Cristina Berna, Eric Thomsen

The Unrecognised Peril S Utham Kumar Jamadhagni, 2014-03-01 Acknowledging the importance of non traditional security in the wider debate, this book looks at one significant aspect namely, environmental security. The book discusses different issues of theoretical and practical import through various chapters that deal with the general need for study on human and environmental security, its degradation due to a variety of factors like climate change, war, pollution and resource utilisation. Moving from a regional South Asian focus the book narrows down to specific cases within India and the region at large to highlight the widespread effect anthropogenic factors have had on environmental security. A diverse set of articles from many authors has meant a comprehensive perspective on a vital global and national concern.

Hiroshige 53 Stations of the Tokaido Cristina Berna, Eric Thomsen, 2023-07-07 This was the most popular print series ever made in Japan. It was even more popular series ever made in Japan. It was even more popular than the Hokusai series Thirty-six Views of Mount Fuji, which had been recently published and which had influenced Hiroshige tremendously (ISBN 9783756844104). There were 53 post stations along this important road, apart from the start and terminus, in all 55 prints, which are all here in the order from Edo to Kyoto, as in the Hoeido edition (1833-34).

West Asia and the Region Rajendra M. Abhyankar, 2008 Contributed articles presented at the National Conference on West Asia and the Region: Defining India's Role held at the Centre for West Asian Studies on Aug. 21-22, 2006.

Keisai Eisen A Tōkaidō Board Game of Courtesans Cristina Berna, Eric Thomsen, Introduction Keisai Eisen (1790 -1848) is especially known for his bijin-ga, pretty women, and landscapes. He is well known for his participation in the series 69 stations of the Nakasendō together with Hiroshige. The series A Tōkaidō Board Game of Courtesans, Fifty-three Pairings in the Yoshiwara use the Tōkaidō with landscape inserts as an excuse for showing courtesans and geisha, bijin-ga, to skirt the censorship. It was published 1821-1823. His bijin-ga are considered to be masterpieces of the decadent Bunsei Era (1818-1830). Most of them have impressive hairdo with many ornamental hairpins and combs. Their dress is extravagant with beautiful patterns and sublime embroideries. Their faces are elongated squares with long noses and small pouted painted mouths. Courtesans were desirable for their rich and splendid attire, not so much for their beauty and their names were actually like trademarks for a series of girls performing the name role with the brothel in question.

The Glory of God's Light: Connect with God Through His Light, Love, and Word Brother Raymond, 2020-05-19 Darkness represents anything that is inconsistent with God's nature, character, and manifestation. It appears humanity has lost its connection with God, but finding a relationship with God can bring us into the light of His love. In *The Glory of God's Light*, Brother Raymond shows how to have a relationship with God through His Light, His Love, and His Word. Brother Raymond digs deeper into Scripture and takes examples from his own life to show how God's light is present in every circumstance and points those in darkness into the glory of God's light. Could you relish a great relationship with God, our Heavenly Father? Yes, you can!

Where God Was on 9/11 Oluwole J. Odeyemi, 2005-08-18 The book is a classic piece that revealed critically and comprehensively on the mysteries and the spiritual underpinnings of the world-changing terror events of 9/11. It promises to be a point by point, blow by blow biblical analysis that are reality related, and which cannot be doubted by even the most agnostic. The book also endeavoured to shed light on many other topical issues which has remained bizarre or ever since been shrouded in mystery vis a vis biblical accounts and humanity. Such other issues include the truth about the Jewish Holocaust, the angelically induced human breeding experiments in the pre-Deluvian age, the unseverable umbilical cord that tied the USA with Isreal, and as well the denial by God of all the omni-principles that had been fraudlently ascribed unto Him by man and his reckless philosophy. It promises to be a most intriguing journey ever made in the world of knowledge. Please visit one of my sites for more details: woleodeyemi2005@yahoo.com godon911@yahoo.co.uk

