Famous Women Giovanni Boccaccio, 2003 Giovanni Boccaccio devoted the last decades of his life to compiling encyclopedic works in Latin. Among them is this text, the first collection of biographies in Western literature devoted to women.

Animal production and animal science worldwide A. Rosati, A. Tewolde, C. Mosconi, 2023-08-28 In this third volume of the successful Book of the Year series, produced by the World Association for Animal Production (WAAP) specialists in animal science inform you about the developments in the past year in livestock systems worldwide. The best authors available are chosen to express their competence and expertise on all the aspects considered relevant in each specific field of animal science. This volume, like its predecessors, is based on four sections. The first describes livestock industry and relative research developments in the geographical continents. The second includes efforts to describe the development of research in every discipline within the large ambit of animal science. The third section contains interesting articles on 'free subjects', of large interest for readers such as 'Science and Policy in Risk Assessment of Transgenic Animals', 'The impact of nano-scale technologies in animal management', 'New developments in amino acid research', etc. The last section presents detailed statistics of high relevance in animal industry. This book is generally recognized as one of the very few practical resources of comprehensive statistical information related to animal industry. The Book of the Year series is intended for libraries that wish to offer their readers high-quality, updated information. At the same time, this series is an indispensable resource for scientists, policy makers and scientific writers who wish to enhance their proficiency in their field. It provides a very current, complete picture of the animal industry and livestock science worldwide.

Pharmacy and the US Health Care System Michael Ira Smith, Albert I. Wertheimer, Jack E. Fincham, 2013 Pharmacy and the US Healthcare System is a one-stop textbook of current information about the features of the US healthcare system. It covers the personnel and institutions, along with concise reports on trends, regulations policy and finance. This new fourth edition has been updated with the most recent data, statistics and developments. It includes up-to-date information on many topics including financing, managed care pharmacy, political realities, and health information technology. There are new chapters on patient safety, pharmacovigilance, and ethics and professionalism. The healthcare field is evolving due to technological advances, pressure to increase efficiency and demand to increase costs. Pharmacy and the US Healthcare System prepares pharmacists for independent practice in this unpredictable environment.

Value of Innovation Irina Farquhar, Kent Summers, Alan L. Sorkin, 2007-11-01 Investigates the impact of information technology, biogenetic, and pharmacological innovation on individuals quality of life, safety, individual and system health care utilization, occupational and environmental health and formulary decision making, and costs.

The Rise of English Rosemary C. Salomone, 2022 A sweeping account of the global rise of English and the high-stakes politics of language Spoken by a quarter of the world's population, English is today's lingua franca - its common tongue. The language of business, popular media, and international politics, English has become commodified for its economic value and increasingly detached from any particular nation. This meteoric rise of English has many obvious benefits to communication. Tourists can travel abroad with greater ease. Political leaders can directly engage their counterparts. Researchers can collaborate with foreign colleagues. Business interests can flourish in the global economy. But the rise of English has very real downsides as well. In Europe, imperatives of political integration and job mobility compete with pride in national language and heritage. In the United States and England, English isolates us from the cultural and economic benefits of speaking other languages. And in countries like India, South Africa, Morocco, and Rwanda, it has stratified society along lines of English proficiency. In *The Rise of English*, Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far-reaching effects it has on global and local politics, economics, media, education, and business.

From the inner workings of the European Union to linguistic battles over influence in Africa, Salomone draws on a wealth of research to tell the complex story of English - and, ultimately, to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders.

Health Care Regulation in America Robert I. Field, 2007 Regulation shapes all aspects of America's fragmented health care industry. While the health and lives of patients as well as almost one-sixth of the national economy depend on its effectiveness, health care regulation in America is bewilderingly complex. 'Health Care Regulation in America' is a guide to this regulatory maze.

Perspectives on Multimodality Eija Ventola, Cassily Charles, Martin Kaltenbacher, 2004-01-01 This volume sign posts several paths of multimodality research and theory-building today. The chapters represent a cross-section of current perspectives on multimodal discourse with a special focus on theoretical and methodological issues (mode hierarchies, modelling semiotic resources as multiple semiotic systems, multimodal corpus annotation). In addition, it discusses a wide range of applications for multimodal description in fields like mathematics, entertainment, education, museum design, medicine and translation.

