The hidden world part 2 John Baselmans,2015-05-24 Through these two books I want to show you as much as possible the completely blueprint where I've worked on for years. It's my library, a collection from which I work, and the many documents that I now use as evidence. This book is a collection of quotations from many books, magazines, newspapers, internet documents and reports from others. Therefore I see this book as a manual / reference book for those interested. It's important to me that finally there is a book where everything that is concealed for us for centuries, is at a glance. What you do with the information and how much it is worth to you to know these things is up to you. Here I simply put those pieces that in my eyes came closest to the truth, and which fitted together like a puzzle. The past has big secrets which still are carefully concealed in the present. By putting the many citations and articles at a glance we see a strong message: Wake up people.

Networked Publics and Digital Contention Mohamed Zayani,2015-08-03 How is the adoption of digital media in the Arab world affecting the relationship between the state and its subjects? What new forms of online engagement and strategies of resistance have emerged from the aspirations of digitally empowered citizens in the Middle East and North Africa? Networked Publics and Digital Contention narrates the story of the co-evolution of technology and society in Tunisia, the birthplace of the Arab uprisings. It explores the emergence of a digital culture of contention that helped networked publics negotiate their lived reality, reconfigure power relations, and ultimately redefine the locus of politics. It broadens the focus from narrow debates about the role that social media played in the Arab uprisings toward a fresh understanding of how changes in media affect the state-society relationship over time. Based on extensive fieldwork, in-depth interviews with Internet activists, and immersive analyses of online communication, this book draws our attention away from the tools of political communication and refocuses it on the politics of communication. An original contribution to the political sociology of media, Networked Publics and Digital Contention provides a unique perspective on how networked Arab publics reimagine citizenship, reinvent politics, and produce change.

Taiwan and International Human Rights Jerome A. Cohen,William P. Alford,Chang-fa Lo,2019-05-16 This book tells a story of Taiwan's transformation from an authoritarian regime to a democratic system where human rights are protected as required by international human rights treaties. There were difficult times for human rights protection during the martial law era; however, there has also been remarkable transformation progress in human rights protection thereafter. The book reflects the transformation in Taiwan and elaborates whether or not it is facilitated or hampered by its Confucian tradition. There are a number of institutional arrangements, including the Constitutional Court, the Control Yuan, and the yet-to-be-created National Human Rights Commission, which could play or have already played certain key roles in human rights protections. Taiwan's voluntarily acceptance of human rights treaties through its implementation legislation and through the Constitutional Court's introduction of such treaties into its constitutional interpretation are also fully expounded in the book. Taiwan's NGOs are very active and have played critical roles in enhancing human rights practices. In the areas of civil and political rights, difficult human rights issues concerning the death penalty remain unresolved. But regarding the rights and freedoms in the spheres of personal liberty, expression, privacy, and fair trial (including lay participation in

criminal trials), there are in-depth discussions on the respective developments in Taiwan that readers will find interesting. In the areas of economic, social, and cultural rights, the focuses of the book are on the achievements as well as the problems in the realization of the rights to health, a clean environment, adequate housing, and food. The protections of vulnerable groups, including indigenous people, women, LGBT (lesbian, gay, bisexual, and transgender) individuals, the disabled, and foreigners in Taiwan, are also the areas where Taiwan has made recognizable achievements, but still encounters problems. The comprehensive coverage of this book should be able to give readers a well-rounded picture of Taiwan's human rights performance. Readers will find appealing the story of the effort to achieve high standards of human rights protection in a jurisdiction barred from joining international human rights conventions. This book won the American Society of International Law 2021 Certificate of Merit in a Specialized Area of International Law.

The World of Positive Energy John Baselmans,2009-08-27 This book opens the world behind the world in which we live. It is not what we see but what we do, how we live and act. It's about an energy that is easy to pick up and use: It is merely a matter of believing. This book helps you retrieve what you have lost. It will guide you back onto the right track. By reading this book, you may be able to see the 'big picture' of your life. Your eyes will be opened and you will see that everything you need is free and right there. The world of energy will make a decisive difference for your future life. We expect technology, science and computers to give us a good, pleasant and healthy life. But in spite of all our knowledge, we are moving away from our 'core'. The connection with our core is fading. We appear blind and totally dependent on a system. A system that is completely lost. An introduction with a wink to the new world.

Drugs John Baselmans,2016-12-06 When we think of drugs, we immediately think of the old guard drugs like cocaine, heroin and hemp. Other than that, there are for some time synthetic drugs (XTC) made in many forms, colors and effects. We talk in this book about the ordinary old-fashioned drugs in the form of cocaine. We are going to expose what is behind and who are the true drug dealers. The old-fashioned drug is still the trade with which the super rich enrich themselves. Also, it is the elite who use a lot of this stuff. You can make it clear that most of the top in the business world, but also the politics and those who move into higher layers, are the permanent users of the cocaine stuff. Often in the most pure form and often used daily like a breakfast and dinner. But first I like to elaborate some things; what is cocaine and who are the driving forces behind these drugs according to world organizations of detecting drugs. Let's talk about drugs.

