*Arbitration and the Constitution* Peter B. Rutledge,2013

Arbitration has become an increasingly important mechanism for dispute resolution, both in the domestic and international setting. Despite its importance as a form of state-sanctioned dispute resolution, it has largely remained outside the spotlight of constitutional law. This landmark work represents one of the first attempts to synthesize the fields of arbitration law and constitutional law. Drawing on the author's extensive experience as a scholar in arbitration law who has lectured and studied around the world, the book offers unique insights into how arbitration law implicates issues such as separation of powers, federalism, and individual liberties.

Artificial intelligence (AI) methods have shown great capabilities in modelling, prediction and recognition tasks supporting human-machine interaction. At the same time, the issue of emotion has gained increasing attention due to its relevance in achieving human-like interaction with machines. The real challenge is taking advantage of the emotional characterization of humans' interactions to make computers interfacing with them emotionally and socially credible. The book assesses how and to what extent current sophisticated computational intelligence tools might support the multidisciplinary research on the characterization of appropriate system reactions to human emotions and expressions in interactive scenarios. Discussing the latest recent research trends, innovative approaches and future challenges in AI from interdisciplinary perspectives, it is a valuable resource for researchers and practitioners in academia and industry.

*Fair Food* Oran B. Hesterman, 2012-06-05 Our food system is broken, and it's endangering what's most precious to us: our environment, our health, our soil and water, and our future. In recent years, a host of books and films have compellingly documented the dangers. But advice on what to do about them

largely begins and ends with the admonition to “eat local” or “eat organic.” Longtime good food pioneer Oran Hesterman knows that we can't fix the broken system simply by changing what's on our own plates: the answer lies beyond the kitchen. In *Fair Food* he shares an inspiring and practical vision for changing not only what we eat, but how food is grown, packaged, delivered, marketed, and sold. He introduces people and organizations across the country who are already doing this work in a number of creative ways, and provides a wealth of practical information for readers who want to get more involved.

Submarine Mass Movements and their Consequences Geoffroy Lamarche,Joshu Mountjoy,Suzanne Bull,Tom Hubble,Sebastian Krastel,Emily Lane,Aaron Micallef,Lorena Moscardelli,Christof Mueller,Ingo Pecher,Susanne Woelz,2015-10-02 This book is a comprehensive collection of state-of-the-art studies of seafloor slope instability and their societal implications. The volume captures the most recent and exciting scientific progress made in this research field. As the world's climate and energy needs change, the conditions under which slope instability occurs and needs to be considered, are also changing. The science and engineering of submarine – or more widely subaqueous – mass movements is greatly benefiting from advances in seafloor and sub-seafloor surveying technologies. Ultra-high-resolution seafloor mapping and 3D seismic reflection cubes are becoming commonly available datasets that are dramatically increasing our knowledge of the mechanisms and controls of subaqueous slope failure. Monitoring of slope deformation, repeat surveying and deep drilling, on the other hand, are emerging as important new techniques for understanding the temporal scales of slope instability. In essence, rapid advances in technology are being readily incorporated into scientific research and as a result, our understanding of submarine mass movements is increasing at a very fast rate. The volume also marks the beginning of the third IGCP project for the submarine mass movement research community, IGCP-640 S4SLIDE (Significance of Modern and Ancient Submarine Slope LandSLIDEs). The Submarine Mass Movements and Their Consequences symposium is the biannual meeting under the IGCP umbrella.

**Research, Applications, and Interventions for Children and Adolescents** Carmel Proctor,P. Alex Linley,2013-05-13 This book presents recent positive psychological research, applications and interventions being used among adolescents and children. Currently there is a wave of change occurring whereby educators,

and others working with children and adolescents, are beginning to recognize the benefits of looking at well-being from a positive perspective, specifically the integration of positive psychological theory into the school curriculum in order to improve student well-being. Moreover, although the positive psychological field has grown tremendously since its inception, there remains an imbalance in the publication of research findings, applications, and interventions among children and adolescents in comparison to adults. This book fills the need for a reference to this valuable information and benefits a wide range of professionals, including educators, clinicians, psychologists, students, and many other working with children and adolescents.
