to the lives of women. It is the first text to merge research from the fields of trauma and women's health and development. Using a lifespan developmental approach, the text begins by addressing specific issues women face in their lives, drawing upon theories of development and exploring how women's relationships with others buffer - or sometimes cause - stress and trauma. Combining aspects of female development with empirical data from the fields of women's health, family violence and stress and coping, this volume helps sensitive care providers to the specific needs of women exposed to traumatic events.
