Judging Research Martyn Rittmann,2020-04-17 The 2019 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of how research should be evaluated and how researchers should be rewarded. Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis.

2021 International Conference on Indoor Positioning and Indoor Navigation (IPIN) IEEE Staff,2021-11-29 The conference addresses the topics of indoor positioning and navigation The advent of terrestrial positioning systems, the internet of things and human sensor networks providing new navigation functionalities sets a novel paradigm for indoor positioning and navigation solutions that drives to the concept of intelligent spaces The environment, where navigation technology is expected to work, has extended to challenging indoor spaces and to the context of goods and personal mobility Globally there is no overall and easy solution

The Analyst in the Inner City, Second Edition Neil Altman,2011-08-24 In 1995, Neil Altman did what few psychoanalysts did or even dared to do: He brought the theory and practice of psychoanalysis out of the cozy confines of the consulting room and into the realms of the marginalized, to the very individuals whom this theory and practice often overlooked. In doing so, he brought together psychoanalytic and social theory, and examined how divisions of race, class and culture reflect and influence splits in the developing self, more often than not leading to a negative self image of the other in an increasingly polarized society. Much like the original, this second edition of The Analyst in the Inner City opens up with updated, detailed clinical vignettes and case presentations, which illustrate the challenges of working within this clinical milieu. Altman greatly expands his section on race, both in the psychoanalytic and the larger social world, including a focus on whiteness which, he argues, is socially constructed in relation to blackness. However, he admits the inadequacy of such categorizations and proffers a more fluid view of the structure of race. A brand new section, Thinking Systemically and Psychoanalytically at the Same Time, examines the impact of the socio-political context in which psychotherapy takes place, whether local or global, on the clinical work itself and the socio-economic categories of its patients, and vice-versa. Topics in this section include the APA's relationship to CIA interrogation practices, group dynamics in child and adolescent psychotherapeutic interventions, and psychoanalytic views on suicide bombing. Ranging from the day-to-day work in a public clinic in the South Bronx to considerations of global events far outside the clinic's doors (but closer than one might think), this book is a timely revision of a groundbreaking work in psychoanalytic literature, expanding the import of psychoanalysis from the centers of analytical thought to the margins of clinical need.

Advanced Functional Materials Biplab Sanyal,2012-10-03 This book deals with functional materials that are in the frontiers of current materials science and technology research, development and manufacture. The first of its kind, it deals with three classes of materials, (1) magnetic semiconductors, (2) multiferroics, and (3) graphene. Because of the wide popularity of these materials there is a strong need for a book about these materials for graduate students, new researchers in science and technology, as well as experienced scientists and technologists, technology based companies and government institutes for science and technology. The book will provide this broad audience with both theoretical and experimental understanding to help in technological advances in the development of devices and related new technologies based on these very interesting and novel materials. Covers both the theoretical and experimental aspects of advanced functional materials, which are important for use in a number of rapidly developing novel technological devices Includes excellent coverage of three of the leading advanced functional materials Edited by a leading expert at the forefront of advanced functional materials research

Handbook of Enology, Volume 2 Pascal Ribéreau-Gayon,Yves Glories,Alain Maujean,Denis Dubourdieu,2006-05-01 The Handbook of Enology Volume 2: The Chemistry of Wine Stabilization and Treatments uniquely combines chemical theory with the descriptions of day-to-day work in the latter stages of winemaking from clarification and stabilization treatments to ageing processes in vats and barrels. The expert authors discuss: Compounds in wine, such as organic acids, carbohydrates, and alcohol. Stabilization and treatments The chemical processes taking effect in bottled wine The information provided helps to achieve better results in winemaking, providing an authoritative and complete reference manual for both the winemaker and the student.

Industrial Applications Rajender S. Varma,Bubun Banerjee,2022-05-09 Magnetic nanocatalysts are garnering attention for development of greener catalytic processes due to their ease of recovery from a reaction medium. This book delves into a variety of magnetic nanocatalysts, their use in the industrial context, and recyclability. Topics covered include wastewater treatment, drug delivery, and industrial catalysis; another available volume focuses on the use of magnetic nanocatalysts in synthetic appliances and transformations.