Access Denied Ronald Deibert,John Palfrey,Rafal Rohozinski,Jonathan Zittrain,2008-01-25 A study of Internet blocking and filtering around the world: analyses by leading researchers and survey results that document filtering practices in dozens of countries. Many countries around the world block or filter Internet content, denying access to information that they deem too sensitive for ordinary citizens—most often about politics, but sometimes relating to sexuality, culture, or religion. Access Denied documents and analyzes Internet filtering practices in more than three dozen countries, offering the first rigorously conducted study of an accelerating trend. Internet filtering takes place in more than three dozen states worldwide, including many countries in Asia, the Middle East, and North Africa. Related Internet content-control mechanisms are also in place in Canada, the United States and a cluster of countries in Europe. Drawing on a just-completed survey of global Internet filtering undertaken by the OpenNet Initiative (a collaboration of the Berkman Center for Internet and Society at Harvard Law School, the Citizen Lab at the University of Toronto, the Oxford Internet Institute at Oxford University, and the University of Cambridge) and relying on work by regional experts and an extensive network

of researchers, *Access Denied* examines the political, legal, social, and cultural contexts of Internet filtering in these states from a variety of perspectives. Chapters discuss the mechanisms and politics of Internet filtering, the strengths and limitations of the technology that powers it, the relevance of international law, ethical considerations for corporations that supply states with the tools for blocking and filtering, and the implications of Internet filtering for activist communities that increasingly rely on Internet technologies for communicating their missions. Reports on Internet content regulation in forty different countries follow, with each two-page country profile outlining the types of content blocked by category and documenting key findings. Contributors Ross Anderson, Malcolm Birdling, Ronald Deibert, Robert Faris, Vesselina Haralampieva [as per Rob Faris], Steven Murdoch, Helmi Noman, John Palfrey, Rafal Rohozinski, Mary Rundle, Nart Villeneuve, Stephanie Wang, Jonathan Zittrain

Border Walls Reece Jones, 2012-07-12 *** Winner of the 2013 Julian Minghi Outstanding Research Award presented at the American Association of Geographers annual meeting *** Two decades after the fall of the Berlin Wall, why are leading democracies like the United States, India, and Israel building massive walls and fences on their borders? Despite predictions of a borderless world through globalization, these three countries alone have built an astonishing total of 5,700 kilometers of security barriers. In this groundbreaking work, Reece Jones analyzes how these controversial border security projects were justified in their respective countries, what consequences these physical barriers have on the lives of those living in these newly securitized spaces, and what long-term effects the hardening of political borders will have in these societies and globally. *Border Walls* is a bold, important intervention that demonstrates that the exclusion and violence necessary to secure the borders of the modern state often undermine the very ideals of freedom and democracy the barriers are meant to protect.

The Migration of Power and North-South Inequalities E. Paoletti, 2010-11-17 This book examines negotiations on migration in the Mediterranean. It argues that migration is a bargaining chip which countries in the South use to increase their leverage versus their counterparts in the North. This proposition opens up new understandings reframing relations of inequalities among states.

Statistical Inference via Data Science: A Modern Dive into R and the Tidyverse Chester Ismay, Albert Y. Kim, 2019-12-23 Statistical Inference via Data

Science: A ModernDive into R and the Tidyverse provides a pathway for learning about statistical inference using data science tools widely used in industry, academia, and government. It introduces the tidyverse suite of R packages, including the ggplot2 package for data visualization, and the dplyr package for data wrangling. After equipping readers with just enough of these data science tools to perform effective exploratory data analyses, the book covers traditional introductory statistics topics like confidence intervals, hypothesis testing, and multiple regression modeling, while focusing on visualization throughout. Features: ● Assumes minimal prerequisites, notably, no prior calculus nor coding experience ● Motivates theory using real-world data, including all domestic flights leaving New York City in 2013, the Gapminder project, and the data journalism website, FiveThirtyEight.com ● Centers on simulation-based approaches to statistical inference rather than mathematical formulas ● Uses the infer package for tidy and transparent statistical inference to construct confidence intervals and conduct hypothesis tests via the bootstrap and permutation methods ● Provides all code and output embedded directly in the text; also available in the online version at moderndive.com This book is intended for individuals who would like to simultaneously start developing their data science toolbox and start learning about the inferential and modeling tools used in much of modern-day research. The book can be used in methods and data science courses and first courses in statistics, at both the undergraduate and graduate levels.

Парижские мальчики в сталинской Москве Сергей Беляков, 2021-12-31 Сергей Беляков – историк и писатель, автор книг “Гумилев сын Гумилева”, “Тень Мазепы. Украинская нация в эпоху Гоголя”, “Весна народов. Русские и украинцы между Булгаковым и Петлюрой”, лауреат премии “Большая книга”, финалист премий “Национальный бестселлер” и “Ясная Поляна”. Сын Марины Цветаевой Георгий Эфрон, более известный под домашним именем «Мур», родился в Чехии, вырос во Франции, но считал себя русским. Однако в предвоенной Москве одноклассники, приятели, девушки видели в нем – иностранца, парижского мальчика. «Парижским мальчиком» был и друг Мура, Дмитрий Сеземан, в это же время приехавший с родителями в Москву. Жизнь друзей в СССР кажется чередой несчастий: аресты и гибель близких, бездомье, эвакуация, голод, фронт, где один из них будет ранен, а другой погибнет... Но в их московской жизни были и счастливые дни. Сталинская Москва – сияющая витрина Советского Союза. По новым широким улицам мчатся «линкольны», «паккарды» и ЗИСы, в Елисеевском продают деликатесы: от черной икры и крабов до рокфора... Эйзенштейн ставит «Валькирию» в Большом театре, в Камерном идёт «Мадам Бовари» Таирова, для москвичей играют джазмены Эдди Рознера, Александра Цфасмана и Леонида Утесова, а учителя танцев зарабатывают больше инженеров и врачей... Станный, жестокий, но яркий мир, где утром шли в приемную НКВД с передачей для арестованных родных, а вечером сидели в ресторане «Националь» или слушали Святослава Рихтера в Зале Чайковского.
