Greater China in an Era of Globalization Sujian Guo, Baogang Guo, 2010 China's growth in the past few decades has been unprecedented, and continues to stay strong as it expands its influence around the globe. However, in many ways, the once insular China is still looking to find its footing as an international player in the globalization game. Greater China in an Era of Globalization looks at the success of China and its surrounding territories of Taiwan, Hong Kong, and Macau and asks the question What is Chinese globalization?. The contributors in this volume look to answer this question by examining China's role both in its immediate sphere of influence and in the greater world. In doing so, the contributors argue that its push to globalize has had as much effect on the country itself, both politically and culturally, as it has had on the world. The contributors further the argument by analyzing China's influence on the rising nations in Africa and Latin America, before ending the book with a comparative analysis between it and the historic rise and fall of influence of its European counterparts.

Environmental Health Hazards and Social Justice Florence Margai, 2013-10-18 This book provides geographic perspectives and approaches for use in assessing the distribution of environmental health hazards and disease outcomes among disadvantaged population groups. Estimates suggest that about 40 per cent of the global burden of disease is attributable to exposures to biological and chemical pathogens in the physical environment. And with today's rapid rate of globalization, and these hazardous health effects are likely to increase, with low income and underrepresented communities facing even greater risks. In many places around the world, marginalized communities unwillingly serve as hosts of noxious facilities such as chemical industrial plants, extractive facilities (oil and mining) and other destructive land use activities. Others are being used as illegal dumping grounds for hazardous materials and electronic wastes resulting in air, soil and groundwater contamination. The book informs readers about the geography and emergent health risks that accompany the location of these hazards, with emphasis on vulnerable population groups. The approach is applications-oriented, illustrating the use of health data and geographic approaches to uncover the root causes, contextual factors and processes that produce contaminated environments. Case studies are drawn from the author's research in the United States and Africa, along with a literature review of related studies completed in Europe, Asia and South America. This comparative approach allows readers to better understand the manifestation of environmental hazards and inequities at different spatial scales with localized disparities evident in both developed and developing countries.
