If you buy only one book on Office 2007, Special Edition Using Microsoft® Office 2007 is the only book you need. If you own a copy of Office 2007, you deserve a copy of this book! Although this book is aimed at the Office veteran, Ed and Woody's engaging style will appeal to beginners, too. Written in clear, plain English, readers will feel as though they are learning from real humans and not Microsoft clones. Sprinkled with a wry sense of humor and an amazing depth of field, this book most certainly isn't your run-of-the-mill computer book. You should expect plenty of hands-on guidance and deep but accessible reference material. This isn't your Dad's Office! For the first time in a decade, Microsoft has rolled out an all-new user interface. Menus? Gone. Toolbars? Gone. For the core programs in the Office family, you now interact with the program using the Ribbon—an oversize strip of icons and commands, organized into multiple tabs, that takes over the top of each program's interface. If your muscles have memorized Office menus, you'll have to unlearn a lot of old habits for this version.

Tora Bora Revisited U. S. Senate, 2010-01-01 In the aftermath of 9/11, President George W. Bush promised a grieving nation that the United States would capture or kill Osama Bin Laden, the mastermind behind the deadliest terrorist attack on American soil. Almost a decade later, the Al Qaeda leader is still alive and free, even after an occupation of Afghanistan by U.S. troops of more than eight years. In November 2009, the United States Senate Committee on Foreign Relations, chaired by John F. Kerry, issued a report on what could be characterized as one of the greatest joint military and intelligence failures of recent American history: Bin Laden's escape from his stronghold in the mountains of Tora Bora, and his subsequent flight to a location that remains unknown. Who was responsible for the decision to put too few troops on the ground, and what justification could there have been for such a decision? What alternative plans were available? What can we learn from the flaws of the Afghan occupation? Anyone interested in current affairs—and especially in the beginning of the Global War on Terror—will find this essential reading.

Reducing Environmental Cancer Risk Suzanne H. Reuben, 2010-10 Though overall cancer incidence and mortality have continued to decline in recent years, cancer continues to devastate the lives of far too many Americans. In 2009 alone, 1.5 million American men, women, and children were diagnosed with cancer, and 562,000 died from the disease. There is a growing body of evidence linking environmental exposures to cancer. The Pres. Cancer Panel dedicated its 2008-2009 activities to examining the impact of environmental factors on cancer risk. The Panel considered industrial, occupational, and agricultural exposures as well as exposures related to medical practice, military activities, modern lifestyles, and natural sources. This report presents the Panel's recommendations to mitigate or eliminate these barriers. Illus.

Hoosiers and the American Story Madison, James H., Sandweiss, Lee Ann, 2014-10-01 A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the

history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

World Report on Child Injury Prevention M. M. Peden, 2008 Child injuries are largely absent from child survival initiatives presently on the global agenda. Through this report, the World Health Organization, the United Nations Children's Fund and many partners have set out to elevate child injury to a priority for the global public health and development communities. It should be seen as a complement to the UN Secretary-General's study on violence against children released in late 2006 (that report addressed violence-related or intentional injuries). Both reports suggest that child injury and violence prevention programs need to be integrated into child survival and other broad strategies focused on improving the lives of children. Evidence demonstrates the dramatic successes in child injury prevention in countries which have made a concerted effort. These results make a case for increasing investments in human resources and institutional capacities. Implementing proven interventions could save more than a thousand children's lives a day.--p. vii.
