Planning and Designing Healthcare Facilities Vijai Kumar Singh, Paul Lillrank, 2017-10-30 The planning and design of healthcare facilities has evolved over the previous decades from function follows design to design follows function. Facilities stressed the functions of healthcare providers but patient experience was not fully considered. The design process has now crucially evolved, and currently, the impression a hospital conveys to its patients and community is the primary concern. The facilities must be welcoming, comfortable, and exude a commitment to patient well-being. Rapid changes and burgeoning technologies are now major considerations in facility design. Without flexibility, hospitals face quicker obsolescence if designs are not forward-thinking. Planning and Designing Healthcare Facilities: A Lean, Innovative, and Evidence-Based Approach explores recent developments in hospital design. Medical facilities have been adapted to the requirements of clinical functions. Recently, the needs of patients and clinical pathways have been recognized. With the patient at the center of the process, the flow of tasks becomes the guiding principle as hospital design must employ evidence-based thinking, and process management methods such as Lean become central. The authors explain new concepts to reduce healthcare delivery cost, but keep quality the primary consideration. Concepts such as sustainability

(i.e., Green Hospitals) and the use of new tools and technologies, such as information and communication technology (ICT), Lean, and evidence-based planning and innovations are fully explained.

Intelligence Richard Lynn, Tatu Vanhanen, 2012 Richard Lynn and Tatu Vanhanen argue that intelligence should be adopted as a unifying construct for the social sciences, akin to mass, energy, pressure and the like that unify the physical sciences. They show that differences in intelligence between individuals explain numerous phenomena including educational attainment, earnings, crime and health and extend this to the explanation of differences between groups including socio-economic classes, regions within countries and nations. They develop further their work on national IQs for all countries in the world and show that these contribute significantly to the understanding of numerous phenomena in economics, political science, demography, sociology, criminology, anthropology and epidemiology.

Andy has never been one of the popular girls because she makes good grades in all of her classes, reads and aspires to become a great writer. Unfortunately, she doesn't have anything to write about. Her twin brother, Riley, wants to follow a different path and become a rock guitar god. Because of this, they are almost always at odds. Andy has only a small circle of good friends which isn't anything bad to complain about. That is, until, a new and definitely different social media app pops up into everybody's phone screens. It is Hater, an app dedicated for users to only post hate comments back and forth to each other. Anyone who decides to no longer put up with any of the negativity and post a nice or positive comment mysteriously disappears. As the student body of John P. Dorset High School

and the rest of the world grows more and more out of control due to the presence of Hater, it is up to Andy and her friends to stand up for themselves and come together as a team to take down this faceless threat.
