The Hacker's Dictionary Eric S. Raymond, 2017-06-19

This document is a collection of slang terms used by various subcultures of computer hackers. Though some technical material is included for background and flavor, it is not a technical dictionary; what we describe here is the language hackers use among themselves for fun, social communication, and technical debate.

Environmental Engineering Dictionary and Directory Thomas M. Pankratz, 2000-09-22 Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.

GMPLS Adrian Farrel,Igor Bryskin,2005-12-20 The last two years have seen significant developments in the standardization of GMPLS and its implementation in optical and other networks. GMPLS: Architecture and Applications brings you completely up to date, providing the practical information you need to put the growing set of GMPLS-supported services to work and manage them effectively. This book begins by defining GMPLS's place in a transport network, leveraging your knowledge of MPLS to give you an understanding of this radically new control plane technology. An overview of GMPLS protocols follows, but the real focus is on what comes afterwards: in-depth examinations of the architectures underpinning GMPLS in real-world network environments and current and emerging GMPLS applications. This one-of-a-kind resource delivers immensely useful information for software architects, designers and programmers, hardware developers, system testers, and network operators--and also for managers and other decision-makers. Written by two industry researchers at the forefront of the development of GMPLS. Provides a practical look at GMPLS protocols for signaling, routing, link and resource management, and traffic engineering. Delves deep into the world of GMPLS applications, including traffic engineering, path computation, layer one VPNs, point-to-

multipoint connectivity, service management, and resource protection. Explores three distinct GMPLS control plane architectures: peer, overlay, and hybrid, and explains the GMPLS UNI and NNIs. Explains how provisioning challenges can be met in multi-region networks and details the provisioning systems and tools relied on by the GMPLS control plane, along with the standard MIB modules used to manage a GMPLS system.

**Hazard Mitigation Grant Program Desk Reference
(FEMA 345)** Federal Emergency Management
Agency,2013-02-01 FEMA's Hazard Mitigation Grant
Program is a powerful resource in the combined effort by
Federal, State, and local government, as well as private
industry and homeowners, to end the cycle of repetitive
disaster damage. The Robert T. Stafford Disaster Relief and
Emergency Assistance Act was passed on November 23,
1988, amending Public Law 93-288, the Disaster Relief Act
of 1974. The Stafford Act included Section 404, which
established the Hazard Mitigation Grant Program. In 1993,
the Hazard Mitigation and Relocation Act amended Section
404 to increase the amount of HMGP funds available and
the cost-share to 75 percent Federal. This amendment also
encouraged the use of property acquisition and other non-
structural flood mitigation measures. In an effort to
streamline HMGP delivery, FEMA encourages States to
develop their mitigation programs before disaster strikes.
States are adopting a more active HMGP management role.
Increased capabilities may include: Conducting

comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils. Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between “predisaster” and “post-disaster” time periods, and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster. Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of this Desk Reference is to: Provide comprehensive information about FEMA's Hazard Mitigation Grant Program (HMGP); Increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts; and Encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included, along with appendices that amplify selected

aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate specific information.

What the hell happened to my brain? Kate

Swaffer, 2016-01-21 Kate Swaffer was just 49 years old when she was diagnosed with a form of younger onset dementia. In this book, she offers an all-too-rare first-hand insight into that experience, sounding a clarion call for change in how we ensure a better quality of life for people with dementia. Kate describes vividly her experiences of living with dementia, exploring the effects of memory difficulties, loss of independence, leaving long-term employment, the impact on her teenage sons, and the enormous impact of the dementia diagnosis on her sense of self. Never shying away from difficult issues, she tackles head-on stigma, inadequacies in care and support, and the media's role in perpetuating myths about dementia, suggesting ways in which we can include and empower people with the diagnosis. She also reflects on the ways in which her writing and dementia advocacy work have taken her on a process of self-discovery and enabled her to develop a new and meaningful personal identity. Kate's

powerful words will challenge misconceptions about dementia, and open our eyes to new ways of supporting people with the diagnosis. A must read for people with dementia and their families as well as for professionals and carers.
