Handbook on Wildlife Law Enforcement in India Samir Sinha,2010 This is an illustrated book that points out wildlife crimes conducted in India -- it shows how poachers work, their mechanisms and how officials can control and curb wildlife crime -- which accounts for a shockingly large percentage of illegal trade and crime in the world.

Global Leaders for the Twenty-First Century Michael J. Marquardt,Nancy O. Berger,2012-02-01 Identifies eight new competencies that will be required by twenty-first century leaders, and profiles twelve up-and-coming leaders who exemplify them. New times demand new kinds of leaders. In a technological workplace which may be more virtual than physical, where bytes of information and cyberspace need to be managed more than people, leaders will have to thrive amidst high chaos and continuous change. *Global Leaders for the Twenty-First Century* profiles twelve such leaders from business and government and discusses eight key attributes necessary for successful leadership in the future. Based upon extensive research and experiences with top leaders from around the world, the authors have identified the eight critical competencies needed by twenty-first century leaders: (1) a global mindset, (2) learning and teaching skills, (3) a servant-steward relationship to one's organization, (4) systems thinking, (5) spirituality and a concern for ethics, (6) a willingness to embrace new technologies, (7) innovation and risk-taking, and (8) vision-building. Twelve of the top up-and-coming leaders from around the world who possess these attributes are profiled. They include the Fortune magazine's first two Asian leaders of the year (CEOs Nobuyuki Idei of Sony and Cheong Choong Kong of Singapore Airlines), two highly acclaimed political leaders (President Mary McAleese of Ireland and United Nations Secretary-General Kofi Annan), the leading lights in the technology field (CEOs Jorma Ollila of Nokia in Finland and John Chambers of Cisco Systems in the United States), pioneer leaders for women (Carol Bartz, CEO of AutoDesk) and minorities (Ken Chenault, CEO-designate of American Express), the world's most innovative leader (Ricardo Semler, owner of Semco in Brazil), a leader in recognizing the importance of community service and employee partnership (Henry Carris, Carris Community of Companies), the director of one of the top executive development programs in the world (Felipe Alfonso, Asian Institute of Management), and a radical new thinker in the energy field (John Browne, CEO of BP Amoco). Michael J. Marquardt is the author of fourteen books, including *Building the Learning Organization*, selected as Book of the Year by the Academy of Human Resource Development. He is Professor of Human Resource Development and Program Director of Overseas Programs at George Washington University and President of Global Learning Associates. Nancy O. Berger is Assistant Professor of Human Resource Development at George Washington University and President of Training for Performance, Inc.

Animal and Translational Models for CNS Drug Discovery Robert A. McArthur,Franco Borsini,2008-11-27 *Animal and Translational Models for CNS Drug Discovery* combines the experience of academic, clinical and pharmaceutical neuroscientists in a unique collaborative approach to provide a greater understanding of the relevance of animal models of neuropsychiatric disorders and their role as translational tools for the discovery of CNS drugs being developed for the treatment of these disorders. The focus of this three-volume series of essays is to present a consensual picture of the translational value of animal models from leading experts actively involved in the use of animal models for understanding fundamental neurobiology of CNS disorders and the application of this knowledge to CNS drug discovery, and clinical investigators involved in clinical trials, drug development and eventual registration of novel pharmaceuticals. Each volume of the *Animal and Translational Models for CNS Drug Discovery* series is dedicated to the development and use of animal models in key therapeutic areas in psychiatric, neurologic and reward deficit disorders. Each volume has introductory chapters expressing the view of the role and relevance of animal models for CNS drug discovery and development from the perspective of (a) academic basic neuroscientific research, (b) applied pharmaceutical drug discovery and development, and (c) issues of clinical trial design and regulatory agencies limitations. Each volume examines the rationale, use, robustness and limitations of animal models in relevant therapeutic areas and discusses the use of animal models for target identification and validation. The clinical relevance of animal models is discussed in terms of major limitations in cross-species comparisons, clinical trial design of drug candidates, and how clinical trial endpoints could be improved. The aim of this series of volumes on *Animal and Translational Models for CNS Drug Discovery* is to identify and provide common endpoints between species that can serve to inform both the clinic and the bench with the information needed to accelerate clinically-effective CNS drug discovery. - Provides clinical, academic, government and industry perspectives fostering integrated communication between principle participants at all stages of the drug discovery process - Critical evaluation of animal and translational models improving transition from drug discovery and clinical development - Emphasizes what results mean to the overall drug discovery process - Explores issues in clinical trial design and conductance in each therapeutic area - Each volume is available for purchase individually.

