International Law in East Asia Zou Keyuan,2017-07-05 As the world's political and economic landscape changes in response to the rise of Asian countries such as China, so Asian influences on the global legal order will become more pronounced. Many countries in the region, such as Japan and South Korea, influence the development of international law in various ways, either individually or collectively through multinational organisations such as ASEAN. This collection of published work by leading East Asian scholars covers Asian perspectives concerning various issues in international law, ranging from general perspectives to particular themes such as international economic law, international human rights law, international ocean law, international criminal law, international security law and international dispute settlement. For the first time it provides a comprehensive picture of how and why East Asian countries participate in international law making, as well as comply with international law in their state practices. In so doing, the editors attempt to address the question whether the rising powers in East Asia will change the existing international legal order in future.

China-Asean Relations and International Law Zou Keyuan,2009-01-30 Our contemporary era has witnessed the remarkable development of China-ASEAN relations. Both sides have pledged to establish and develop a comprehensive cooperation. However, any development of international relations is governed by international legal principles, norms and rules, such as the Charter of the United Nations and general international law. There is no exception for China-ASEAN relations. The book discusses and explains China-ASEAN relations from an international law perspective and covers a wide range of legal topics and legal issues. The first book which attempts to discuss and explain China-ASEAN relations in an international law perspective Covers a wide range of legal topics and issues significantly existing in the development of China-ASEAN relations Unique in the sense that it specifically deals with the relationship between one country and one international/regional organization

Reactive Nitrogen in the Environment Elizabeth Braun,United Nations Environment Programme. Division of Technology, Industry, and Economics,Woods Hole Research Center (Woods Hole, Mass.),2007 This non-technical report summarises the present scientific understanding of the major issues surrounding reactive nitrogen, and discusses the overarching environmental, human health and economic issues created by both excesses and deficiencies. The report provides case studies of effective policy implementation and reviews emerging policies to show how negative impacts associated with reactive nitrogen may be successfully addressed locally, nationally and regionally, given similar challenges, shared experiences and effective solutions.

The Jingshan Report China Finance 40 Forum Research Group,2020-01-14 The Jingshan Report is a collection of research papers on key issues for China's financial opening, including reform of the RMB exchange rate regime, management of cross-border capital flows and financial support for the Belt and Road Initiative. Authored by leading experts in the relevant fields, the report examines the evolution, current status and problems with the financial opening policy over the past four decades, and puts forward policy recommendations on how to steadily push forward China's financial opening.

Conservation Policies for Agricultural Biodiversity Lekha Laxman,Abdul Haseeb Ansari,2023-08-17 Conservation Policies for Agricultural Biodiversity: A Comparative Study of Laws and Policies focuses on the challenge of securing the ecological future of the planet and its inhabitants by exploring the Convention of Biological Diversity and the Nagoya Protocol on Access and Benefit Sharing and WTO laws, such as SPSS, TBT GATT. This book demonstrates how the urgent problem of biodiversity loss can be addressed by challenging notions of national self-interest and security for the purpose of implementing policies that will benefit humanity and, more importantly, ensure the future of our planet. Delves into the current approaches adopted in the framework of global environmental governance Investigates the origins, operations and effects of legal regimes, policies and practices related to the conservation of biodiversity Presents a comparative study of laws and policies, providing an in-depth understanding of the factors behind the lack of success in conserving agricultural biodiversity

Environmental Remediation and Restoration of Contaminated Nuclear and Norm Sites L van Velzen,2015-02-02 Nuclear sites become contaminated with radionuclides due to accidents and activities carried out without due consideration for the environment. Naturally-occurring radioactive materials (NORM) released by industrial processes such as coal power production and fertilizer manufacture may also require clean-up. Environmental remediation and restoration aim to reduce exposure to radiation from contaminated soil or groundwater. This book provides a comprehensive overview of this area. Part 1 provides an introduction to the different types of contaminated site and their characteristics. Part 2 addresses environmental restoration frameworks and processes. Part 3 then reviews different remediation techniques and methods of waste disposal. Explores types and characteristics of contaminated nuclear and NORM sites Provides an in depth guide to environmental restoration frameworks and processes including stakeholder involvement, risk assessment and cost-benefit analysis in the remediation and restoration of contaminated nuclear and NORM sites Offers coverage of remediation techniques and waste disposal from electrokinetic remediation to in situ and ex situ bioremediation of radionuclides contaminated soils

Queimadas e incêndios florestais Alberto W. Setzer,Nelson J. Ferreira,2022-01-26 Queimadas e incêndios florestais: mediante monitoramento orbital apresenta as principais ferramentas, aplicações e pesquisas na área, marco da consolidação de 35 anos de detecção e monitoramento realizados pelo Inpe, com o uso de imagens de satélites ambientais no País. O monitoramento orbital das queimadas e dos incêndios florestais é essencial para a conservação e a gestão dos recursos florestais e dos ecossistemas que os abrigam, a proteção de vidas e o fornecimento de sólidos subsídios para o estabelecimento de políticas públicas. Considerando essas necessidades, o livro responde com as ferramentas e os produtos do Programa Queimadas do Inpe e algumas de suas principais

