Born to Prophecy Hakeem Collins,2013-11-05 A comprehensive guide to the gift of prophecy.

Principles of Mathematics in Operations Research Levent Kandiller,2006-12-18 This book is a comprehensive survey of the mathematical concepts and principles of industrial mathematics. Its purpose is to provide students and professionals with an understanding of the fundamental mathematical principles used in Industrial Mathematics/OR in modeling problems and application solutions. All the concepts presented in each chapter have undergone the learning scrutiny of the author and his students. The illustrative material throughout the book was refined for student comprehension as the manuscript developed through its iterations, and the chapter exercises are refined from the previous year's exercises.

Reform and Development of Educational System Ling Li,Jiafu Zheng,Zeyuan Yu,2017-12-29 In this book, the authors pursue quantitative, qualitative and mixed methods approaches, conducting hundreds of large-scale surveys and in-depth interviews in 679 schools, 67 counties and 13 provinces throughout China. They also conducted longitudinal case studies in five municipalities and provinces to better reflect education reform and development in different education levels or sectors. The authors used national statistical data from the 1970s to 2013, as well as a wealth of first-hand documents and data from different levels of educational departments in schools, counties, municipalities and provinces and “grass-roots” input from 253 teachers, principals, education administrators and students. The authors applied SEM, HLM, GCM, and many other statistic techniques and qualitative methods to analyse the data and materials in order to explore correlations between development and reform, internal and external factors in educational reforms, as well as strategies for resolving core issues. Their findings indicate that institutional reforms concerning financial investments, allocation of teaching resources, allocation of facilities, curricula design systems, and political, economic, social system reforms all contribute to the development of different levels and types of education in different modes and to different extents. Topics of particular interest include five case studies conducted in five different municipalities and provinces that showcase the nation’s education reform and development in a specific model and on the basis of substantial data. Further, milestone events regarding educational reform and development that have taken place in China since 2013 are examined. As a unique feature, the book also includes 353 diagrams and tables on the development and reform of education in China, offering extensive and up-to-date information on a part of the world that often remains difficult to access. The book provides an expansive and in-depth examination of the nation’s education reform and development, from its historical roots to the present, and combining official and “grass-roots” standpoints. It will help readers to understand why and how Chinese education could lead students to win in international comparisons like PISA while at the same time often being the target of scathing criticism, as well as how the nation is now working to provide a better education to serve the world’s largest population.

Translating and Interpreting Justice in a Postmonolingual Age Esther Monzó-Nebot,Juan Jiménez-Salcedo,2019-01-15 Postmonolingualism, as formulated by Yildiz, can be understood to be a resistance to the demands of institutions that seek to enforce a monolingual standard. Complex identities, social practices, and cultural products are increasingly required to conform to the expectancies of a norm that for many is no longer considered reasonable. Thus, in this postmonolingual age, it is essential that the approaches and initiatives used to counter these demands aim not only to understand these hyper-diverse societies but also to deminoritize underprivileged communities. ‘Translating and Interpreting Justice in a Postmonolingual Age’ is an attempt to expand the limits of postmonolingualism as a framework for exploring the possibilities of translation and interpreting in mediating between the myriad of sociocultural communities

that coexist today. Challenging assumptions about the role of translation and interpreting, the contributions gathered in this volume focus on intercultural and intergroup understanding as a process and as a requisite for social justice and ethical progress. From different but complementary approaches, practical experiences and existing legal and policy frameworks are scrutinized to highlight the need for translation and interpreting policies in legal and institutional contexts in multicultural societies. Researchers and policymakers in the fields of translation and interpreting studies, multiculturalism and education, and language and diversity policies will find inspiring perspectives on how legal and institutional translation and interpreting can help pursue the goals of democratic societies.

The Myth of the Oil Crisis Robin M. Mills, 2008-08-30 With oil around \$100 a barrel, drivers wince whenever they pull into the gas station and businesses watch their bottom lines shrink. Watch out, say doomsayers, it will only get worse as oil dries up. It's a plausible argument, especially considering the rate at which countries like China and India are now sucking up oil. Even more troubling, the world's largest oil fields sit in geopolitical hotspots like Iran and Iraq. Some believe their nations need to secure remaining supplies using military force, while others consider dwindling supplies a blessing that will help solve the problem of global warming. But wait—is it really the end of oil? Absolutely not, says geologist, economist, and industry-insider Robin Mills. There is no other book by an industry insider that effectively counters the peak oil theory by showing where and how oil will be found in the future. There also is no other book by an insider that lays out an environmentally and geopolitically responsible path for the petroleum industry and its customers. *The Myth of the Oil Crisis*, written in a lively style but with scientific rigor, is thus a uniquely useful resource for business leaders, policymakers, petroleum industry professionals, environmentalists, and anyone else who consumes oil. Best of all, it offers an abundance of one commodity now in short supply: hope for the future.

Kirche, Jugend, Internet Daniel Faßhauer, 2015-01-01 Konfirmation – Kaum ein kirchliches Angebot erreicht einen derart hohen Anteil an Jugendlichen. Doch mit dem feierlichen Abschluss endet vielfach auch die Beteiligung und aktive Mitarbeit der Heranwachsenden. Die Dissertation „Kirche, Jugend, Internet“ untersucht auf Basis einer umfassenden empirischen Erhebung, wie dieser Bruchstelle nach der Konfirmation wirkungsvoll begegnet werden kann. Dahingehend wird das Internet als derzeit zentrales Leitmedium mit seinen Möglichkeiten in den Fokus gerückt. Verbunden mit den persönlichen Sichtweisen der Jugendlichen auf die Konfirmandenzeit werden konkrete Handlungsimpulse und Anregungen eröffnet, wie die junge Generation für Kirche und kirchliche Themen längerfristig begeistert werden kann und welche Potenziale dabei das Internet bietet. Durch die enge Verzahnung von Theorie und Praxis schafft die Arbeit eine hilfreiche Grundlage für Religionslehrer, Pfarrer und Interessierte.

