Health Services in Latin America and Asia José Núñez del Arco, 2001 On either side of the globe, poor people often do not have access to the health services they need. Improvements in health care systems in Asia have lagged behind economic development, and progress in expanding health coverage in Latin America has been skewed across income levels. *Health Services in Latin America and Asia* takes a close look at how countries in both regions provide health care services, including the strategies that work and the problems that persist. The book documents encouraging progress in Bolivia, Brazil, China and Vietnam, and important preventive care programs in Central America and Thailand. It also examines health services in Chile, Colombia, the Philippines and Malaysia, as well as the health system and insurance model in Japan. Even though public and preventive health require specific and sustained allocations, both regions continue to use health insurance and other supply mechanisms to expand health service coverage. The book recommends broadening the supply of services through family doctors and community health workers, an alternative approach that would likely improve the equity, efficiency and sustainability of services.

Ergonomics for Improved Productivity Mohammad Muzammil, Abid Ali Khan, Faisal Hasan, 2021-03-23 p= This highly informative and carefully presented book focuses on the fields of ergonomics/human factors and discusses the future of the community vis-à-vis health problems, productivity, aging, etc. Ergonomic intercession must be seen in light of its effect on productivity because ergonomic solutions will improve productivity as the reduction of environmental stressors, awkward postures and efforts lead to a reduction in task execution time. The book provides promising evidence that the field of ergonomics continues to thrive and develop deeper insights into how work environments, products and systems can be developed to meet needs, demands and limitations of humans and how they can support productivity improvements. Some of the themes covered are anthropometry and workplace design, biomechanics and modelling in ergonomics, cognitive and environmental ergonomics, ergonomic intervention and productivity, ergonomics in transport, mining, agriculture and forestry, health systems, work physiology and sports ergonomics, etc. This book is beneficial to academicians, policymakers and the industry alike. ^

Issues in Correctional Health Rick Ruddell,Mark Tomita,2008-11-01 This book focuses on the difficulties that medical and health care providers, correctional administrators, and policy makers face in delivering care to incarcerated juveniles and adults. Sometimes the demands on these practitioners can be overwhelming. Each year in the United States thousands of infants are born behind bars, and at least 3,000 inmates will die in state prisons alone. Practitioners confront an array of serious health care problems, from providing emergency care, preventing the spread of communicable diseases, managing chronic illnesses, and preparing for pandemics. A significant concern is that inmates with untreated health problems pose a significant challenge to community health. Over 14 million arrestees cycle through juvenile facilities or county jails, and some 650,000 persons are released from prison each year. As a result, there has been increased attention focusing on the connections between correctional and community health. The contributors to this volume examine these challenges, highlight successful medical and health care programs, and outline an agenda for future research.
