Branding Bhakti Nicole Karapanagiotis, 2021-04-06 How do religious groups reinvent themselves in order to attract new audiences? How do they rebrand their messages and recast their rituals in order to make their followers more diverse? In *Branding Bhakti*, Nicole Karapanagiotis considers the new branding of the Hare Krishna Movement, or the International Society for Krishna Consciousness (ISKCON). Known primarily for their orange robes, shaved heads, ecstatic dancing on the streets, and exuberant Hindu-style temple worship, many contemporary ISKCON groups are radically reinventing their public presentation and their style of worship in order to attract a global audience to their movement. Karapanagiotis explores their innovative and complex approaches in both the United States and India by following three new ISKCON brands aimed at gathering new followers. Each is led by a world-renowned ISKCON guru and his global disciples, and each is promoted through a mix of digital and social media and the construction of an innovative worship-scape. These new spaces trade ISKCON's traditional temples for corporate work-life balance programs, posh yoga studios, urban spiritual lounges, edgy mantra clubs/lofts, and rural meditative retreat facilities. *Branding Bhakti* not only investigates the methods the ISKCON movement uses to position itself for growth but also highlights devotees' painful and complicated struggles as they work to transform their shrinking, sectarian movement into one with global religious appeal.

**Green Book** U.s. Department of the Treasury,2015-12-28 Welcome to the Green Book a comprehensive guide for financial institutions that receive ACH payments from the Federal government. Today, the vast majority of Federal payments are made via the ACH. With very few exceptions, Federal government ACH transactions continue to be subject to the same rules as private industry ACH payments. As a result, the Green Book continues to get smaller in size and is designed to deal primarily with exceptions or issues unique to Federal government operations.

**Aerospace Sensors** Alexander Nebylov,2012-11-20 Modern air and space craft demand a huge variety of sensing elements for detecting and controlling their behavior and operation. These sensors often differ significantly from those designed for applications in automobile, ship, railway, and other forms of transportation, and those used in industrial, chemical, medical, and other areas. This book offers insight into an appropriate selection of these sensors and describes their principles of operation, design, and achievable performance along with particulars of their construction. Drawn from the activities of the International Federation of Automatic Control (IFAC), especially its Aerospace Technical Committee, the book provides details on the majority of sensors for aircraft and many for spacecraft, satellites, and space probes. It is written by an international team of twelve authors representing four countries from Eastern and Western Europe and North America, all with considerable experience in aerospace sensor and systems design. Highlights include: • coverage of aerospace vehicle classification, specific design criteria, and the requirements of onboard systems and sensors; • reviews of airborne flight parameter sensors, weather sensors and collision avoidance devices; • discussions on the important role of inertial navigation systems (INS) and separate gyroscopic sensors for aerospace vehicle navigation and motion control; • descriptions of engine parameter information collection systems, including fuel quantity and consumption sensors, pressure pick-ups, tachometers, vibration control, and temperature sensors; and • descriptions and examples of sensor integration.

**Political Discourse Analysis** Isabela Fairclough,Norman Fairclough,2013-06-17 In this accessible new textbook, Isabela and Norman Fairclough present their innovative approach to analysing political discourse. Political Discourse Analysis integrates analysis of arguments into critical discourse analysis and political discourse analysis. The book is grounded in a view of politics in which deliberation, decision and action are crucial concepts: politics is about arriving cooperatively at decisions about what to do in the context of disagreement, conflict of interests and values, power inequalities, uncertainty and risk. The first half of the book introduces

the authors' new approach to the analysis and evaluation of practical arguments, while the second half explores how it can be applied by looking at examples such as government reports, parliamentary debates, political speeches and online discussion forums on political issues. Through the analysis of current events, including a particular focus on the economic crisis and political responses to it, the authors provide a systematic and rigorous analytical framework that can be adopted and used for students' own research. This exciting new text, co-written by bestselling author Norman Fairclough, is essential reading for researchers, upper undergraduate and postgraduate students of discourse analysis, within English language, linguistics, communication studies, politics and other social sciences.

Pond Conservation in Europe Beat Oertli, Régis Céréghino, Jeremy Biggs, Steven Declerck, Andrew P. Hull, Maria Rosa Miracle, 2010-09-24 Ponds are an exceptional freshwater resource around the world and represent thirty percent of the global surface area of standing water. Furthermore, the millions of ponds which exist exhibit a particularly high biodiversity and have a high potential for ecosystem functions and services. Despite these impressive features, ponds face many threats from a variety of human activities and receive little or no protection under European and national legislation. Consequently, there is an urgent need to protect, consolidate and increase the pond resource in Europe. In order to achieve these objectives, the European Pond Conservation Network (EPCN) was launched 2004 in Geneva. Its aim is to promote the awareness, understanding and conservation of these small water bodies in the European landscape. This volume of "Developments in Hydrobiology" presents a selection of 31 papers presented during EPCN conferences held in 2006 in France (Toulouse) and in 2008 in Spain (Valencia). They represent a diverse collection of themes from across the continent and North Africa and present new and original insights into topics as wide ranging as pond biodiversity; human disturbance; landscape ecology; ecological assessment and monitoring; practical management measures; ecological restoration; hydrology and climate change; invasive species and threatened species.