Animal and Translational Models for CNS Drug Discovery: Psychiatric Disorders Robert A. McArthur,Franco Borsini,2008-11-17 Psychiatric Disorders is written for researchers in both academia and the pharmaceutical industry who use animal models in research and development of drugs for psychiatric disorders such as anxiety, obsessive-compulsive disorder, depression, schizophrenia, bipolar disorder, ADHD, and autistic spectrum disorder. Psychiatric Disorders has introductory chapters expressing the view of the role and relevance of animal models for drug discovery and development for the treatment of psychiatric disorders from the perspective of (a) academic basic neuroscientific research, (b) applied pharmaceutical drug discovery and development, and (c) issues of clinical trial design and regulatory agencies limitations. Each volume examines the rationale, use, robustness and limitations of animal models in each therapeutic area covered and discuss the use of animal models for target identification and validation. The clinical relevance of animal models is discussed in terms of major limitations in cross-species comparisons, clinical trial design of drug candidates, and how clinical trial endpoints could be improved. The aim of this series of volumes on Animal and Translational Models for CNS Drug Discovery is to identify and provide common endpoints between species that can serve to inform both the clinic and the bench with the information needed to accelerate clinically-effective CNS drug discovery. This is the first volume in the three volume-set, Animal and Translational Models for CNS Drug Discovery 978-0-12-373861-5, and is also available for purchase individually. Provides clinical, academic, government and industry perspectives fostering integrated communication between principle participants at all stages of the drug discovery process Critical evaluation of animal and translational models improving transition from drug discovery and clinical development Emphasizes what results mean to the overall drug discovery process Explores issues in clinical trial design and conductance in each therapeutic area Psychiatric Disorders is available for purchase individually.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Reports of General MacArthur Douglas MacArthur,Supreme Commander for the Allied Powers,Charles Andrew Willoughby,1994

Statistics with Confidence Douglas Altman,David Machin,Trevor Bryant,Martin Gardner,2013-06-03 This highly popular introduction to confidence intervals has been thoroughly updated and expanded. It includes methods for using confidence intervals, with illustrative worked examples and extensive guidelines and checklists to help the novice.

Web Site Source Book ,2002 A guide to major U.S. businesses, organizations, agencies, institutions, and other information resources on the World Wide Web.

Reports of General MacArthur: MacArthur in Japan: The Occupation: Military Phase. Volume 1 Supplement Douglas MacArthur,Harold K. Johnson,2012-09-01 With full color maps. From the foreword: The Reports of General MacArthur include two volumes being published by the Department of the Army in four books reproduced exactly as they were printed by General MacArthur's Tokyo headquarters in 1950, except for the addition of this foreword and indexes. Since they were Government property, the general turned over to the Department in 1953 these volumes and related source materials. In Army and National Archives custody these materials have been available for research although they have not been easily accessible. While he lived, General MacArthur was unwilling to approve the reproduction and dissemination of the Reports, because he believed they needed further editing and correction of some inaccuracies. His passing permits publication but not the correction he deemed desirable. In publishing them, the Department of the Army must therefore disclaim any responsibility for their accuracy. But the Army also recognizes that these volumes have substantial and enduring value, and it believes the American people are entitled to have them made widely available through government publication. Volume I Supplement describes the military phase of the occupation through December 1948, reporting events not treated elsewhere in American publications.

Women in the labor force ,2006

International Human Rights Law and Crimes Against Women in Turkey Ayşe Güneş,2020-12-20 This book evaluates the effectiveness of current international human rights law, and in particular the recent Istanbul Convention, in eradicating so-called honour killings in Turkey. So-called ‘honour killings’ have become an issue of concern for the international community. In Turkey, in particular, the practice still exists despite the adoption of the relevant human rights instruments. The book argues that the improvement of the status of women in Turkey in accordance with gender equality as well as the application of the principle of state due diligence, both requirements of the Istanbul Convention and international human rights law, are fundamental means towards eradicating the killing of women in the name of ‘honour’. Using feminist approaches, in particular the intersectionality approach, the study looks at the application of such standards as well as the current obstacles. Through such a lens, the study discusses the strengths and weaknesses of the Turkish Constitution, Turkish Civil Code, Turkish Penal Code and Law to Protect Family and Prevent Violence Against Women and questions the judicial approach to the implementation of the women’s right to life. It identifies the lacunae in the Turkish legislation that allow inadequate legal protection for women and the inconsistency of the judicial approach to the definition of the so-called honour killings in the judgements. The study then recommends some concrete amendments to the relevant legal provisions in order to better reflect the international framework and the feminist approaches. The book will be a valuable resource for academics, researchers and policy-makers in the areas of international human rights law and feminist legal theory.

Underwater & Underground Bases Richard Sauder Ph.D.,2014-01-22 Dr. Richard Sauder’s second book Underwater and Underground Bases is an explosive, eye-opening sequel to his best-selling, Underground Bases and Tunnels: What is the Government Trying to Hide? Dr. Sauder lays out the amazing evidence and government paper trail for the construction of huge, manned bases offshore, in mid-ocean, and deep beneath the sea floor! Bases big enough to secretly dock submarines! Official United States Navy documents, and other hard evidence, raise many questions about what really lies 20,000 leagues beneath the sea. Many UFOs have been seen coming and going from the world’s oceans, seas and lakes, implying the existence of secret underwater bases. Hold on to your hats: Jules Verne may not have been so far from the truth, after all! Dr. Sauder also adds to his incredible database of underground bases onshore. New, breakthrough material reveals the existence of additional clandestine underground facilities as well as the surprising location of one of the CIA’s own underground bases. Plus, new information on tunneling and cutting-edge, high speed rail magnetic-levitation (MagLev) technology. There are many rumors of secret, underground tunnels with MagLev trains hurtling through them. Is there truth behind the rumors? Underwater and Underground Bases carefully examines the evidence and comes to a thought provoking conclusion!