aplicações, tais como medidas de áreas queimadas, risco meteorológico para queima de vegetação e detecção de focos de fogo com satélites. Apresenta métodos para quantificar o número e os impactos de incêndios naturais e monitorar focos em áreas de conservação. Trata da degradação florestal, dos impactos do fogo em biomas brasileiros e da resposta da vegetação ao fogo. Queimadas e incêndios florestais traz ainda os resultados de um projeto de obtenção de dados de emissões atmosféricas para avaliação de políticas ambientais voltadas ao controle das mudanças climáticas e exemplos práticos de aplicação dos produtos de programa público para a gestão do uso do fogo e a análise de condições climáticas futuras. Trinta e oito pesquisadores altamente qualificados colaboraram com esta edição.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Using Blended Learning Khe Foon Hew, Wing Sum Cheung, 2014-08-01 This book discusses evidence-based practices related to the use of blended learning in both K-12 and higher education settings. Specifically, this book features evidence-based practices in relation to the following five learning goals: (a) Fostering students' attitude change toward country, (b) Helping students' solve ill-structured design task problems, (c) Improving students' critical thinking in assessing sources of information, (d) Improving students' narrative and argumentative writing abilities and (e) Enhancing students' knowledge retention and understanding. To achieve this aim, the authors draw upon their own research studies as well as some other relevant studies to reveal the pedagogical approaches, the specific instructional/learning activities, the technologies utilized and the overall framework for developing blended learning experiences.

Socio-Economic Disparities, Vulnerable Communities, and the Future of Work and Entrepreneurship Rolle, JoAnn Denise, Crump, Micah, 2023-06-21 While many scholars, governments, and corporations have expressed that they would like to play a hand in developing an inclusive and equitable society, few have achieved the goal. Vulnerable communities around the world have suffered systemically and have been left on their own to succeed economically despite decades of disadvantage. It is essential to consider these communities and their sociological and systemic factors when considering the future of work in order to succeed in developing a truly sustainable and equitable society. Socio-Economic Disparities, Vulnerable Communities, and the Future of Work and Entrepreneurship discusses the journey of vulnerable communities in the pursuit of entrepreneurship. It further investigates the strategies and action that governments and organizations can take to cultivate an inclusive environment within the future of work. Covering topics such as economic agency, equitable access, and affirmative action, this premier reference source is an excellent resource for policymakers, government officials, non-profit organizations, business leaders and executives, human resource managers, economists, students and faculty of higher education, researchers, and academicians.

The Zero Marginal Cost Society Jeremy Rifkin, 2014-04-01 In The Zero Marginal Cost Society, New York Times bestselling author Jeremy Rifkin describes how the emerging Internet of Things is speeding us to an era of nearly free goods and services, precipitating the meteoric rise of a global Collaborative Commons and the eclipse of capitalism. Rifkin uncovers a paradox at the heart of capitalism that has propelled it to greatness but is now taking it to its death—the inherent entrepreneurial dynamism of competitive markets that drives productivity up and marginal costs down, enabling businesses to reduce the price of their goods and services in order to win over consumers and market share. (Marginal cost is the cost of producing additional units of a good or service, if fixed costs are not counted.) While economists have always welcomed a reduction in marginal cost, they never anticipated the possibility of a technological revolution that might bring marginal costs to near zero, making goods and services priceless, nearly free, and abundant, and no longer subject to market forces. Now, a formidable new technology infrastructure—the Internet of things (IoT)—is emerging with the potential of pushing large segments of economic life to near zero marginal cost in the years ahead. Rifkin describes how the Communication Internet is converging with a nascent Energy Internet and Logistics Internet to create a new technology platform that connects everything and everyone. Billions of sensors are being attached to natural resources, production lines, the electricity grid, logistics networks, recycling flows, and implanted in homes, offices, stores, vehicles, and even human beings, feeding Big Data into an IoT global neural network. Prosumers can connect to the network and use Big Data, analytics, and algorithms to accelerate efficiency, dramatically increase productivity, and lower the marginal cost of producing and sharing a wide range of products and services to near zero, just like they now do with information goods. The plummeting of marginal costs is spawning a hybrid economy—part capitalist market and part Collaborative Commons—with far reaching implications for society, according to Rifkin. Hundreds of millions of people are already transferring parts of their economic lives to the global Collaborative Commons. Prosumers are plugging into the fledgling IoT and making and sharing their own information, entertainment, green energy, and 3D-printed products at near zero marginal cost. They are also sharing cars, homes, clothes and other items via social media sites, rentals, redistribution clubs, and cooperatives at low or near zero marginal cost. Students are enrolling in free massive open online courses (MOOCs) that operate at near zero marginal cost. Social entrepreneurs are even bypassing the banking establishment and using crowdfunding to finance startup businesses as well as creating alternative currencies in the fledgling sharing economy. In this new world, social capital is as

important as financial capital, access trumps ownership, sustainability supersedes consumerism, cooperation ousts competition, and exchange value in the capitalist marketplace is increasingly replaced by sharable value on the Collaborative Commons. Rifkin concludes that capitalism will remain with us, albeit in an increasingly streamlined role, primarily as an aggregator of network services and solutions, allowing it to flourish as a powerful niche player in the coming era. We are, however, says Rifkin, entering a world beyond markets where we are learning how to live together in an increasingly interdependent global Collaborative Commons.
