**Heritage Conservation and China's Belt and Road Initiative** Victor C.M. Chan,Yew-Foong Hui,Desmond Hui,Kazem Vafadari,2023-11-23 This book explores how China's Belt and Road Initiative through promoting a non-Western-centred geopolitical narrative is affecting the conservation and management of Belt and Road heritage sites. Considering the dynamics between academics, heritage professionals, and government officials, the inscription process and management of Silk Roads heritage sites, and the practice of China's Belt and Road heritage diplomacy, the book examines how changing heritage conservation practices are influenced by politics and professionalism and negotiated in different ways across different nation states in the Belt and Road zones. Highlighting the different aims and outlooks of Chinese diplomacy, UNESCO and other international heritage conservation organisations, nation states as guardians of national interests, and local communities as custodians of everyday lived heritage, it shows how the Belt and Road Initiative has energised multilateral efforts in heritage diplomacy and management. It also discusses how the 'professional' status of heritage professionals, including practitioners engaged by governments and international organisations and also scholars and researchers who provide consultancy advice, is often not politics-free, with heritage professionals often co-opted into speaking for stakeholders, especially national governments.

*Poverty and Health [2 volumes]* Kevin Michael Fitzpatrick,2013-10-28 A collection of in-depth essays focused on the health issues facing the poorest populations in the United States as it relates to the common good of all Americans. Despite living in one of the wealthiest countries in the world, far too many low-income and no-income men, women, and children in this nation are without health insurance or health care. More than half of those financially bereft have a serious health problem, with poor children three to five times more likely to experience chronic health issues than their more affluent peers. This set is a compilation of writings that address the complex problem of poverty and health across location and population. Through two informative volumes, the authors examine key issues including health care delivery, access, and disparities among various disenfranchised populations. Leading experts explore the reciprocal relationship between economic disadvantage and poor health, and ponder potential solutions to cope with these challenges.

Laughing All the Way to Freedom Emil Draitser,2024-01-25 A sequel to the author's autobiographical trilogy--Shush! Growing up Jewish under Stalin, In the Jaws of the Crocodile, and Farewell, Mama Odessa--this book is part memoir and part cultural study about the challenges of immigration and American acculturation. With self-deprecating humor, the author, a former Soviet satirist who was punished for trespassing the boundaries of public criticism, recalls his growing pains as he overcame his indoctrinated upbringing in a totalitarian society to embrace America's defining values.

In European Foreign and Security Policy, Catherine Gegout explains, with a high degree of clarity, the real-world mechanisms by which agreements are reached among members.'

**Scimitar's Glory** Dietmar Arthur Wehr,2018-01-30 Human-explored space lies between two alien races that are either openly aggressive or covertly hostile. 7th Fleet discovers that one of those races is moving to attack. In a moment of panic, the commanding admiral orders the fleet to attempt a risky jump through hyperspace. They miss hitting their target star's gravity well and end up deep in unexplored space with a shockingly long trip home and not nearly enough food to last that long. With war now raging in their home systems, the officers of 7th Fleet must find a way to put aside their egos, ambitions and fears in order to make it back, and they know that not all of them will. Scimitar's Glory is the first book in a new, fast-paced, action-packed military SF series: Swordships Odyssey. The second book, Excalibur's Quest, is also now available.

Excerpt: With a long, risky jump like this, Dejanus would have expected Corregidor’s astrogational AI to take at least ten minutes to aim the ship as precisely as possible to the distant star’s center. She was therefore surprised and somewhat alarmed when the flagship signaled to the rest of the fleet that they could start to match her trajectory after only half that time. “Goddammit, what’s the rush?” she said to Koenig who was the only other human on the Bridge. “There’s no possible way the Jab fleet can catch us before we jump, even if we take another hour to do it. Why not take a few extra minutes to get the most accurate trajectory possible?” When it became clear that Koenig had nothing to say, she continued. “Astro, I want you to check the flagship’s alignment with Alpha9 while we match vectors. Let me know if you think the flagship’s vector could be better.” That extra task delayed Excalibur’s alignment, and therefore she became the last ship in the fleet to signal her readiness for the jump. “Fleet Commander on Tac2, Commander,” said the com AI. Dejanus switched channels to her Command Pod. “Excalibur Actual speaking,” said Dejanus in the formal form of address that ship COs normally didn’t bother with. “What’s taking your Astro so long to get aligned, Commander?” Rostov didn’t bother to hide his annoyance. “Just double-checking the overall jump trajectory, Admiral.” Dejanus thought she heard Rostov swear under his breath, but it could have been her imagination. “You tell your Astro that if Excalibur isn’t aligned in the next two minutes, I’ll order him replaced and transferred to a cargo hauler. FC out!” The astro AI managed to get the ship aligned within the deadline to no one’s surprise. With all ships in the fleet now aligned perfectly with the flagship and jump velocity attained, the order was given to enter hyperspace. It was 131.3 hours later when both Koenig and Dejanus were on the Bridge again watching the jump chronometer countdown to the second when the ship should drop back down into normal space. Koenig watched the countdown clock hit zero and then start counting up again. After ten more seconds, Dejanus began shaking her head. She had a horrified expression on her face. “We’ve missed. That bastard has killed us all.”

