Le Football Russ Crawford,2016-08-01 There are two kinds of football in France. American football was first played in France in 1909 during the cruise of the Great White Fleet. Then, during World War I, the American military shipped footballs, helmets, and shoulder pads alongside rifles and ammunition to the western front. A 1938 tour of two teams lead by Jim Crowley of Fordham University maintained the game until World War II, when the arrival of millions of young Americans in France motivated the U.S. military to sponsor several bowl games. During the 1950s and 1960s, when the United States occupied bases in France during the Cold War, American soldiers, sailors, and airmen played more than a thousand football games. When France withdrew from NATO, however, American bases were forced to close, leaving American football without a natural home on Gallic shores. In the 1970s American college and semi-pro teams tried once more to generate interest in the game among French nationals through a series of tours, but until a French physical education instructor vacationed in Colorado and brought equipment back to France, there was little local enthusiasm for the sport. On the back of that vacation, and from one team in Paris, organized American football in France grew to

more than 215 teams with more than 22,000 active players today. Le Football tackles the struggles and successes of American football in France and discusses how, unlike baseball and basketball, football has never been an overt instrument of American cultural influence. Russ Crawford keeps the chains moving as he shows how the modern, homegrown sport developed largely independent of American encouragement into a small but successful culture.

Security and Development Robert Picciotto,Rachel Weaving,2013-10-28 The new contributions in this book, by acknowledged leaders in the field, examine the delivery of effective aid under fire, and securing the peace in environments where governance is fragile. They bridge the cultural divide between the security and development professions at a time of unprecedented global economic integration, geopolitical turbulence, and novel threats to international peace and security. More than a billion people live in countries where governance is weak, poverty is rampant, and economies are depressed. Failed and frail states provide ideal breeding grounds for civil strife, criminality, and new wars that target civilians, use children as combatants, and commit massive human rights violations. The new security risks loom within national borders, while the capacity of the international community to intervene 'behind borders' remains inadequate. Policy making for security still relies heavily on military responses. Yet military responses cannot address, and may even worsen, the social and cultural antecedents of civil strife and social resentment. Similarly, development aid policy and practice are poorly adapted to the new realities of frail governance and insecure operating environments in aid recipient countries. This book was previously published as a special issue of the leading journal Conflict, Security and Development.