Clinical Dermatology Trials 101 Adnan Nasir, 2014-11-12 Clinical Dermatology Trials 101 provides dermatologists with a handbook that allows them to become familiar with all aspects of clinical trials. Everything from obtaining the necessary tools and equipment, complying with local, federal, and international guidelines and regulations, and hiring and training staff for the safe and up-to-date conduct of dermatology clinical trials is covered. Written by leading experts in the field, Clinical Dermatology Trials 101 is the only clinical trial how-to available for dermatologists. With skin disease affecting nearly seventy percent of the population over a lifetime, and the rate of development of new drugs and devices for dermatologic use increasing at an exponential rate, there is a tremendous need for training and developing dermatology clinical research facilities to expedite the translation of basic and applied research, from bench to bedside. This is useful for practicing dermatologists, academic dermatologists, dermatology residents, clinical research fellows, dermatology fellows, research scientists, industry dermatologists, and medical students.

Safeguards in a World of Ambient Intelligence David Wright, Serge Gutwirth, Michael Friedewald, Elena Vildjiounaite, Yves Punie, 2008-01-08 Copy the following link for free access to the first chapter of this title: <http://www.springerlink.com/content/j23468h304310755/fulltext.pdf> This book is a warning. It aims to warn policy-makers, industry, academia, civil society organisations, the media and the public about the threats and vulnerabilities facing our privacy, identity, trust, security and inclusion in the rapidly approaching world of ambient intelligence (Aml). In the near future, every manufactured product - our clothes, money, appliances, the paint on our walls, the carpets on our floors, our cars, everything - will be embedded with intelligence, networks of tiny sensors and actuators, which some have termed "smart dust". The Aml world is not far off. We already have surveillance systems, biometrics, personal communicators, machine learning and more. Aml will provide personalised services - and know more about us - on a scale dwarfing anything hitherto available. In the Aml vision, ubiquitous computing, communications and interfaces converge and adapt to the user. Aml promises greater user-friendliness in an environment capable of recognising and responding to the presence of different individuals in a seamless, unobtrusive and often invisible way. While most stakeholders paint the promise of Aml in sunny colours, there is a dark side to Aml. This book aims to illustrate the threats and vulnerabilities by means of four "dark scenarios". The authors set out a structured methodology for analysing the four scenarios, and then identify safeguards to counter the foreseen threats and vulnerabilities. They make recommendations to policy-makers and other stakeholders about what they can do to maximise the benefits from ambient intelligence and minimise the negative consequences.

Counseling Children and Adolescents Rebekah Byrd, Chad Luke, 2020-12-21 Counseling Children and Adolescents focuses on relationship building and creating a deep level of understanding of developmental, attachment, and brain-based information. Chapters place a clear emphasis on building

strengths and developing empathy, awareness, and skills. By going beyond theory, and offering a strengths-based, attachment, neuro- and trauma-informed perspective, this text offers real-world situations and tried and true techniques for working with children and adolescents. Grounded in research and multicultural competency, the book focuses on encouragement, recognizing resiliency, and empowerment. This book is an ideal guide for counselors looking for developmentally appropriate strategies to empower children and adolescents.

Ecology and Management of Terrestrial Vertebrate Invasive Species in the United States William C. Pitt, James Beasley, Gary W. Witmer, 2017-10-25 Vertebrate invasive species are important ecologically, socially, and scientifically throughout much of the globe. However, the interdiction and options for management of invasive species are driven by localized regulation at the country or even state level and thus the management of species must be framed within that context. This book is focused around the management of invasive vertebrate species in the United States, although readers will find much of the material broadly applicable to invasive species in other regions. Vertebrate invasive species cause damage to agriculture, property, natural resources, and threaten human health and safety. However, most of these species occur in the United States resulting from human-mediated activities, often being released intentionally. For the first time, the wealth of scientific information about vertebrate invasive species in the United States is summarized and synthesized in a single volume to be easily accessible to ecologists and natural resource managers. With a focus on prominent terrestrial invasive species that have a history of policy and management and highlighting contemporary issues and management, this book consists of 18 chapters written by experts from across the United States. The first section of the book focuses on overarching policy and management topics associated with vertebrate invasive species; including biosecurity threats and risk assessment, policy and regulation, and the economics of their management. The second section provides in-depth reviews of noteworthy invasive mammals, birds, amphibians, and reptiles. After finishing this book, the reader should understand the complexity of managing invasive species, the unique challenges that each new species may present, and the steps forward that may decrease the impact of these species on the environment, human health, and the economy.

Twenty-Nine, Let's Go Joseph H. Ewing, 2018-12-01 The 29th Infantry was on the front lines on D-Day, Battle of Normandy, and was the first division to cross the Elbe into Germany. When, on January 17, 1946, the 29th Infantry Division was deactivated, 28,776 soldiers had been killed, wounded, taken prisoner or missing. In September 1944, Joseph H. Ewing joined the famed 29th Infantry Division of the Maryland-Virginia National Guard as the unit was readying to storm the port city of Brest, France. In Germany, he led his rifle platoon in making an assault crossing of the Roer River at Julich, which led to the division's drive on Munchen-Gladbach. During quiet periods on the Roer, Col. Ewing typed and edited a newspaper he titled Chin Strap. The scant-copy newspaper was circulated within the company and also caught the eye of battalion headquarters. The publication earned Col. Ewing the nicknames "Strap" and "The Strap." At the end of World War II, Col. Ewing was assigned to Fort Meade and the War Department Historical Division in the Pentagon, and decided to author the official history of the 29th Division in World War II. This fascinating account of the division's wartime history is the result of Col. Ewing's combat experience and civilian career in journalism.

