A Brief History of Neoliberalism David Harvey, 2007-01-04 Neoliberalism - the doctrine that market exchange is an ethic in itself, capable of acting as a guide for all human action - has become dominant in both thought and practice throughout much of the world since 1970 or so. Its spread has depended upon a reconstitution of state powers such that privatization, finance, and market processes are emphasized. State interventions in the economy are minimized, while the obligations of the state to provide for the welfare of its citizens are diminished. David Harvey, author of 'The New Imperialism' and 'The Condition of Postmodernity', here tells the political-economic story of where neoliberalization came from and how it proliferated on the world stage. While Thatcher and Reagan are often cited as primary authors of this neoliberal turn, Harvey shows how a complex of forces, from Chile to China and from New York City to Mexico City, have also played their part. In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W. Bush. Finally, through critical engagement with this history, Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us, but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements.

A History of Greek Art Mark D. Stansbury-O'Donnell, 2015-01-27 Offering a unique blend of thematic and chronological investigation, this highly illustrated, engaging text explores the rich historical, cultural, and social contexts of 3,000 years of Greek art, from the Bronze Age through the Hellenistic period. Napa Anthony Raymond Kilgallin,2001 Though world-famous for its miles of superior vineyards, Napa offers much more to the historian than its reputation as wine maker. Just an hour from San Francisco and Sacramento, the many towns of the Napa region are small enough to be walkable, friendly, and unique in design. The 240 images in this new book, with some photographs never before collected, demonstrate the architectural and historical diversity of this beautiful region, presented in walking-tour format. Through vintage photographs, the reader is pulled back in time to 1880 Napa, where a scant but diverse 4,000 residents reside. Of those people, only 163 were actually born in California, which accounts for the variety of architectural styles throughout the county. The multinational heritages of Irish, German, English, Canadian, Swiss, Scottish, French, Swedish, Mexican, Italian, and Chinese settlers are richly expressed through the architecture and landmarks of Napa's villages and towns. Captured here are the homes and structures that give the region its glow, including Napa's Churchill Manor, Greystone Winery in St. Helena, Magnolia Hotel in Yountville, and Stags Leap manor in the heart of the Stags Leap District.

Nordic Homicide in Deep Time Janne Kivivuori,Mona Rautelin,Jeppe Büchert Netterstrøm,Dag Lindström,Guðbjörg S. Bergsdóttir,Jónas O. Jónasson,Martti Lehti,Sven Granath,Mikkel M. Okholm,Petri Karonen,2022-02-16 Nordic Homicide in Deep Time draws a unique and detailed picture of developments in human interpersonal violence and presents new findings on rates, patterns, and long-term changes in lethal violence in the Nordics. Conducted by an interdisciplinary team of criminologists and historians, the book analyses homicide and lethal violence in northern Europe in two eras – the 17th century and early 21st century. Similar and continuous societal structures, cultural patterns, and legal cultures allow for long-term and comparative homicide research in the Nordic context. Reflecting human universals and stable motives, such as revenge,

jealousy, honour, and material conflicts, homicide as a form of human behaviour enables long-duration comparison. By describing the rates and patterns of homicide during these two eras, the authors unveil continuity and change in human violence. Where and when did homicide typically take place? Who were the victims and the offenders, what were the circumstances of their conflicts? Was intimate partner homicide more prevalent in the early modern period than in present times? How long a time elapsed from violence to death? Were homicides often committed in the context of other crime? The book offers answers to these questions among others, comparing regions and eras. We gain a unique and empirically grounded view on how state consolidation and changing routines of everyday life transformed the patterns of criminal homicide in Nordic society. The path to pacification was anything but easy, punctuated by shorter crises of social turmoil, and high violence. The book is also a methodological experiment that seeks to assess the feasibility of long-duration standardized homicide analysis and to better understand the logic of homicide variation across space and over time. In developing a new approach for extending homicide research into the deep past, the authors have created the Historical Homicide Monitor. The new instrument combines wide explanatory scope, measurement standardization, and articulated theory expression. By retroactively expanding research data to the pre-statistical era, the method enables long-duration comparison of different periods and areas. Based on in-depth source critique, the approach captures patterns of criminal behaviour, beyond the control activity of the courts. The authors foresee the application of their approach in even remoter periods. Nordic Homicide in Deep Time helps the reader to understand modern homicide by revealing the historical continuities and changes in lethal violence. The book is written for professionals, university students and anyone interested in the history of human behaviour.

