**Global Value Chain Development Report 2021** Banque asiatique de développement, WORLD TRADE ORGANIZATION SECRETARIAT., 2022-01-25 A radical shift is underway in global value chains as they increasingly move beyond traditional manufacturing processes to services and other intangible assets. Digitization is a leading factor in this transformation, which is being accelerated by the coronavirus disease (COVID-19) pandemic. The Global Value Chain Development Report, the third of a biennial series, explores this shift beyond production. The report shows how the rise of services value chains offers a new path to development and how protectionism and geopolitical tensions, environmental risks, and pandemics are undermining the stability of global value chains and forcing their reorganization geographically. It is co-published by the WTO, the Asian Development Bank, the Research Institute for Global Value Chains at the University of International Business and Economics, the Institute of Developing Economies, and the China Development Research Foundation.

**Concepts in Enterprise Resource Planning** Ellen F. Monk, Bret J. Wagner, 2013 Show your students how to master and maximize enterprise resource planning (ERP) software, which continues to become more critical in business today, with the latest edition of Monk/Wagner's successful **CONCEPTS IN ENTERPRISE RESOURCE PLANNING**, International Edition. Equip students to use ERP tools to increase growth and productivity as they learn how to effectively combine an organization's numerous functions into one comprehensive, integrated system. **CONCEPTS IN ENTERPRISE RESOURCE PLANNING**, 4E, International Edition reflects the latest trends and updates in ERP software while demonstrating how to make the most of this important technology. The authors introduce the basic functional areas of business and how they are related. The book demonstrates how information systems that are not effectively integrated fail to support business functions and business processes that extend across functional area boundaries. By contrast, students clearly see how integrated information systems help organizations improve business process and provide managers with accurate, consistent, and current data for making informed strategic decisions. All-new sidebar cases and real examples throughout this edition not only thoroughly introduce the practical aspects of enterprise resource planning, but also prepare readers for ongoing ERP success in business today and tomorrow.

**Pathways for Peace** United Nations; World Bank, 2018-04-13 Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated that by 2030—the horizon set by the international community for achieving the Sustainable Development Goals—more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. **Pathways for Peace** is a joint United Nations†World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

**The State of Charter Schools** , 1999

**Successful Charter Schools** U. S. Department of Education, 2004-12-01 Twelve years after the first charter school was launched, the charter school movement is now entering its adolescence. Like many pre-teens, it's had its share of growing pains, but I am confident that it is about to hit a growth spurt. That is because charter schools are enormously popular with their primary clients --parents and students-- and because they are starting to show promising results in terms of student achievement. The basic tenets of charter schools--give them room to be innovative, hold them accountable for results, and let parents decide if they meet the needs of their children --are perfectly aligned with the historic No Child Left Behind Act (NCLB), which also focuses on accountability for results in return for more flexibility, and with providing more options for parents than ever before. One of the promises of charter schools is that they can serve as laboratories of innovation --they can be public education's R&D arm. Because they have greater autonomy than traditional public schools, and since they tend to attract pioneering educators, they can try out new approaches to education that, if proven effective, can be transplanted back into the larger public education system. It is in this spirit that we highlight eight of the most successful charter schools in the United States. These schools were chosen after an exhaustive national search. They were primarily selected because they have demonstrated success

over time in boosting student achievement. Surely many more charter schools could have been identified, and these should not be considered the best charter schools in the nation. Nevertheless, they are among the best, and each has much to teach other charterschools --and traditional public schools-- about teaching and learning, management strategies, staff development, and many other topics.

Human Missions to Mars Donald Rapp,2023-01-01 In this book, Donald Rapp looks at human missions to Mars from a technological perspective. He divides the mission into a number of stages: Earth's surface to low-Earth orbit (LEO); departing from LEO toward Mars; Mars orbit insertion and entry, descent and landing; ascent from Mars; trans-Earth injection from Mars orbit and Earth return. A mission to send humans to explore the surface of Mars has been the ultimate goal of planetary exploration since the 1950s, when von Braun conjectured a flotilla of 10 interplanetary vessels carrying a crew of at least 70 humans. Since then, more than 1,000 studies were carried out. This third edition provides extensive updating and additions to the last edition, including new sections, and many new figures and tables, and references.

