Connecticut Valley Tobacco Brianna E. Dunlap, 2016-09-05 Cigar tobacco runs in the blood of Connecticut River Valley farmers. Delve into the surprising history of the region's most iconic crop, all the way back to early Native American uses and the boom of the Civil War. Though fashionable in the 1950s, the popularity of cigars declined a decade later, nearly destroying the region's tobacco industry. A resurgence in the 1990s brought new life to the crop, and the reopening of Cuba in 2015 added a new chapter for cigar tobacco. Brianna Dunlap, director of the Connecticut Valley Tobacco Museum, provides a guide to important tobacco landmarks from East Haddam to Brattleboro, featuring stunning photography from Leonard Hellerman. It is the story of the people--the farmers and field hands--who made tobacco the soul of the valley.

Beyond Our Control? Stuart Biegler, 2003-08-11 An examination of current and emerging issues in cyberlaw. This book provides a framework for thinking about the law and cyberspace, examining the extent to which the Internet is currently under control and the extent to which it can or should be controlled. It focuses in part on the proliferation of MP3 file sharing, a practice made possible by the development of a file format that enables users to store large audio files with near-CD sound quality on a computer. By 1998, software available for free on the Web enabled users to copy existing digital files from CDs. Later technologies such as Napster and Gnutella allowed users to exchange MP3 files in cyberspace without having to post anything online. This ability of online users to download free music caused an uproar among music executives and many musicians, as well as a range of much-discussed legal action. Regulation strategies identified and discussed include legislation, policy changes, administrative agency activity, international cooperation, architectural changes, private ordering, and self-regulation. The book also applies major regulatory models to some of the most volatile Internet issues, including cyber-security, consumer fraud, free speech rights, intellectual property rights, and file-sharing programs.

1634: The Ram Rebellion Eric Flint, Virginia DeMarce, 2006-05-01 The Great Revolt is On! Europe, 1634. With the example of future Grantsville, U.S.A., a small town thrown back in time by a cosmic accident, a peasant revolt becomes a revolutionary movement. You're from the future. You want the serfs to liberate themselves-but you also know what a bloodbath the French Revolution became. Avoiding that possibility will take all American horse-trading diplomacy you can muster. The stakes: an explosion that could cover half the continent in blood! Alternate history master Eric Flint and exciting newcomer Virginia DeMarce fire another exciting volley in Flint's engrossing Grantsville chronicles. At the publisher's request, this title is sold without DRM (Digital Rights Management). [W]itty, tightly written alternative history. ¾ Publishers Weekly on Eric Flint

Dury and Andrews □ **Map of Hertfordshire** Andrew Macnair, Anne Rowe, Tom Williamson, 2015-11-30 This book is about the map of an English county - Hertfordshire - which was published in 1766 by two London mapmakers, Andrew Dury and John Andrews. For well over two centuries, from the time of Elizabeth I to the late 18th century, the county was the basic unit for mapping in Britain and the period witnessed several episodes of comprehensive map making. The map which forms the subject of this book followed on from a large number of previous maps of the county but was greatly superior to them in terms of quality and detail. It was published in a variety of forms, in nine sheets with an additional index map, over a period of 60 years. No other maps of Hertfordshire were produced during the rest of the century, but the Board of Ordnance, later the Ordnance Survey, established in the 1790s, began to survey the Hertfordshire area in 1799, publishing the first maps covering the county between 1805 and 1834. The OS came to dominate map making in Britain but, of all the maps of Hertfordshire, that produced by Dury and Andrews was the first to be surveyed at a sufficiently large scale to really allow those dwelling in the county to visualize their own parish, local topography and even their own house, and its place in the wider landscape. The first section examines the context of the map's production and its place in cartographic history, and describes the creation of a new, digital version of the map which can be accessed online . The second part describes various ways in which this electronic version can be interrogated, in order to throw important new light on Hertfordshire's landscape and society, both in the middle decades of the eighteenth century when it was produced, and in more remote periods. The attached DVD contains over a dozen maps which have been derived from the digital version, and which illustrate many of the issues discussed in the text, as well as related material which should likewise be useful to students of landscape history, historical geography and local history.

