Blind Conscience Margot O'Neill, 2008 Mandatory detention of asylum-seekers has been a prominent public issue for almost a decade. It has created an industry, provoked shame and anger across society, been manipulated politically by all sides and has prompted many to become actively involved in campaigns in support of asylum-seekers. The government's recent response to the crisis precipitated by the arrival of the West Papuans and the widespread protest that followed show that the refugee crisis is not over. Nevertheless the prospects for incarcerated asylum-seekers have improved markedly since the intervention of Petro Georgeiou and other federal Liberal backbenchers. This shift and the time that has passed since the Tampa incident, children overboard and near saturation coverage of individual asylum-seekers provide the opportunity for some reflection. Margot O'Neill has covered many angles of the story herself, but writes now about the way Australian society at large was affected. She uses individuals - activists, psychiatrists, lawyers, politicians, prison guards - with direct experience to tell the broader story. This gives the book a strong narrative drive and a powerful emotional charge.--Provided by publisher.

Teaching Materials and the Roles of EFL/ESL Teachers Ian McGrath, 2013-03-14 Teaching Materials and the Roles of EFL/ESL Teachers is published amidst a decade long increase in academic publications and training courses concerned with the evaluation and design of English language teaching materials. It is timely to consider what effect the advice on offer has had on teachers' practice. Are teachers evaluating materials carefully, using textbooks in the ways expected by textbook writers, developing their own materials, and mediating between materials and learners in the ways advised in the professional literature? The book explores these issues from a variety of perspectives. The views of publishers/textbook writers, those contributing to the professional

literature, and teacher educators are synthesised to establish a 'theory' of how teachers can best fulfil their roles vis-à-vis materials and learners. This is then compared with 'practice', as represented by published accounts of teachers' actual practices and learners' perspectives. The conclusion reached is that teacher education in materials evaluation and design is essential and suggestions are offered as to the form this might take. The book is intended particularly for MA students and teacher educators concerned with materials evaluation and design, but is of interest to all those concerned with the publication and use of English language teaching materials.

Terrorism 101 Leon Newton, 2006 This book is a Must for Libraries Reference Sections Today's terrorists are often part of a global network of highly sophisticated, methodical, comprehensive, well funded terrorist organizations whose perversions of their faiths allow them to justify even the most heinous of acts. It stands to reason that our response must likewise be global, sophisticated, methodical, comprehensive and well funded. We have at our disposal an arsenal of the finest, most powerful weapons available to fight terrorism. Not bombs and bullets, but people: experts in diplomacy, intelligence gathering, computers, anthropology, economics, communications, crisis management, arbitration, languages, foreign relations, and dozens of other fields that can contribute to the all-important task of identifying, stopping and preventing terrorism. If there were a right answer to how best to deal with global terrorism, surely we would have found it by now. But just as surely, finding the solution must lie in asking the right questions.

Gulf War Nurses Patricia Rushton, 2014-01-10 Since the pioneering work of nineteenth-century nurses such as Florence Nightingale, Dorothea Dix and Clara Barton, professional nurses have been involved in caring for the sick and wounded in combat situations. This book contains the accounts of 14 nurses who served in the U.S. military nurse corps during the Persian Gulf and Iraq wars. These

men and women describe how they found themselves serving during wartime, the soldiers they cared for, the professionals they worked with and the impact they made in their patients' lives. These varied accounts attest to the tremendous impact this profession has on the lives of individual soldiers and the health of armies at large.

Iranian Weapons of Mass Destruction Adam C. Seitz, Anthony H. Cordesman, 2009-09-03 This book provides an in-depth examination of the serious security implications that Iran's nuclear program has on a region that is already plagued by insecurity and conflict. *Iranian Weapons of Mass Destruction: The Birth of a Regional Nuclear Arms Race?* is an expert insider's look at Iran's current and potential ability to wage both conventional and asymmetrical warfare, and the options available for dealing with a nuclear Iran. Are we on the brink of a regional nuclear arms race in the Middle East? In this urgent volume, Anthony Cordesman and Adam Seitz examine how Iran's nuclear ambitions have already altered security policy for the United States, Iran's neighbors, and the international community. Cordesman and Seitz address the full range of issues related to Iran's quest for nuclear weapons, including its emphasis on medium- and long-range missiles, the decline of Iran's conventional military capabilities, and continued Iranian efforts to undercut the spread of democracy in the region.

