**Things and Places** Zenon W. Pylyshyn, 2007 The author argues that the process of incrementally constructing perceptual representations, solving the binding problem (determining which properties go together), and, more generally, grounding perceptual representations in experience arise from the nonconceptual capacity to pick out and keep track of a small number of sensory individuals. He proposes a mechanism in early vision that allows us to select a limited number of sensory objects, to reidentify each of them under certain conditions as the same individual seen before, and to keep track of their enduring individuality despite radical changes in their properties--all without the machinery of concepts, identity, and tenses. This mechanism, which he calls FINSTs (for Fingers of Instantiation), is responsible for our capacity to individuate and track several independently moving sensory objects--an ability that we exercise every waking minute, and one that can be understood as fundamental to the way we see and understand the world and to our sense of space.

**The Girl's Guide to Homelessness** Brianna Karp, 2011-05-01 Brianna Karp entered the workforce at age ten, supporting her mother and sister throughout her teen years in Southern California. Although her young life was scarred by violence and abuse, Karp stayed focused on her dream of a steady job and a home of her own. By age twenty-two her dream became reality. Karp loved her job as an executive assistant and signed the lease on a tiny cottage near the beach. And then the Great Recession hit. Karp, like millions of others, lost her job. In the six months between the day she was laid off and the day she was forced out onto the street, Karp scrambled for temp work and filed hundreds of job applications, only to find all doors closed. When she inherited a thirty-foot

travel trailer after her father's suicide, Karp parked it in a Walmart parking lot and began to blog about her search for work and a way back.

**Environmental Conservation, Clean Water, Air & Soil (CleanWAS)** Muhammad Aqeel Ashraf, Wan Syaidatul Aqma, 2017-02-15 As we embark into the 21st century, we need to address new challenges ranging from population growth, climate change, and depletion of natural resources to providing better health care, food security and peace to humankind, while at the same time protecting natural ecosystems that provide the services which allow life to flourish on Earth. To meet those challenges, profound changes are required in the way that societies conduct their everyday affairs, ways that will lead to better preservation, protection and sustainable management of natural resources with long lasting impacts. The aim of CleanWAS 2016 is to provide productive opportunities for academics and practitioners from interdisciplinary fields of Environmental Sciences to meet, share and bring expertise and ideas in related disciplines. The CleanWAS conference was first organized in the year 2012. It is an annual event organised by the International Water, Air and Soil Conservation society (INWASCON) and is supported by various Malaysian (UKM, UMS, UIAM) and Chinese universities (CUG, NKU, SYSU).

**Manual of Singing Voice Rehabilitation** Leda Searce, 2016-04-18 Manual of Singing Voice Rehabilitation: A Practical Approach to Vocal Health and Wellness provides speech-language pathologists and singing teachers with the tools

to lay the foundation for working with singers who have voice injuries. Singing voice rehabilitation is a hybrid profession that represents a very specific amalgam of voice pedagogy, voice pathology, and voice science. Becoming a singing voice rehabilitation specialist requires in-depth training and thorough preparation across these fields. This text presents a conceptual and practical basis for interacting with singers in an effective and supportive way, identifying factors to address, structuring singing voice rehabilitation sessions, and ensuring that singers are getting adequate exercise while allowing their injuries to heal, as well as resources and materials to provide to singers to optimize the outcome of their rehabilitation. Each chapter exposes readers to important concepts of singing voice rehabilitation and the elements that need to be addressed in the singing voice rehabilitation process, which include medical factors, emotional factors, vocal hygiene, vocal pacing, and vocal coordination and conditioning. This text contains information for developing exercises and interventions to target specific vocal problems and guidance in customizing vocal exercises based on injury, singing style, skill level, professional level, and the particular vocal demands of each singer. Key features include: \* Rehabilitation and therapy exercises \* Clinical case studies to illustrate real-life examples and practical application While the intended audience for this book is speech-language pathologists and teachers of singing who are accomplished performers, experienced pedagogues, and clinically and scientifically well-informed, there is information herein that will be of value to all singers, physicians interested in learning more about the behavioral side of singing voice rehabilitation, nonsinging speech-language pathologists, or anyone seeking knowledge about

*The Geography of Thought* Richard Nisbett,2011-01-11 When Richard Nisbett showed an animated underwater scene to his American students, they zeroed in on a big fish swimming among smaller fish. Japanese subjects, on the other hand, made observations about the background environment...and the different seeings are a clue to profound underlying cognitive differences between Westerners and East Asians. As Professor Nisbett shows in *The Geography of Thought* people actually think - and even see - the world differently, because of differing ecologies, social structures, philosophies, and educational systems that date back to ancient Greece and China, and that have survived into the modern world. As a result, East Asian thought is holistic - drawn to the perceptual field as a whole, and to relations among objects and events within that field. By comparison to Western modes of reasoning, East Asian thought relies far less on categories, or on formal logic; it is fundamentally dialectic, seeking a middle way between opposing thoughts. By contrast, Westerners focus on salient objects or people, use attributes to assign them to categories, and apply rules of

formal logic to understand their behaviour.