Military Nanotechnology Jürgen Altmann, 2007-05-07 With revolutionary changes in nanotechnology (NT) now on the horizon, many countries have started major research and development (R&D) programmes, which are mainly civilian. Often overlooked are military R&D programmes - in particular those of the US government. This is the first systematic and comprehensive presentation of the potential military applications of NT. In ten to twenty years, these applications may include extremely small computers, robots, missiles, satellites, launchers and sensors. They may also provide lighter and stronger materials for vehicles and weapons, implants in soldiers' bodies, metal-free firearms, autonomous fighting systems, and smaller chemical and biological weapons. These potential uses raise

strong concerns. This assessment is made from a viewpoint of international security, considering the new criteria of dangers for arms control and the international law of warfare, dangers for stability through potential new arms races and proliferation, and dangers for humans and society. Some military applications, such as computers, will be so close to civilian uses that limits are impractical. Others, such as sensors for biological-warfare agents, may contribute to stronger protection against terrorist attacks and better verification of compliance with arms-control treaties. For preventive limitation of these new technologies, specific approaches are proposed that balance positive civilian uses and take into account verification of compliance, with a view to international peace and security, not national military strength. This book will be of great interest to scholars of military technology, non-lethal weapons, disarmament and security studies in general.

universal value and importance, this Second Edition will undoubtedly be considered a classic, if only because it will serve as a sole and invaluable resource on the subject.” Plant Science Bulletin, 2009

Regulation and Instability in U.S. Commercial Banking Jill M. Hendrickson, 2010-12-08 The historical response to bank crises has always been more regulation. A pattern emerges that some may find surprising: regulation often contributes to bank instability. It suppresses competition and effective response to market changes and encourages bankers

to take on additional risk. This book offers a valuable history lesson for policy makers.

Fight Sports and American Masculinity Christopher David Thrasher, 2015-06-18

Throughout America's past, some men have feared the descent of their gender into effeminacy, and turned their eyes to the ring in hopes of salvation. This work explains how the dominant fight sports in the United States have changed over time in response to broad shifts in American culture and ideals of manhood, and presents a narrative of American history as seen from the bars, gyms, stadiums and living rooms of the heartland. Ordinary Americans were the agents who supported and participated in fight sports and determined its vision of masculinity. This work counters the economic determinism prevalent in studies of American fight sports, which overemphasize profit as the driving force in the popularization of these sports. The author also disputes previous scholarship's domestic focus, with an appreciation of how American fight sports are connected to the rest of the world.

Rooted Again Lillian C. Smith, 2022-11-14 Many established congregations are in need of revitalization. It is as if in all of the good efforts of ministry the mission has been forgotten. The mission of the church is to make disciples of Jesus Christ for the transformation of the world. Disciple making, in many churches, has diminished, which was both caused by and resulted in a loss of understanding of the mission of the church and a low prioritization of reaching new people for Jesus Christ. This book will provide insight into some of the causes of the situation, identify possible spiritual hindrances to ministry, and offer strategies for the congregation to reclaim its spiritual foundation and calling.

Contentious Geographies Maxwell T. Boykoff, 2016-05-13 The human-environment

relationship - intimately intertwined and often contentious - is one of the most pressing concerns of the 21st century. Explored through an array of critical approaches, this book brings together case studies from across the globe to present significant cutting-edge research into political ecologies as they relate to multi-form contestations over environments, resources and livelihoods. Covering a range of issues, such as popular discourses of environmental 'collapse', climate change, water resource struggles, displacement, agro-food landscapes and mapping technologies, this edited volume works to provide a broad and critical understanding of the narratives and policies more subtly shaping and being shaped by underlying environmental conflicts. By exploring the power-laden processes by which environmental knowledge is generated, framed, communicated and interpreted, *Contentious Geographies* works to reveal how environmental conflicts can be (re)considered and thus (re)opened to enhance efforts to negotiate more sustainable environments and livelihoods.
