Measuring Gender Equality Josefina Posadas, Pierella Paci, Zurab Sajaia, Michael Lokshin, 2017-04-10 Gender equality is a core development objective in its own right and also smart development policy and business practice. No society can develop sustainably without giving men and women equal power to shape their own lives and contribute to their families, communities, and countries. And yet, critical gender gaps continue to exist in all countries and across multiple dimensions. The gender module of the World Bank's ADePT software platform produces a comprehensive set of tables and graphs using household surveys to help diagnose and analyze the prevailing gender inequalities at the country level and over time. This book provides a step-by-step guide to the use of the ADePT software and an introduction to its basic economic concepts and econometric methods. The module is organized around the framework proposed by the World Development Report 2012: Gender Equality and Development. It covers gender differences in outcomes in three primary dimensions of gender equality: human capital (or endowments), economic opportunities, and voice and agency. Particular focus is given to the analysis and decomposition techniques that allow for further exploring of gender gaps in economic opportunities.

Handbook of Multilingualism and Multiculturalism Geneviève Zarate, 2011 Built around the concept of linguistic and cultural plurality, this book defines language as an instrument of action and symbolic power. Plurality is conceived here as : a complex array of voices, perspectives and approaches that seeks to preserve the complexity of the multilingual and multicultural enterprise, including language learning and teaching ; a coherent system of relationships among various languages, research traditions and research sites that informs qualitative methods of inquiry into multilingualism and its uses in everyday life ; a view of language as structured sociohistorical object, observable from several simultaneous spatiotemporal standpoints, such as that of daily interactions or that which sustains the symbolic power of institutions. This book is addressed to teacher trainers, young researchers, decision makers, teachers concerned with the role of languages in the evolution of societies and educational systems. It aims to elicit discussion by articulating practices, field observations and analyses based on a multidisciplinary conceptual framework.