Rhizomania Enrico Biancardi,Tetsuo Tamada,2016-09-20 The knowledge of ecology and epidemiology of rhizomania is particularly useful to understand the means and practices able to limit or avoid its further diffusion. Some promising methods of biological control using coexisting and non-pathogenic organisms could potentially help improve the action of the not completely effective genetic resistances. This integrated protection would be valuable, especially in the even more frequent development of resistance-breaking strains in the BNYVV, where the known types of resistance, alone or in combination, seem to have lost part of their original ability to protect the crop. Therefore, further efforts will be needed to discover new traits likely still present in the wild species of the genus Beta. The availability of large collections of germplasm stored in the International Beta gene-banks should ensure the enhanced efficiency of genetic resistance by means of conventional and marker-assisted selection methods. Some almost immune transgenic varieties seem already to be waiting for release where and when it will be possible. The introduction chapter describes briefly the sugar beet crop, the more common diseases, and the damage caused by rhizomania. The following chapters discuss biological properties of the causal virus, BNYVV, and its vector, Polymyxa betae, and their interactions with the environment and the host-plant. In particular, the great advances in research of the molecular biology of BNYVV should be noteworthy, which have been established by a wide range of the most modern methods. Recent work focused on the genetic diversity and evolution of BNYVV is moving forward our understanding of the dramatic worldwide epidemics of rhizomania. Newly developed molecular techniques also lead

to practical applications, such as quantification of inoculum in ecological and epidemiological research.

Last Genro Bunji Omura,2013-10-28 First Published in 2005, but published originally in 1938 on the eve of the Second World War, this work focuses on the last member of a distinguished group of genros, or elder statesmen, who participated in the wars of the Meiji restoration and in 1889 under Emperor Meiji, drew up the Imperial Constitution on which the Japanese political system was based. Prince Saionji was the president of the Privy Council, the second president of the Seyukai party, twice Prime Minster and Japan's Chief Delegate to the Paris Peace Conference.

Politics of Social Research Ralph L. Beals,Alan Woolfolk,2017-07-12 Politics of Social Research addresses itself to the question of the behavior appropriate for social scientists conducting research sponsored by or otherwise involving government agencies-our own and those of other countries. The simple patriotism that suggests that social scientists, like other citizens, should not hesitate to put their skills at the service of their government is questioned here and by practitioners. This is partly because of outright disagreement with government policies and partly because of the threat to independence posed by massive government funding. As this book plainly shows, the problems are especially acute for social scientists working abroad, where they are viewed as de facto representatives of American policy while at the same time they must accommodate to the policies of foreign governments.

The Routledge Encyclopedia of Jewish Writers of the Twentieth Century Sorrel Kerbel,2004-11-23 Now available in paperback for the first time, Jewish Writers of the Twentieth Century is both a comprehensive reference resource and a springboard for further study. This volume: examines canonical Jewish writers, less well-known authors of Yiddish and Hebrew, and emerging Israeli writers includes entries on figures as diverse as Marcel Proust, Franz Kafka, Tristan Tzara, Eugene Ionesco, Harold Pinter, Tom Stoppard, Arthur Miller, Saul Bellow, Nadine Gordimer, and Woody Allen contains introductory essays on Jewish-American writing, Holocaust literature and memoirs, Yiddish writing, and Anglo-Jewish literature provides a chronology of twentieth-century Jewish writers. Compiled by expert contributors, this book contains over 330 entries on individual authors, each consisting of a biography, a list of selected publications, a scholarly essay on their work and suggestions for further reading.

Conceptual Issues in Modern Human Origins Research Geoffrey A. Clark,Catherine M. Willermet, While those who study human origins now agree that the evolution of modern human form extends back much further in time than the evolution of modern human behavior, they disagree sharply as to how to interpret the substantive data. Two fundamentally incommensurate interpretations of our origins, the Replacement camp and the Continuity camp, have now emerged out of pre-existing models and theories that go back to the last quarter of the 19th century. This book contends that these positions are based on radically different biases and assumptions about what the remote human past was like. The purpose of this volume is to examine those conceptual differences, not to arrive at a consensus, but rather to explore the reasons why a consensus might never be possible.

Nonlinear Signal and Image Processing Kenneth E. Barner,Gonzalo R. Arce,2003-11-24 Nonlinear signal and image processing methods are fast emerging as an alternative to established linear methods for meeting the challenges of increasingly sophisticated applications. Advances in computing performance and nonlinear theory are making nonlinear techniques not only viable, but practical. This book details recent advances in nonl
