**Soil pollution: a hidden reality** Food and Agriculture Organization of the United Nations,2018-04-30 This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO2 and N2O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

*Think Bayes* Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

In this particular study, experts on China, Japan, Korea, Mongolia and Russia examine the political, economic, social and cultural dimensions of the interaction between border-crossing individuals and host communities, highlighting the challenges that face national and local leaders in each country and suggesting needed changes in national and international policies. The authors analyze population trends and migration patterns in each country: Chinese migration to the Russian Far East, Chinese, Koreans, and Russians in Japan, North Koreans in China, and migration issues in South Korea and Mongolia. *The Future of Reputation* Daniel J. Solove,2007-01-01 Teeming with chatrooms, online discussion groups, and blogs, the Internet offers previously unimagined opportunities for personal expression and communication. But there's a dark side to the story. A trail of information fragments about us is forever preserved on the Internet, instantly available in a Google search. A permanent chronicle of our private lives--often of dubious reliability and sometimes totally false--will follow us wherever we go, accessible to friends, strangers, dates, employers, neighbors, relatives, and anyone else who cares to look. This engrossing book, brimming with amazing examples of gossip, slander, and rumor on the Internet, explores the profound implications of the online collision between free speech and privacy. Daniel Solove, an authority on information privacy law, offers a fascinating account of how the Internet is transforming gossip, the way we shame others, and our ability to protect our own reputations. Focusing on blogs, Internet communities, cybermobs, and other current trends, he shows that, ironically, the unconstrained flow of information on the Internet may impede opportunities for self-development and freedom. Long-standing notions of privacy need review, the author contends: unless we establish a balance between privacy and free speech, we may discover that the freedom of the Internet makes us less free.

Atlantic Rising Daniel S. Hamilton,2017-11-03 More commerce flows within the Atlantic Basin than any other. Never have so many workers and consumers entered the Atlantic economy as quickly or as suddenly in the past fifteen years. Atlantic peoples are engaging and interacting in a whole host of ways that are shifting the contours of regional and global independence and power--yet relatively little attention has been paid to these pan-Atlantic dynamics. With this in mind, the Center for Transatlantic Relations asked experts and seasoned practitioners to explore the changing commercial dynamics of the Atlantic Basin. Authors map the shifting flows of goods, services and investments binding North and South America, Africa and Europe; exame the influence of Pacific actors in the Atlantic space; explore the implications of current trade negotiations, commercial disputes, challenges of inequality, growth and human development; and offer recommendations for governments and other stakeholders.