Neotropical Endophytic Fungi Luiz Henrique Rosa, 2021-04-14 This pioneering book focuses on Neotropical endophytic fungi, providing a comprehensive overview of their diversity, ecology, and biotechnological applications in medicine, agriculture, and industry. Despite their rich diversity, the endophytic fungi associated with plants of Central and South American biomes remain largely unknown. The book addresses that knowledge gap by offering insights into Neotropical endophytic fungal community.

Destination Normandy G. H. Bennett, 2009-04-20 A cross-section of the American experience on D-Day Unique perspective from the regimental level that also integrates strategic and tactical considerations Stories of largely forgotten acts of valor G. H. Bennett collects oral histories from the soldiers of three American regiments and weaves them into an intimate account of the D-Day invasion of June 6, 1944. Widely scattered during its drop

into Normandy, the 507th Parachute Infantry Regiment (82nd Airborne Division) stopped the advance of an SS division. The untested 116th Infantry Regiment (29th Infantry Division) landed on bloody Omaha Beach, where it suffered more casualties than any other regiment that day. Meanwhile, the 22nd Infantry Regiment (4th Infantry Division) easily waded ashore on Utah Beach but faced savage fighting as it moved inland.

They Walk Among Us Benjamin Fitton, Rosanna Fitton, 2019-05-30 A Chilling Casebook of Horrifying Hometown Crimes How well do you really know your friends? Neighbours, friends, doctors and colleagues. We see them every day. We trust them implicitly. But what about the British army sergeant who sabotaged his wife's parachute? Or the lodger who took his landlady on a picnic from which she never returned? From dentists to PAs, these normal-seeming people were quietly wrecking lives, and nobody suspected a thing. In this first book from the addictive award-winning podcast They Walk Among Us, Benjamin and Rosanna serve up small-town stories in gripping detail. They've hooked millions of listeners with their intricate and disturbing cases, and now they dig into ten more tales, to provide an unforgettably sinister true-crime experience, scarily close to home. It could happen to you.

LC-MS/MS in Proteomics Pedro R. Cutillas, John F. Timms, 2011-04-06 With the development of new quantitative strategies and powerful bioinformatics tools to cope with the analysis of the large amounts of data generated in proteomics experiments, liquid chromatography with tandem mass spectrometry (LC-MS/MS) is making possible the analysis of proteins on a global scale, meaning that proteomics can now start competing with cDNA microarrays for the analysis of whole genomes. In LC-MS/MS in Proteomics: Methods and Applications, experts in the field provide protocols and up-to-date reviews of the applications of LC-MS/MS, with a particular focus on MS-based methods of protein and peptide quantification and the analysis of post-translational modifications. Beginning with overviews of the use of LC-MS/MS in protein analysis, the book continues with topics such as protocols for the analysis of post-translational modifications, with particular focus on phosphorylation and glycosylation, popular techniques for quantitative proteomics, such as multiple reaction monitoring, metabolic labelling, and chemical tagging, biomarker discovery in biological fluids, as well as novel applications of LC-MS/MS. Written in the highly successful Methods in Molecular Biology™ series format, chapters include introductions to their respective subjects, lists of necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and notes on troubleshooting and avoiding known pitfalls. Comprehensive and cutting-edge, LC-MS/MS in Proteomics: Methods and Applications presents the techniques and concepts necessary in order to aid proteomic practitioners in the application of LC-MS/MS to essentially any biological problem.

Integriertes Roadmapping Siegfried Behrendt, 2010-03-17 Angesichts dynamischer Umfeldbedingungen gewinnt das Monitoring technologischer, wirtschaftlicher, politischer und gesellschaftlicher Entwicklungen für den Innovationserfolg von Unternehmen an Bedeutung. Der Autor geht der Frage nach, wie Nachhaltigkeitsanforderungen frühzeitig in Innovationsprozesse einbezogen werden können. Das Konzept der Integrierten Technologie-Roadmap rückt die Anwendersicht in den Mittelpunkt und macht es möglich, mehrere Dimensionen zukunftsfähigen Wirtschaftens in dynamischen Technologiefeldern simultan zu betrachten.
