World Drug Report 2021 (Set of 5 Booklets) United Nations Office on Drugs and Crime,2022-01-19 As in previous reports, the 2021 World Drug Report (WDR) aims to improve the understanding of the world's drug problem and to contribute towards fostering greater international cooperation for countering its impact on health, governance and security. Also, to the extent possible, the WDR contributes to the monitoring and reporting of SDGs. This edition includes an updated overview of recent trends on production, trafficking and consumption for non-medical purposes of key controlled substances. It further maintains a global overview of the baseline data and estimates on drug demand and supply and provides an analysis of the market for the different drugs.

OECD Digital Economy Outlook 2020 OECD,2020-11-27

The OECD Digital Economy Outlook 2020 examines trends and analyses emerging opportunities and challenges in the digital economy. This third edition of the OECD Digital Economy Outlook provides a holistic overview of converging trends, policy developments and data on both the supply and demand sides of the digital economy. It illustrates how the digital transformation is affecting economies and societies. Finally, it provides a special focus on how the COVID-19 pandemic is amplifying opportunities and challenges from the digital transformation.

Chinese Environmental Contention Maria Bondes,2019

Through a study of Chinese anti-incineration contention, this book investigates how the different contentious actors in China's green sphere link up and what this means for environmental contention.

The African Diaspora Population in Britain Peter J.

Aspinall,Martha J. Chinouya,2016-04-20 This insightful book examines the Black African diaspora in Britain through an examination of its demography, recent patterns of migration,

changing patterns of residence, and socio-economic position. It provides an analysis of the areas where Black Africans face disadvantage, including labour market participation, housing markets, health and social care, and residence in deprived neighbourhoods. This original and important research also deals with categories and identities, using data collected in the 2011 Census on national identity, and the resulting investigation of the social, cultural and civic life of Black Africans presents the substantial heterogeneity concealed in the label 'Black African', concluding by highlighting the policy implications of this vital research.

Land, Women, Youths, and Land Tools or Methods

Uchendu Eugene Chigbu, 2021-02-24 This book is a collection of Special Issue articles that aim to discern a people-centered pathway to solving land-based challenges in the context of land administration. It consists of 13 positively evaluated research articles. Each of the articles contributes to the large mosaic of knowledge on land methods (or tools) that are relevant to resolving land challenges that women and youths face. The book highlights 13 critical lessons on “Land, Women, Youths, and Land Tools or Methods.”

The Bioeconomy to 2030 Designing a Policy Agenda

OECD, 2009-04-15 Describes the current status of biotechnologies and, using quantitative analyses of data, it estimates biotechnological developments to 2015. Using other inputs, it creates scenarios to 2030.

Data Analysis and Decision Support

Daniel Baier, Reinhold Decker, Lars Schmidt-Thieme, 2006-05-06 It is a great privilege and pleasure to write a foreword for a book honoring Wolfgang Gaul on the occasion of his sixtieth birthday. Wolfgang Gaul is currently Professor of Business Administration and Management Science and the Head of the Institute of Decision Theory and Management Science, Faculty of Economics, University of Karlsruhe (TH), Germany. He is, by any measure, one of the most

distinguished and eminent scholars in the world today. Wolfgang Gaul has been instrumental in numerous leading research initiatives and has achieved an unprecedented level of success in facilitating communication among researchers in diverse disciplines from around the world. A particularly remarkable and unique aspect of his work is that he has been a leading scholar in such diverse areas of research as graph theory and network models, reliability theory, stochastic optimization, operations research, probability theory, sampling theory, cluster analysis, scaling and multivariate data analysis. His activities have been directed not only at these and other theoretical topics, but also at applications of statistical and mathematical tools to a multitude of important problems in computer science (e.g., web mining), business research (e.g., market segmentation), management science (e.g., decision support systems) and behavioral sciences (e.g., preference measurement and data mining). All of his endeavors have been accomplished at the highest level of professional excellence.

