The Big Thirst Charles Fishman, 2011-04-12 Praised as “an entertaining and torrential flow of a book” by Nature magazine, *The Big Thirst* is a startling examination of the passing of the golden age of water and the shocking facts about how water scarcity will soon be a major factor in our lives. The water coming out of your kitchen tap is four billion years old and might well have been sipped by a Tyrannosaurus rex. Rather than only three states of water—liquid, ice, and vapor—there is a fourth, “molecular water,” fused into rock 400 miles deep in the Earth, and that’s where most of the planet’s water is found. Unlike most precious resources, water cannot be used up; it can always be made clean enough again to drink—indeed, water can be made so clean that it’s toxic. Water is the most vital substance in our lives but also more amazing and mysterious than we appreciate. As Charles Fishman brings vibrantly to life in this surprising and mind-changing narrative, water runs our world in a host of awe-inspiring ways, yet we take it completely for granted. But the era of easy water is over. Bringing readers on a lively and fascinating journey—from the wet moons of Saturn to the water-obsessed hotels of Las Vegas, where dolphins swim in the desert, and from a rice farm in the parched Australian outback to a high-tech IBM plant that makes an exotic breed of pure water found nowhere in nature—Fishman vividly shows that we’ve already left behind a century-long golden age when water was thoughtlessly abundant, free, and safe and entered a new era of high-stakes water. In 2008, Atlanta came within ninety days of running entirely out of clean water. California is in a desperate battle to hold off a water catastrophe. And in the last five years Australia nearly ran out of water—and had to scramble to reinvent the country’s entire water system. But as dramatic as the challenges are, the deeper truth Fishman reveals is that there is no good reason for us to be overtaken by a global water crisis. We have more than enough water. We just don’t think about it, or use it, smartly. *The Big Thirst* brilliantly explores our strange and complex relationship to water. We delight in watching waves roll in from the ocean; we take great comfort from sliding into a hot bath; and we will pay a thousand times the price of tap water to drink our preferred brand of the bottled version. We love water—but at the moment, we don’t appreciate it or respect it. Just as we’ve begun to reimagine our relationship to food, a change that is driving the growth of the organic and local food movements, we must also rethink how we approach and use water. The good news is that we can. As Fishman shows, a host of advances are under way, from the simplicity of harvesting rainwater to the brilliant innovations devised by companies such as IBM, GE, and Royal Caribbean that are making impressive breakthroughs in water productivity. Knowing what to do is not the problem. Ultimately, the hardest part is changing our water consciousness. As Charles Fishman writes, “Many civilizations have been crippled or destroyed by an inability to understand water or manage it. We have a huge advantage over the generations of people who have come before us, because we can understand water and we can use it smartly.” *The Big Thirst* will forever change the way we think about water, about our essential relationship to it, and about the creativity we can bring to ensuring that we’ll always have plenty of it.

La grande sete Charles Fishman,2015-08-01T00:00:00+02:00 Negli ultimi cento anni abbiamo vissuto in una specie di età d'oro dell'acqua. Ma oggi stiamo entrando in un'era di scarsità, e non solo in luoghi tradizionalmente aridi. L'acqua sarà la storia del secolo, di questo nuovo secolo. Come ce la procuriamo, come la distribuiamo, come la usiamo, come combattiamo per essa? Ne rimarremo senza? Nel solco della grande tradizione del giornalismo d'inchiesta, il libro è un viaggio documentato, appassionante e scomodo nelle realtà, nelle mistificazioni e nelle possibilità di un futuro sostenibile.

The Trail Back Out Jadi Campbell,2020-08-19 This collection is Jadi Campbell's fourth book and her first finished work in four years. She completed many of these stories during the coronavirus lockdown. From tales of Eddie, high on LSD and trapped by What Died in the Fridge, and a compulsive gambler hiding during a Category Five storm in Better Weather, to

the luminous title story of two strangers meeting by chance in the backwoods during a pandemic, her stories describe the pain and humor of being alive. Included in this collection are Rules to Live By, a funny and deeply thoughtful story about what we choose to teach our children. The author examines our responsibility to others when a hunter is shot and left for dead in The Green Under the Snow. In Do Dreams Float? a wife considers a hit-man's offer of revenge. And the eternal search for happiness is carried out by a gloomy little girl nicknamed Princess Rain Clouds. In ten stories, Campbell paints vivid descriptions of everyday life in strange times. Whether during the upheaval of the last century or the present COVID-19 crisis, The Trail Back Out guides the reader through a labyrinth of questions about how to live and love.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Sailors, Whalers, Fantastic Sea Voyages Valerie Petrillo, 2003-06-01

Children are fascinated with sailing ships, lighthouses, whaling, shipwrecks, and mutinies, and these 50-plus activities will provide them with a boatful of fun. This activity guide shows kids what life was like for the greenhands, old salts, and captains on the high seas during the great age of sail in the 19th century: aboard square-riggers, clippers, whalers, schooners, and packet ships. Life aboard ship was an exciting subculture of American life with its own language, food, music, art, and social structure. Children will learn that many captains brought their wives and children aboard ship, and that kids who learned how to walk at sea often found it difficult to walk on dry land. The book begins with the China Tea trade in the late 18th century and ends with the last whaler leaving New Bedford in 1924. Kids will create scrimshaw using black ink and a bar of white soap; make a model lighthouse using a bike reflector, an oatmeal box, and a plastic soda bottle; and paint china with traditional designs using a blue paint pen and a basic white plate. Included are additional simple activities requiring common household objects that are sure to please busy parents and teachers alike.