**The Culture and Philosophy of Ridley Scott** Adam Barkman,Ashley Barkman,Nancy Kang,2013-03-08 The Culture and Philosophy of Ridley Scott, edited by Adam Barkman, Ashley Barkman, and Nancy Kang, brings together eighteen critical essays that illuminate a nearly comprehensive selection of the director’s feature films from cutting-edge multidisciplinary and comparative perspectives. Chapters examine such signature works as Alien (1979), Blade Runner (1982), Thelma and Louise (1991), Gladiator (2000), Hannibal (2001), Black Hawk Down (2001), and American Gangster (2007). This volume divides the chapters into three major thematic groups: responsibility, remembering, and revision; real, alienated, and ideal lives; and gender, identity, and selfhood. Each section features six discrete essays, each of which forwards an original thesis about the film or films chosen for analysis. Each chapter features close readings of scenes as well as broader discussions that will interest academics, non-specialists, as well as educated readers with an interest in films as visual texts. While recognizing Scott’s undeniable contributions to contemporary popular cinema, the volume does not shy away from honest and well-evidenced critique. Each chapter’s approach correlates with philosophical, literary, or cultural studies perspectives. Using both combined and single-film discussions, the contributors examine such topics as gender roles and feminist theory; philosophical abstractions like ethics, honor, and personal responsibility; historical memory and the challenges of accurately rendering historical events on screen; literary archetypes and generic conventions; race relations and the effect of class difference on character construction; how religion shapes personal and collective values; the role of a constantly changing technological universe; and the schism between individual and group-based power structures. The Culture and Philosophy of Ridley Scott assembles the critical essays of scholars working in the fields of philosophy, literary studies, and cultural studies. An international group, they are based in the United States, Canada, Argentina, Italy, Greece, Korea, the United Kingdom, and New Zealand. The guiding assumption on the part of all the writers is that the filmmaker is the leading determiner of a motion picture’s ethos, artistic vision, and potential for audience engagement. While not discounting the production team (including screenwriters, actors, and cinematographers, among others), auteur theory recognizes the seminal role of the director as the nucleus of the meaning-making process. With Scott an active and prolific presence in the entertainment industry today, the timeliness of this volume is optimal.

**Compendium of Bioenergy Plants** Stephen L. Goldman,Chittaranjan Kole,2016-04-19 This book evaluates maize as a bioenergy fuel source from two perspectives. In examining this issue, the chapters provide assessments of the social, economic, and political impact on fuel pricing, food costs, and the environmental challenge

**Social developments in the European Union 2013** David Natali (OSE),2014-06-01 The European Union has gone through a crucial period marked by growing anti-EU sentiments and the difficult implementation of its largely renewed socio-economic governance. After years of in-depth innovations and the hope of reinvigorating the E(M)U social dimension, European institutions have engaged in a lively debate on how to exit the recession and relaunch the integration project. While most Member States have continued to pursue punitive austerity programmes – at a time when 27 million Europeans are unemployed and a quarter of the EU population is at risk of poverty – most stakeholders (namely the trade union movement) and policymakers agree on the need for an EU-driven growth strategy. This 2013 edition of Social developments in the European Union provides key insights from analysts and scholars. Through the critical assessment of the EU economic governance of the last few years, contributors have set guidelines for a reinforced EU social protection and investment plan. The proposals for a pan-European unemployment insurance scheme and an EU minimum income scheme are analysed together with a renewed focus on the gender dimension of European social policies. Beyond economic and social governance, this volume critically reviews national reforms of labour market policies. While the state of the European economy is still gloomy, the institutional and policy reforms proposed here represent an opportunity to unveil a new path for Europe.

**In FED We Trust** David Wessel,2009-08-04 “Whatever it takes” That was Federal Reserve Chairman Ben Bernanke’s vow as the worst financial panic in more than fifty years gripped the world and he struggled to avoid the once unthinkable: a repeat of the Great Depression. Brilliant but temperamentally cautious, Bernanke researched and wrote about the causes of the Depression during his career as an academic. Then when thrust into a role as one of the most important people in the world, he was compelled to boldness by circumstances he never anticipated. The president of the United States can respond instantly to a missile attack with America’s military might, but he cannot respond to a financial crisis with real money unless Congress acts. The Fed chairman can. Bernanke did. Under his leadership the Fed spearheaded the biggest government intervention in more than half a century and effectively became the fourth branch of government, with no direct accountability to the nation’s voters. Believing that the economic catastrophe of the 1930s was largely the fault of a sluggish and wrongheaded Federal Reserve, Bernanke was determined not to repeat that epic mistake. In this penetrating look inside the most powerful economic institution in the world, David Wessel illuminates its opaque and undemocratic inner workings, while revealing how the Bernanke Fed led the desperate effort to prevent the world’s financial engine from grinding to a halt. In piecing together the fullest, most authoritative, and alarming picture yet of this decisive moment in our nation’s history, In Fed We Trust answers the most critical questions. Among them: • What did Bernanke and his team at the Fed know-and what took them by surprise? Which of their actions stretched-or even ripped through-the Fed’s legal authority? Which chilling numbers and indicators made them feel they had no choice? • What were they thinking at pivotal moments during the race to sell Bear Stearns, the unsuccessful quest to save Lehman Brothers, and the virtual nationalization of AIG, Fannie Mae, and Freddie Mac? What were they saying to one another when, as Bernanke put it to Wessel: “We came very close to Depression 2.0”? • How well did Bernanke, former treasury secretary Hank Paulson, and then New York Fed president Tim Geithner perform under intense pressure? • How did the crisis prompt a reappraisal of the once-impregnable reputation of Alan Greenspan? In Fed We Trust is a breathtaking and singularly perceptive look at a historic episode in American and global economic history.