Data Mining for Intelligence, Fraud & Criminal Detection Christopher Westphal,2008-12-22 In 2004, the Government Accountability Office provided a report detailing approximately 200 government-based data-mining projects. While there is comfort in knowing that there are many effective systems, that comfort isn't worth much unless we can determine that these systems are being effectively and responsibly employed. Written by one of the most respected consultants in

the area of data mining and security, *Data Mining for Intelligence, Fraud & Criminal Detection: Advanced Analytics & Information Sharing Technologies* reviews the tangible results produced by these systems and evaluates their effectiveness. While CSI-type shows may depict information sharing and analysis that are accomplished with the push of a button, this sort of proficiency is more fiction than reality. Going beyond a discussion of the various technologies, the author outlines the issues of information sharing and the effective interpretation of results, which are critical to any integrated homeland security effort. Organized into three main sections, the book fully examines and outlines the future of this field with an insider's perspective and a visionary's insight. Section 1 provides a fundamental understanding of the types of data that can be used in current systems. It covers approaches to analyzing data and clearly delineates how to connect the dots among different data elements. Section 2 provides real-world examples derived from actual operational systems to show how data is used, manipulated, and interpreted in domains involving human smuggling, money laundering, narcotics trafficking, and corporate fraud. Section 3 provides an overview of the many information-sharing systems, organizations, and task forces as well as data interchange formats. It also discusses optimal information-sharing and analytical architectures. Currently, there is very little published literature that truly defines real-world systems. Although politics and other factors all play into how much one agency is willing to support the sharing of its resources, many now embrace the wisdom of that path. This book will provide those individuals with an understanding of what approaches are currently available and how they can be most effectively employed.

Handbook of Storage Tank Systems Wayne B.

Geyer, 2000-01-20 A survey of manufacturing and installation methods, standards, and specifications of factory-made steel

storage tanks and appurtenances for petroleum, chemicals, hydrocarbons, and other flammable or combustible liquids. It chronicles the trends towards aboveground storage tanks, secondary containment, and corrosion-resistant underground steel storage systems.

Stress, Coping and Depression Sheri L. Johnson,Adele M. Hayes,Tiffany M. Field,Neil Schneiderman,Philip McCabe,1999-12-01 Stress, Coping, and Depression is the latest volume based on the Annual Stress and Coping Conference held at the University of Miami. In this timely collection, leading researchers offer a variety of new perspectives on depression. They review the social, biological, and psychological processes that put adults and their children at risk and discuss innovative treatments grounded in empirical studies. Research findings are integrated across domains to construct more effective models of etiology and intervention. The contributors' thought-provoking ideas will provide inspiration for the ongoing efforts addressing the problems associated with this devastating disorder. Content highlights include: * novel information processing approaches to depression; * an overview of the neural pathways guiding moods; * empirical approaches for the treatment of bipolar disorders; * integrated models of biological and environmental influences on the transmission of depression to children; and * new perspectives on the relationship between personality and stress.

OECD Information Technology Outlook 2006

The New Global Road Map Pankaj Ghemawat,2018-05-01 What Globalization Now Means for Your Business Executives can no longer base their strategies on the assumption that globalization will continue to advance steadily. But how should

they respond to the growing pressures against globalization? And what can businesses do to control their destinies in these times of uncertainty? In *The New Global Road Map*, Pankaj Ghemawat separates fact from fiction by giving readers a better understanding of the key trends affecting global business. He also explains how globalization levels around the world are changing, and where they are likely to go in the future. Using the most up-to-date data and analysis, Ghemawat dispels today's most dangerous myths and provides a clear view of the most critical issues facing policy makers in the years ahead. Building on this analysis, with examples from a diverse set of companies across industries and geographies, Ghemawat provides actionable frameworks and tools to help executives revise their strategies, restructure their global footprints, realign their organizations, and rethink how they work with local governments and institutions. In our era of rising nationalism and increased skepticism about globalization's benefits, *The New Global Road Map* delivers the definitive guide on how to compete profitably across borders.

Conducting Educational Research Bruce W. Tuckman, 1978
This text focuses on analyzing and critically evaluating published research. The text includes a checklist, sample study, and research problems that are already worked out. This fifth edition features instructions and descriptions for running statistical tests using the personal computer and the software program SPSS. The text also includes expanded coverage of qualitative data collection methods. Smaller changes include more information on the ethical requirements for researchers and discussion of the use of meta-analysis and techniques for employing a wider range of research designs.