The Sultan's Communists Alma Rachel Heckman, 2020-11-24 *The Sultan's Communists* uncovers the history of Jewish radical involvement in Morocco's national liberation project and examines how Moroccan Jews envisioned themselves participating as citizens in a newly-independent

Morocco. Closely following the lives of five prominent Moroccan Jewish Communists (Léon René Sultan, Edmond Amran El Maleh, Abraham Serfaty, Simon Lévy, and Sion Assidon), Alma Rachel Heckman describes how Moroccan Communist Jews fit within the story of mass Jewish exodus from Morocco in the 1950s and '60s, and how they survived oppressive post-independence authoritarian rule under the Moroccan monarchy to ultimately become heroic emblems of state-sponsored Muslim-Jewish tolerance. The figures at the center of Heckman's narrative stood at the intersection of colonialism, Arab nationalism, and Zionism. Their stories unfolded in a country that, upon independence from France and Spain in 1956, allied itself with the United States (and, more quietly, Israel) during the Cold War, while attempting to claim a place for itself within the fraught politics of the post-independence Arab world. The Sultan's Communists contributes to the growing literature on Jews in the modern Middle East and provides a new history of twentieth-century Jewish Morocco.

SULTAN'S COMPASSION Ahmet Sait Kutgul, Few years ago , while the President of Ireland was visiting Turkey; she brought a gift to the Turkish President as a remembrance of the Ottoman aids sent by Ottoman's by ships. Then I decided to study and research this topic. However the archival sources showed me that the documents about Ireland were not limited with the Ottoman aid. There are great number of archival documents available on Ireland. This work includes the following subtitles: A Brief Look to the History of Ireland; a Political Survey of the Ottoman Empire; In the Nineteenth Century; the Triangle: Ireland, England and the Ottoman Empire; "Irish Question" In the Ottoman Archives

China and the Persian Gulf Dr. Mordechai Chaziza,2019-11-14 Since China announced the Belt and Road Initiative (BRI) in 2013, the Gulf States have regarded it as a means for diversifying their national economies in order to reduce dependence on oil revenues and to achieve their national development strategy. The Persian Gulf region has a significant role in the successful implementation of BRI. Emerging strategic, diplomatic and financial partnerships will enable China to control the flow of its exports to world markets. The BRI has five major goals: Policy coordination, facilities connectivity, free trade, financial integration, and people-to-people bonds. Facilities connectivity, which focuses on transportation and energy infrastructure, is the initiatives priority. The integration between the national development plans of Gulf monarchies, the economic reconstruction plans of Iraq and Iran, and the new economic goals of Saudi Arabia, with Chinas Belt and Road vision have converged to bring forward opportunities. The implementation of the new Silk Road strategy will unleash a regional infrastructure boom by connecting China with Asia, Europe, and Africa by land and sea, boosting renminbi internationalization. Nevertheless, there are challenges that could complicate the envisaged bilateral partnerships. Saudi Arabia: The strategic synergy between the BRI and Saudi Vision 2030 has forged a joint economic development path, but external conflicts (Yemen, Iran) could derail plans. Iran: While Tehran has a special geographical status in West Asia, Washingtons decision to withdraw from the Iran nuclear agreement might create Sino-Iranian trade barriers. The UAE: In July 2018 bilateral relations were elevated to a comprehensive strategic partnership. The synergy between the BRI and UAE Vision 2021 is multifaceted trade, energy, infrastructure and logistics, financial services, military ties, tourism and cultural cooperation but very complex. Most of the Gulf

States are governed by monarchies, are at the primary stage of industrialization, and are susceptible to US and European influence. The challenges Chinas ascendancy poses for the US, and the inevitable geopolitical fight back, in conjunction with Gulf regional turbulence, mean that the BRI project will face substantive challenges in the years ahead.

