A Brief History of Neoliberalism David Harvey,2007-01-04 Neoliberalism - the doctrine that market exchange is an ethic in itself, capable of acting as a guide for all human action - has become dominant in both thought and practice throughout much of the world since 1970 or so. Its spread has depended upon a reconstitution of state powers such that privatization, finance, and market processes are emphasized. State interventions in the economy are minimized, while the obligations of the state to provide for the welfare of its citizens are diminished. David Harvey, author of 'The New Imperialism' and 'The Condition of Postmodernity', here tells the political-economic story of where neoliberalization came from and how it proliferated on the world stage. While Thatcher and Reagan are often cited as primary authors of this neoliberal turn, Harvey shows how a complex of forces, from Chile to China and from New York City to Mexico City, have also played their part. In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W. Bush. Finally, through critical engagement with this history, Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us, but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements.

Napa Anthony Raymond Kilgallin,2001 Though world-famous for its miles of superior vineyards, Napa offers much more to the historian than its reputation as wine maker. Just an hour from San Francisco and Sacramento, the many towns of the Napa region are small enough to be walkable, friendly, and unique in design. The 240 images in this new book, with some photographs never before collected, demonstrate the architectural and historical diversity of this beautiful region, presented in walking-tour format. Through vintage photographs, the reader is pulled back in time to 1880 Napa, where a scant but diverse 4,000 residents reside. Of those people, only 163 were actually born in California, which accounts for the variety of architectural styles throughout the county. The multinational heritages of Irish, German, English, Canadian, Swiss, Scottish, French, Swedish, Mexican, Italian, and Chinese settlers are richly expressed through the architecture and landmarks of Napa's villages and towns. Captured here are the homes and structures that give the region its glow, including Napa's Churchill Manor, Greystone Winery in St. Helena, Magnolia Hotel in Yountville, and Stags Leap manor in the heart of the Stags Leap District.

In Pursuit of Justice Richard B. Zabel,James J. Benjamin,Human Rights First (Organization),2008 In recent years, there has been much controversy about the proper forum in which to prosecute and punish suspected terrorists. Some have endorsed aggressive use of military commissions; others have proposed an entirely new national security court. However, as the nation strives for a vigorous and effective response to terrorism, we should not lose sight of the important tools that are already at our disposal, nor should we forget the costs and risks of seeking to break new ground by departing from established institutions and practices. As this White Paper shows, the existing criminal justice system has proved successful at handling a large number of important and challenging terrorism prosecutions over the past fifteen years-without sacrificing national security interests, rigorous standards of fairness and due process, or just punishment for those guilty of terrorism-related crimes.

Carbon Nanotubes M. Endo,S. Iijima,M.S. Dresselhaus,2013-10-22 Carbon nanotubes have been studied extensively in relation to fullerenes, and together with fullerenes have opened a new science and technology field on nano scale materials. A whole range of issues from the preparation, structure, properties and observation of quantum effects in carbon nanotubes in comparison with 0-D fullerenes are discussed. In addition, complementary reviews on carbon nanoparticles such as carbon nano-capsules, onion-like graphite particles and metal-coated fullerenes are covered. This book aims to cover recent research and development in this area, and so provide a convenient reference tool for all researchers in this field. It is also hoped that this book can serve to stimulate future work on carbon nanotubes.