**Botnets** Craig Schiller, James R.

Binkley, 2011-04-18 The book begins with real world cases of botnet attacks to underscore the need for action. Next the book will explain botnet fundamentals using real world examples. These chapters will cover what they are, how they operate, and the environment and technology that makes them possible. The following chapters will analyze botnets for opportunities to detect, track, and remove them. Then the book will describe intelligence gathering efforts and results obtained to date. Public domain tools like OurMon, developed by Jim Binkley of Portland State University, will be described in detail along with discussions of other tools and resources that are useful in the fight against Botnets. This is the first book to explain the newest internet threat - Botnets, zombie armies, bot herders, what is being done, and what you can do to protect your enterprise Botnets are the most complicated and difficult threat the hacker world has unleashed - read how to protect yourself

**C++ Templates** David Vandevoorde, Nicolai M.

Josuttis, Douglas Gregor, 2017-09-14 Templates are among the most powerful features of C++, but they remain misunderstood and underutilized, even as the C++ language and development community have advanced. In C++ Templates, Second Edition, three pioneering C++ experts show why, when, and how to use modern templates to build software that's cleaner, faster, more efficient, and easier to maintain. Now extensively updated for the C++11, C++14, and C++17 standards, this new edition presents state-of-the-art techniques for a wider spectrum of applications. The authors provide authoritative explanations of all new language features that either improve templates or interact with them, including variadic templates, generic lambdas, class template argument deduction,

compile-time if, forwarding references, and user-defined literals. They also deeply delve into fundamental language concepts (like value categories) and fully cover all standard type traits. The book starts with an insightful tutorial on basic concepts and relevant language features. The remainder of the book serves as a comprehensive reference, focusing first on language details and then on coding techniques, advanced applications, and sophisticated idioms. Throughout, examples clearly illustrate abstract concepts and demonstrate best practices for exploiting all that C++ templates can do. Understand exactly how templates behave, and avoid common pitfalls Use templates to write more efficient, flexible, and maintainable software Master today's most effective idioms and techniques Reuse source code without compromising performance or safety Benefit from utilities for generic programming in the C++ Standard Library Preview the upcoming concepts feature The companion website, [tmplbook.com](http://tmplbook.com), contains sample code and additional updates.

*The Promise of Assistive Technology to Enhance Activity and Work Participation* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on the Use of Selected Assistive Products and Technologies in Eliminating or Reducing the Effects of Impairments, 2017-08-01 The U.S. Census Bureau has reported that 56.7 million Americans had some type of disability in 2010, which represents 18.7 percent of the civilian noninstitutionalized population included in the 2010 Survey of Income and Program

Participation. The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. As of December 2015, approximately 11 million individuals were SSDI beneficiaries, and about 8 million were SSI beneficiaries. SSA currently considers assistive devices in the nonmedical and medical areas of its program guidelines. During determinations of substantial gainful activity and income eligibility for SSI benefits, the reasonable cost of items, devices, or services applicants need to enable them to work with their impairment is subtracted from eligible earnings, even if those items or services are used for activities of daily living in addition to work. In addition, SSA considers assistive devices in its medical disability determination process and assessment of work capacity. The Promise of Assistive Technology to Enhance Activity and Work Participation provides an analysis of selected assistive products and technologies, including wheeled and seated mobility devices, upper-extremity prostheses, and products and technologies selected by the committee that pertain to hearing and to communication and speech in adults.

*Comparative Climate Change Litigation: Beyond the Usual Suspects* Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders, including civil society, and the notion that climate change is at a tipping point with urgent measures needed in the next decade. Against this background, civil society is turning its attention to the courts as a means to directly influence climate action, partly because of the global scepticism towards the progress of global climate action, despite the ongoing

implementation of the Paris Agreement. Focusing on the individual, broadly representing civil society, the book offers fresh perspectives on climate change litigation. While most of the literature on climate change litigation examines the same specific jurisdictions, mostly common law countries (US and Australia in particular), this book also considers specific countries in Asia, Africa and Latin America with little or no climate change litigation. It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action. Unlike other literature on the subject, this book analyses climate change litigation using a scenario-based methodology. Combining rigorous academic analysis with a practical policy-oriented focus, the book provides valuable insights for a wide range of stakeholders interested in climate change litigation. It appeals to civil society organisations around the world, international organisations and law firms interested in climate change litigation.

*The Effects of Financial Crises on the Binding Force of Contracts - Renegotiation, Rescission or Revision* Başak Başıoğlu, 2016-02-25 This book is about one of the most controversial dilemmas of contract law: whether or not the unexpected change of circumstances due to the effects of financial crises may under certain conditions be taken into account. Growing interconnectedness of global economies facilitates the spread of the effects of the financial crises. Financial crises cause severe difficulties for persons to fulfill their contractual obligations. During the financial crises, performance of contractual obligations may become excessively onerous or may cause an excessive loss for one of the contracting parties and consequently destroy the contractual equilibrium and legitimate the governmental

interventions. Uncomfortable economic climate leads to one of the most controversial dilemmas of the contract law: whether the binding force of the contract is absolute or not. In other words, unstable economic circumstances impose the need to devote special attention to review and perhaps to narrow the binding nature of a contract. Principle of good faith and fair dealing motivate a variety of theoretical bases in order to overcome the legal consequences of financial crises. In this book, all these theoretical bases are analyzed with special focus on the available remedies, namely renegotiation, rescission or revision and the circumstances which enables the revocation of these remedies. The book collects the 19 national reports and the general report originally presented in the session regarding the Effects of Financial Crises on the Binding Force of Contracts: Renegotiation, Rescission or Revision during the XIXth congress of the International Academy of Comparative Law, held in Vienna, July 2014.