Sources of Power Manfred Weissenbacher, 2009-09-30 A landmark book rolls out a bold, new, energy-based theory of human history based on a simple, yet powerful law: whoever controls the world's effective energy supplies during a given energy age will inevitably dominate the economic, political, and cultural history of that age. The innovative theory articulated in *Sources of Power: How Energy Forges Human History* parses history into four ages: the foraging, agriculture, coal, and oil ages, each defined by the dominant source of power. Manfred Weissenbacher tests this sweeping theory against the panorama of world history, combining formidable powers of synthesis with a specialist's deep understanding of energy systems and technologies. After proving the operation of his law through history and into the present, Weissenbacher applies it to global geopolitical trends. He assesses the prospects of the various candidate technologies to succeed oil and charts future scenarios based on the distribution of energy reserves. Finally, he forecasts the fates of the American and Chinese empires in the twilight of the oil age: the United States as a mature superpower forced to deploy military might to occupy oilfields in the Middle East; China as an emerging superpower forced to deploy economic might to muscle in on the development of Third World oilfields.

Oman Reborn Linda Pappas Funsch, 2015-12-29 The Sultanate of Oman is one of the few good news stories to have emerged from the Middle East in recent memory. This book traces the narrative of a little-known and relatively stable Arab country whose history of independence, legacy of

interaction with diverse cultures, and enlightened modern leadership have transformed it in less than fifty years from an isolated medieval-style potentate to a stable, dynamic, and largely optimistic country. At the heart of this fascinating story is Oman's sultan, Qaboos bin Sa'id, friend to both East and West, whose unique leadership style has resulted in both domestic and foreign policy achievements during more than four decades in office. Exploring Oman from a historical perspective, Funsch examines how the country's unique blend of tradition and modernization has enabled it to succeed while others in the region have failed. Accounts of the author's own experiences with Oman's transformation add rich layers of depth, texture, and personality to the narrative.

Armed groups: Studies in National Security, Counterterrorism, and Counterinsurgency , Product Description: Discussion of armed groups which are considered to include classic insurgents, terrorists, guerrillas, militias, police agencies, criminal organizations, war-lords, privatized military organizations, mercenaries, pirates, drug cartels, apocalyptic religious extremists, orchestrated rioters and mobs, and tribal factions. To study armed groups use of history, political science, anthropology, sociology, theology, and economics are traditional areas of research. The book also delves into matters of ethics, technology, intelligence, education, the law, diplomacy, military science, and even mythology. The book is divided into five sections: History and armed groups, Present context and environment, Religion and inspiration, thinking differently about armed groups, the shape of things to come.

The Fire Below Robert Bruce Ware, 2013-05-13 This groundbreaking work examines the complex dynamics of Russia's relations with the Caucasus, revealing the profound effects that Caucasian forces have had upon Russia's development. Essays show how Georgian sparks ignited conflagrations in South Ossetia (1991-1992) and Abkhazia (1992-1993), spreading northward to conflicts in Ossetia and Ingushetia (1992) and Chechnya (1994-1996). Combined with jihadist influences that entered

from the South and East by way of Dagestan, these events culminated in the second Russo-Chechen war (1999-2009). Chechnya transformed both the Russian military and the presidency of Vladimir Putin. Beginning in 2000, Putin's Chechenization strategy had unforeseen and controversial results for the entire Russian Federation. These ironies are elucidated in case studies of the Stavropol region, the Sochi Olympics, the Pussy Riot conviction, and Russia's efforts to reintegrate religion with politics against the backdrop of an emerging Islamic "inner abroad." Neither Russia nor the Caucasus can be understood without an appreciation of their uneasy interconnection and its explosive consequences.
