Digitization and the Law Eric Hilgendorf,Jochen Feldle,2018-03-02 Neue Technologien bedeuten neue Herausforderungen für das Recht. Das Internet ist kein Neuland mehr, kritische Themen wie Cyberattacken, Privatsphäre, der Schutz Minderjähriger oder auch das Cloud Computing sind jedoch keinesfalls ausdiskutiert. Die zunehmende Digitalisierung und Technisierung beschränkt sich nicht auf das World Wide Web. Der automatisierte Straßenverkehr ist ein ebenso zukunftsweisendes Thema, dessen Entwicklung rechtlich begleitet werden muss. Im vorliegenden Band sind Forschungsarbeiten von Rechtswissenschaftlern aus Deutschland, den USA, Kanada und Griechenland zusammengefasst. Responsible Research Institute of Medicine, Committee on Assessing the System for Protecting Human Research Participants, 2003-02-06 When 18-year-old Jesse Gelsinger died in a gene transfer study at the University of Pennsylvania, the national spotlight focused on the procedures used to ensure research participants' safety and their capacity to safeguard the well-being of those who volunteer for research studies. **Responsible Research** outlines a three-pronged approach to ensure the protection of every participant through the establishment of effective Human Research Participant Protection Programs (HRPPPs). The approach includes: Improved research review processes, Recognition and integration of research participants' contributions to the system, and Vigilant maintenance of HRPPP performance. Issues addressed in the book include the need for in-depth, complimentary reviews of science, ethics, and conflict of interest reviews; desired qualifications for investigators and reviewers; the process of informed consent; federal and institutional oversight; and the role of accreditation. Recommendations for areas of

key interest include suggestions for legislative approaches, compensation for research-related injury, and the refocusing of the mission of institutional review boards. Responsible Research will be important to anyone interested in the issues that are relevant to the practice of using human subjects as research participants, but especially so to policy makers, research administrators, investigators, and research sponsors—but also including volunteers who may agree to serve as research participants.

Investigating Cryptocurrencies Nick Furneaux, 2018-05-10 Investigate crimes

involving cryptocurrencies and other blockchain technologies Bitcoin has traditionally been the payment system of choice for a criminal trading on the Dark Web, and now many other blockchain cryptocurrencies are entering the mainstream as traders are accepting them from low-end investors putting their money into the market. Worse still, the blockchain can even be used to hide information and covert messaging, unknown to most investigators. Investigating Cryptocurrencies is the first book to help corporate, law enforcement, and other investigators understand the technical concepts and the techniques for investigating crimes utilizing the blockchain and related digital currencies such as Bitcoin and Ethereum. Understand blockchain and transaction technologies Set up and run cryptocurrency accounts Build information about specific addresses Access raw data on blockchain ledgers Identify users of cryptocurrencies Extracting cryptocurrency data from live and imaged computers Following the money With nearly \$150 billion in cryptocurrency circulating and \$3 billion changing hands daily, crimes committed with or paid for with digital cash are a serious business. Luckily, Investigating Cryptocurrencies Forensics shows you how to detect it and, more importantly, stop it in its tracks.

Emergency Medical Services Institute of Medicine, Board on Health Care Services, Committee on the Future of Emergency Care in the United States Health System, 2007-06-03 Emergency Medical Services (EMS) is a critical component of our nation's emergency and trauma care system, providing response and medical transport to millions of sick and injured Americans each year. At its best, EMS is a crucial link to survival in the chain of care, but within the last several years, complex problems facing the emergency care system have emerged. Press coverage has highlighted instances of

slow EMS response times, ambulance diversions, trauma center closures, and ground and air medical crashes. This heightened public awareness of problems that have been building over time has underscored the need for a review of the U.S. emergency care system. Emergency Medical Services provides the first comprehensive study on this topic. This new book examines the operational structure of EMS by presenting an in-depth analysis of the current organization, delivery, and financing of these types of services and systems. By addressing its strengths, limitations, and future challenges this book draws upon a range of concerns:

- The evolving role of EMS as an integral component of the overall health care system.
- EMS system planning, preparedness, and coordination at the federal, state, and local levels.
- EMS funding and infrastructure investments.
- EMS workforce trends and professional education.
- EMS research priorities and funding.

Emergency Medical Services is one of three books in the Future of Emergency Care series. This book will be of particular interest to emergency care providers, professional organizations, and policy makers looking to address the deficiencies in emergency care systems.

Special Operations Forces Mixed-Gender Elite Teams William Knarr, Jessica Turnley, Dona Stewart, Rich Rubright, Jason Quirin, Joint Special Operations University, 2019-07-07 On 24 January 2013, the Secretary of Defense (SecDef) rescinded the 1994 Direct Ground Combat Definition and Assignment Rule (DCAR) that excluded women from assignment to units and positions whose primary mission is to engage in direct combat on the ground. In doing so, the SecDef directed the opening of all

occupational specialties, positions and units to women; the validation of gender-neutral standards for those positions; and establishment of milestones for implementation. In a March 2013 memorandum, Commander USSOCOM directed several initiatives as a result of the SecDef's DCAR rescission. While other studies examined individual performance and standards, the JSOU Center for Special Operations Studies and Research examined the effects on team dynamics. The challenge for this study was to determine if changing the gender component of Special Operations Forces elite teams from single-gender (masculine) to mixed-gender would affect team dynamics in a way that would compromise the ability of the team to meet a mission objective.
