Tuberculosis of the Central Nervous System Mehmet Turgut, Ali Akhaddar, Ahmet T. Turgut, Ravindra K. Garg, 2017-06-13 Written and edited by leading international authorities in the field, this book provides an in-depth review of knowledge of tuberculosis of the central nervous system, with emphasis on clinical, diagnostics, and therapeutic features. Tuberculosis, one of the most lethal diseases in human history, still poses a serious threat in the world together with economic and social problems, although a great progress in the fight against this infectious disease in the last century. It covers the full range of tuberculosis of central nervous system and the chapters are organized into six sections: (1) the cranial; (2) the spinal; and (3) the peripheral portions of the nervous system; followed by (4) a section on the laboratory studies in tuberculosis; (5) a section on medical and surgical therapy; and (6) further insights into tuberculosis. This comprehensive reference book will be an ideal source for neurosurgeons, neurologists and specialists upon infectious diseases seeking both basic and more sophisticated information and surgical procedures relating to the complications associated with tuberculosis involving the spine, brain and peripheral nerves.

Computer Security - ESORICS 94 Dieter Gollmann, 1994-10-19 This volume constitutes the proceedings of the Third European Symposium on Research in Computer Security, held in Brighton, UK in November 1994. The 26 papers presented in the book in revised versions were carefully selected from a total of 79 submissions; they cover many current aspects of computer security research and advanced applications. The papers are grouped in sections on high security assurance software, key management, authentication, digital payment, distributed systems, access control, databases, and measures.

Healthy Aging Patrick P. Coll, 2019-03-29 This book weaves all of these factors together to engage in and promote medical, biomedical and psychosocial interventions, including lifestyle changes, for healthier aging outcomes. The text begins with an introduction to age-related changes that increase in disease and disability commonly associated with old age. Written by experts in healthy aging, the text approaches the principles of disease and disability prevention via specific health issues. Each chapter highlights the challenge of not just increasing life expectancy but also decreasing disease burden and disability in old age. The text then shifts into the whole-person implications for clinicians working with older patients, including the social and cultural considerations that are necessary for improved outcomes as Baby Boomers age and healthcare systems worldwide adjust. Healthy Aging is an important resource for those working with older patients, including geriatricians, family medicine physicians, nurses, gerontologists, students, public health administrators, and all other medical professionals.

Sustainable Building Design Chitrarekha Kabre, 2017-10-10 This book bridges the gap between research and practice in the area of sustainable design of buildings, exploring the passive (climate-responsive) design and thermal behavior of buildings and ways to incorporate these enhancements in architectural and civil engineering practice. It presents climatic data and its analysis in a readily usable form and shows ways in which such data can be used to achieve passive (climate-responsive) and sustainable building design. The book presents case studies of sustainable building in each of five climatic zones of India. The book includes climatic data from 62 cities in India and describes how it can be synthesized in sustainable building design. The book can serve as a practical tool or handbook for architects, engineers, and designers, providing them with an understanding of the physical phenomena involved and a means for suitably implementing and applying passive (climate-responsive) design principles. It also offers a valuable resource for researchers, students, and policymakers working in the area of sustainable building design and construction.

Sensory Intelligence Annemarie Lombard, 2007 We experience our environment in a unique way through our senses. Some people thrive in a busy environment with lots going on and many people involved. They like everything brighter, louder, hotter, faster and find these inputs enjoyable and stimulating. Others avoid a crowded, noisy environment and will escape to ordered tranquillity whenever they can. They prefer everything softer, milder, slower and quickly feel overwhelmed and irritated by too much fuss and flutter. Sensory intelligence explains in clear layman's terms how this works to help you understand why you and others respond to sensory input the way you do. It then tells you how to modulate your senses to adapt to your environment and other people, or change your environment to fit your sensory preferences. It will help you to function more effectively and give you greater understanding and adaptability within your relationships, both at home and at work. ;Annemarie Lombard is bridging the gap between what professionals and researchers know about sensation and what the public would benefit from knowing ... When parents, partners, friends and co-workers understand each other and why they are reacting the way they do, it is easier to make adjustments ...; Winnie Dunn (PhD OTR FAOTA), Professor & Chair Department of Occupational Therapy Education, University of Kansas Medical Center.

Street Teaching in the Tenderloin Don Stannard-Friel, 2016-11-04 This book is an ethnographic account of San Francisco's most inner city neighborhood, the Tenderloin. Using its streets as campus and its people as teachers, Stannard-Friel uses storytelling as a way of explaining why inner city social problems, such as homelessness, drugs, prostitution, untreated mental illness, and death of young people by murders and suicides, exist and persist there. The work delves into who lives in the Tenderloin and why, the role of dedicated service providers in meeting people's needs and encouraging social change, and what lessons university students, many coming from their own challenging backgrounds, learn through community engagement and service learning that encourage understanding, compassion, and meaningful contributions to society. The work also explores how life in the area is changing, and why so many youth report that they "love living in the Tenderloin."