1634: The Bavarian Crisis Eric Flint, Virginia DeMarce, 2009-06-30 1. The latest in the New York Times best-selling series. 2. The Ring of Fire series is the most popular and best-selling alternate history series for the past six years and is still growing. 3. Ads in Locus, more 4. Full-color brochure. 5. Special kit mailing 6. Teaser chapter for Grantville Gazette V and The Stoneholding. 7. Co-op available. The Thirty Years War continues to ravage 17th century Europe, but a new force is gathering power and influence: the Confederated Principalities of Europe, an alliance between Gustavus Adolphus, King of Sweden, and the West Virginians from the 20th century led by Mike Stearns who were hurled centuries into the past by a mysterious cosmic accident. The CPE has the know-how of 20th century technology, but needs iron and steel to make the machines. The iron mines of the upper Palatinate were rendered inoperable by wartime damage, and American know-how is needed on the spot to pump them out and get the metal flowing again—a mission that will prove more complicated than anyone expects. In the maelstrom that is Europe, even a 20th century copy of the Encyclopedia Britannica can precipitate a crisis, when readers learn of the 1640 Portuguese revolt, a crisis that will involve Naples as well. Another factor: Albanian exiles in Naples, inspired by the Americans, are plotting to recover lost Albanian turf, which will precipitate yet another crisis in the Balkans. This troubled century was full of revolutions and plans for more revolutions before the Americans arrived, and gave every would-be revolutionary an example of a revolution that succeeded. Europe is a pot coming to a boil, and Mike Stearns will have his hands full seeing that it doesn't boil over on to Grantville and the CPE.

Wonnig, Colonial American History Stories - 1215 - 1664 contains almost 300 history stories presented in a timeline that begins in 1215 with the signing of the Magna Carta to the printing of the first Bible in Colonial America in 1664. The historical events include both famous ones as well as many forgotten stories that the mists time have obscured.

Exploring the History of Hyperbaric Chambers, Atmospheric Diving Suits and Manned Submersibles: the Scientists and Machinery

Joseph Stewart,2011-02-16 Hyperbaric oxygen therapy has proven beneficial for many types of wounds including diabetic ulcers, burns and wounds related to radiation therapy. But where did this technology come from? Who discovered oxygen? How did the Navy discover that divers could be treated for the bends in a hyperbaric chamber? How does hyperbaric science relate to airline pilots, deep sea divers and astronauts? All these topics will be explored; from the first submariner to the largest hyperbaric chamber. The scientists throughout history have been gathered here along with their discoveries pertaining to hyperbaric environments. We employ hyperbaric science and the laws of gas every time we fly in a jet, prepare food with a pressure cooker or even dive into a swimming pool. Man has always been driven to discover the depths of the ocean. But in ancient times, man was limited by the pressure that water exerts on him. How could a diver overcome this tremendous pressure? We, each and every human being on the face of the planet, have a column of air pushing down on us. This column of air goes from the top of our heads to the edge of outer space. So, the next time you feel you are under pressure, be sure to remember that YOU ARE!

Public Management Konrad Raczkowski,2015-07-14 Public management is undoubtedly an acknowledged area of management science, but with meager empirical research. This book takes this challenge and presents a rare analysis of public management from the perspective of 12 Prime Ministers of Poland who governed between 1989 and 2014. The author features the concepts, practice and challenges of public management by making use of direct interviews with the Prime Ministers according to the classical management functions of planning, organization, direction and controlling. The book also presents a theoretical inquiry which redefines public management by breaking away from the traditional paradigm of public management, and introducing a 'mega-organizational' understanding of the state within new institutional economics.