**Post-Digital, Post-Internet Art and Education** Kevin Tavin,Gila Kolb,Juuso Tervo,2021-06-28 This open access edited volume provides theoretical, practical, and historical perspectives on art and education in a post-digital, post-internet era. Recently, these terms have been attached to artworks, artists, exhibitions, and educational practices that deal with the relationships between online and offline, digital and physical, and material and immaterial. By taking the current socio-technological conditions of the post-digital and the post-internet seriously, contributors challenge fixed narratives and field-specific ownership of these terms, as well as explore their potential and possible shortcomings when discussing art and education. Chapters also recognize historical forebears of digital art and education while critically assessing art, media, and other realms of engagement. This book encourages readers to explore what kind of educational futures might a post-digital, post-internet era engender.

*Late Antique Letter Collections* Cristiana Sogno,Bradley K. Storin,Edward J. Watts,2019-11-19 Bringing together an international team of historians, classicists, and scholars of religion, this volume provides the first comprehensive overview of the extant Greek and Latin letter collections of late antiquity (ca. 300-600 c.e.). Each chapter addresses a major collection of Greek or Latin literary letters, introducing the social and textual histories of each collection and examining its assembly, publication, and transmission. Contributions also reveal how collections operated as discrete literary genres, with their own conventions and self-presentational agendas. This book will fundamentally change how people both read these texts and use letters to reconstruct the social history of the fourth, fifth, and sixth centuries.

### **Trend of Employment ,1935**

*Automotive Systems and Software Engineering* Yanja Dajsuren,Mark van den Brand,2019-07-17 This book presents the state of the art, challenges and future trends in automotive software engineering. The amount of automotive software has grown from just a few lines of code in the 1970s to millions of lines in today's cars. And this trend seems destined to continue in the years to come, considering all the innovations in electric/hybrid, autonomous, and connected cars. Yet there are also concerns related to onboard software, such as security, robustness, and trust. This book covers all essential aspects of the field. After a general introduction to the topic, it addresses automotive software development, automotive software reuse, E/E architectures and safety, C-ITS and security, and future trends. The specific topics discussed include requirements engineering for embedded software systems, tools and methods used in the automotive industry, software product lines, architectural frameworks, various related ISO standards, functional safety and safety cases, cooperative intelligent transportation systems, autonomous vehicles, and security and privacy issues. The intended audience includes researchers from academia who want to learn what the fundamental challenges are and how they are being tackled in the industry, and practitioners looking for cutting-edge academic findings. Although the book is not written as lecture notes, it can also be used in advanced master's-level courses on software and system engineering. The book also includes a

number of case studies that can be used for student projects.

**Interwoven Wild** Don Gayton,2007 Interwoven Wild: An Ecologist Loose In the Garden begins with an intimate look at Don Gayton in his BC garden with his dog Spud. Striking a series of premises - the first one being that gardening is essentially an irrational act - he logically and humorously begins to unravel the work and rituals of gardening. Engaging the reader with real gardening experiences, Gayton takes us on the microscopic steps of a gardening season and his interest in ecological succession. While commenting on the inter-reliance of species, types of soil, why weeds invade, how foreign planets appear, insects, disease and frost, he also speculates on gardeners -- their needs to landscape, to purchase specialized tools, to use chemicals, to emotionally bond with trees, shrubs, flowers and vegetables. The back story of Interwoven Wild is much more universal. In it Gayton uses his experiences as a working field ecologist to place the garden in the larger context of our present natural world. By interlocking artists such as Monet and Caravaggio; writers such as Walt Whitman, Thoreau, Emily Dickenson, and Ann Dowden; park designer Frederick Law Olmstead, and landscape architect Christopher Alexander, Gayton reminds us that the garden has long held sway in the creative consciousness. His brief excursions into history, whether tracing the apple back to Kazakhstan, explaining how the tulip made its way from Turkey to Holland, or how the industrialist Baylock's introduction of a smuggled Asian cherry tree destroyed the BC cherry orchids fascinate as well as instruct. For Gayton, the garden is a primordial human urge -- a gift, celebration, and revelation buried in human psyche, marked in our collective mythologies --a kind of magical glue binding world culture, science and economics.

**Sedimentary Geology of Mars** John P. Grotzinger,Ralph Edward Milliken,2012-01-01 Often thought of as a volcanically dominated planet, the last several decades of Mars exploration have revealed with increasing clarity the role of sedimentary processes on the Red Planet. Data from recent orbiters have highlighted the role of sedimentary processes throughout the geologic evolution of Mars by providing evidence that such processes are preserved in a rock record that spans a period of over four billion years.