Stats: Data and Models, Global Edition Paul Velleman, Richard D. De Veaux, David E. Bock, 2016-09-29 Richard De Veaux, Paul Velleman, and David Bock wrote Stats: Data and Models with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results. In Pursuit of Justice Richard B. Zabel, James J. Benjamin, Human Rights First (Organization), 2008 In recent years, there has been much controversy about the proper forum in which to prosecute and punish suspected terrorists. Some have endorsed aggressive use of military commissions; others have proposed an entirely new national security court. However, as the nation strives for a vigorous and effective response to terrorism, we should not lose sight of the important tools that are already at our disposal, nor should we forget the costs and risks of seeking to break new ground by departing from established institutions and practices. As this White Paper shows, the existing criminal justice system has proved successful at handling a large number of important and challenging terrorism prosecutions over the past fifteen years-without sacrificing national security interests, rigorous standards of fairness and due process, or just punishment for those guilty of terrorism-related crimes.

Carbon Nanotubes M. Endo, S. Iijima, M.S. Dresselhaus, 2013-10-22 Carbon nanotubes have been studied extensively in relation to fullerenes, and together with fullerenes have opened a new science and technology field on nano scale materials. A whole range of issues from the preparation, structure, properties and observation of quantum effects in carbon nanotubes in comparison with 0-D fullerenes are discussed. In addition, complementary reviews on carbon nanoparticles such as carbon nano-capsules, onion-like graphite particles and metal-coated fullerenes are covered. This book aims to cover recent research and development in this area, and so provide a convenient reference tool for all researchers in this field. It is also hoped that this book can serve to stimulate future work on carbon nanotubes.

In the Midst of a Loneliness James E. Ivey, 2018-10-05 Excerpt from *In the Midst of a Loneliness: The Architectural History of the Salinas Missions*; Salinas Pueblo Missions National Monument Historic Structure Report Congress established Salinas National Monument to set apart and preserve for the benefit and enjoyment of the American people the ruins of prehistoric Indian pueblos and associated seventeenth century, Franciscan Spanish mission ruins. In order to preserve these ruins, an effective plan of stabilization and maintenance is needed. The trouble with the stabilization and maintenance of a ruin, however, is that it inevitably changes the nature of the ruin. The visible stonework gradually, through small steps of repointing, dismantling and rebuilding, and capping, becomes the product of a generalized National Park Service policy rather than the product of a particular people at a particular time in the past. To slow down this process of the loss of the original nature or cultural imprint of a ruin, a careful maintenance program that minimizes changes to the appearance of the building is necessary. The most important single document for planning such a program is the Historic Structure Report, that determines the original appearance of a building and the previous attempts at stabilizing it. After its preparation, interpreters frequently use the Historic Structure Reports as one of the sources of information in their effort to make a site more understandable to the park visitor. This Historic Structure Report was written with the needs of both managers and interpreters in mind. The narratives of design, construction, and change over time attempt to present the life and the mind behind the structure, as well as the material of which it was made. This approach has led to some surprising insights. Most-significant among these was the determination that the present church of Abo had been partially torn down and enlarged at one time, and that the church of San Buenaventura had never been completed. Equally important in the author's mind is the definition of the methods of construction, the human activity itself. The buildings did not simply grow like weeds; human hands placed each rock on top of the others, and lifted each beam into place. About the Publisher Forgotten Books publishes hundreds of thousands