Labor of Love Heather Jacobson, 2016-03-15 While the practice of surrogacy has existed for millennia, new fertility technologies have allowed women to act as gestational surrogates, carrying children that are not genetically their own. While some women volunteer to act as gestational surrogates for friends or family members, others get paid for performing this service. The first ethnographic study of gestational surrogacy in the United States, *Labor of Love* examines the conflicted attitudes that emerge when the ostensibly priceless act of bringing a child into the world becomes a paid occupation. Heather Jacobson interviews not only surrogate mothers, but also their family members, the intended parents who employ surrogates, and the various professionals who work to facilitate the process. Seeking to understand how gestational surrogates perceive their vocation, she discovers that many regard surrogacy as a calling, but are reluctant to describe it as a job. In the process, Jacobson dissects the complex set of social attitudes underlying this resistance toward conceiving of pregnancy as a form of employment. Through her extensive field research, Jacobson gives readers a firsthand look at the many challenges faced by gestational surrogates, who deal with complicated medical procedures, delicate work-family balances, and tricky social dynamics. Yet *Labor of Love* also demonstrates the extent to which advances in reproductive technology are affecting all Americans, changing how we think about maternity, family, and the labor involved in giving birth. Lesbian, Gay, Bisexual, and Transgender Americans at Risk [3 volumes] Chuck Stewart, 2018-02-16 Three volumes organized by the three phases of life—youth, middle age, and old age—explore the LGBTQ+ experience, delving deeply into research on a multitude of hot topics including risks experienced by this sometimes targeted population. In June of 2015, the United State Supreme Court issued an opinion that directly impacted the lives of many LGBT Americans: in *Obergefell v. Hodges*, the court required all states to issue marriage licenses to same-sex couples and to recognize same-sex marriages performed

in other jurisdictions. While many activists consider this a major achievement, LGBT individuals still face a number of pressing issues. In *Lesbian, Gay, Bisexual, and Transgender Americans at Risk*, editor Chuck Stewart and a carefully selected group of contributors unravel these far-reaching concerns. The book is a cutting-edge resource for academics, activists, scholars, students, and lay people who are interested in examining LGBT social and political movements as well as the public policy progress and setbacks of recent years. Three volumes of essays by experts in a variety of fields delve deeply into primary sources to tackle important topics such as transgender adolescents, alcohol and drug abuse, and the massacre at Pulse gay nightclub, along with dozens of others. Organized by life stages, this comprehensive work sheds light on concerns and controversies affecting youth, adults, and seniors connected to the LGBT community

Human Population Genetic Research in Developing Countries Yue Wang, 2013-11-12 Human population genetic research (HPGR) seeks to identify the diversity and variation of the human genome and how human group and individual genetic diversity has developed. This book asks whether developing countries are well prepared for the ethical and legal conduct of human population genetic research, with specific regard to vulnerable target group protection. The book highlights particular issues raised by genetic research on populations as a whole, such as the potential harm specific groups may suffer in genetic research, and the capacity for current frameworks of Western developed countries to provide adequate protections for these target populations. Using The People's Republic of China as a key example, Yue Wang argues that since the target groups of HPGR are almost always from isolated and rural areas of developing countries, the ethical and legal frameworks for human subject protection need to be reconsidered in order to eliminate, or at least reduce, the vulnerability of those groups. While most discussion in this field focuses on the impact of genetic research on individuals, this book breaks new ground in exploring how the interests of target groups are also seriously implicated in genetic work. In evaluating current regulations concerning prevention of harm to vulnerable groups, the book also puts forward an alternative model for group protection in the context of human population genetic research in developing countries. The book will be of great interest to students and academics of medical law, ethics, and the implications of genetic research.

The Changing Face of Compliance addresses core aspects of this challenge, considering the relationship between regulation and compliance and key influences on both, offering insight into the effectiveness of current approaches and addressing practical compliance challenges. Sharon Ward explains how the role of Compliance might be strengthened and those who work within it further enabled to support the current focus on improving standards in business, offering recommendations for enhancing this role. The text includes a mix of hands-on advice, examples and research based on the experiences of practitioners, educators and regulators drawn from across a wide range of jurisdictions and sectors. This is a thoughtful and timely book, whether you are concerned about the growing and changing implications of regulatory risk; the benefit of leveraging additional value from your Compliance function or your own Compliance role; or ways of transforming and sustaining the function to ensure its continued relevance to the business.

Queer Community Neal Carnes,2019-02-13 The context for this work is defined by a second wave of social and political activity contextualized by queer. For example, three, self-identified black, queer women started the Black Lives Matter movement. For a new generation, the first-wave reclamation of queer speaks to their position in a world that continues to marginalize and oppress, particularly sexually and gender fluid and non-normative people. Using empirical work carried out by the author, *Queer Community* describes queer-identified people, their intimate relationships, and how they are evolving as a unique community along politically-charged, ideological lines. Following an exploration of the history and context of ‘queer’ – including activism and the evolution of queer theory – this book examines how queer-identified people define the identity, with reference to ‘queer’ as a sexual moniker, gender moniker, and political ideology. *Queer Community* will appeal to scholars and students interested in sociology, queer theory, sexuality studies, gender studies, cultural studies, and contemporary social movements.