Communicating statistics Great Britain: Parliament: House of Commons: Public Administration Select Committee,2013-05-29 In this report the Public Administration Select Committee recommends that departmental press officers and government statistics staff should work together much more closely to ensure that press releases give an accurate and meaningful picture of the truth behind the figures. Government statistics press releases do not always give a true and fair picture of the story behind the statistics, sometimes going too far to create a newsworthy headline. And the Committee says the ways that statistics are presented can be a challenge even for expert users. The lay user is left confused and disengaged. The Office for National Statistics website makes figures hard to find and statistics are often presented in a confusing way, for example, in formats which are not easily understandable. Other recommendations include: the UK Statistics Authority should work proactively to bring together and clearly present key statistics, from various sources, around common themes or events, such as elections and referendums, as well as broader topics such as the labour market and economic trends; the ONS website must be improved; the Statistics Authority should find more creative ways of communicating statistics, for example, through interactive guides; publication of more raw data in machine-readable format for experts who want the full results, not just the edited highlights presented in releases for a mass audience; government statisticians produce thousands of pieces of data on demand, known as 'ad hoc statistics' and these should be published proactively, rather than simply in reaction to requests.

Grantville Gazette Eric Flint,2004-11 A story collection continues the saga that began in 1632 and 1633, describing life for the inhabitants of Grantville, an American town from West Virginia that finds itself hurtled back in time and into the middle of the Thirty Years War, as they struggle to bring their advanced technology to the seventeenth century. Includes a section of articles exploring different scientific questions and conundrums raised by the Eric Flint series.

Cyndi's List Cyndi Howells,1999 REF This is a multi-title review. The titles include: 'Cyndi's List (880 pg)', 'Instant Information on the Internet (117 pg)', and 'Instant Information on the Internet (86 pg)' - Although Internet directories such as Howells's wildly popular site, (www.cyndislist. com), offer well-organized access to genealogy sites online, many researchers still want to plan searches with a book in hand. Now Howells (Netting Your Ancestors) has created a print version, with some exceptions, of her web site. Including over 100 categories and over 40,000 links (most with brief annotations), this book has something for nearly any genealogy-related topic that comes to mind. Schaefer's 'Instant Information' series offers pared-down compilations of basic information search sites. Her book on the United States categorizes web sites by state and includes vital records information sites, prominent research libraries and societies, indexes and databases, and general information sites. In the British Isles book, Schaefer discusses British counties and expands her lists to include major sites for churches and the Celtic language as well as a place-name index. All three books provide easy access to useful genealogy sites. While Howells strives for exhaustive coverage of genealogy links, Schaefer offers very general site lists. Though Howells's book comes with a solid price tag, the purchase of each new (and planned) title in Schaefer's series would quickly rack up the same price or more. Still, for those who want only a brief, focused guide, Schaefer's books are an economical alternative. Elaine M. Kuhn, Allen Cty. P.L., Fort Wayne, IN-

Directory of Research Grants 2008 Schoolhouse Partners Llc,2008-05 It was the 50s and life was simple, until September 25, 1954. That was the night that would be etched in the memory of the citizens of Stanfield, Massachusetts. The Chief of Police described the brutal savagery of the double homicide as the most atrocious crime in the history of the city. A fourteen-year-old girl, and the four-year-old boy in her care were murdered at the hands of a deranged, depraved killer. A Thread of Evidence places the reader at the scene of the crime, an eye witness to the senseless stabbing of two innocent children. With a piece of crochet thread as their only clue, the entire police department, lead by detectives Steven Logan and Raymond Gage, scour the city in search of a maniacal savage. When all tips and leads have been exhausted, they review all evidence. They come back to the thread. The only real evidence. With tenacity and perseverance of Logan and Gage the killer is apprehended. The reader experiences the twists and turns of the investigation, and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence. A Thread of Evidence has been written as fiction, but inspired by an actual event. Fifty years later, it remains etched in the minds of all who had lived in the area. The author has researched court records, newspapers, interviewed neighbors, police and has drawn on personal recollections of the crime. The story has been recounted over and over and to this day, it continues to be discussed. A Thread of Evidence is a compelling account of superb detective work, and unprecedented dedication of an entire police department.
