Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary Truth and Reconciliation Commission of Canada,2015-07-22 This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this

setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.

*Popol Vuh* Dennis Tedlock, 2013-02 Popol Vuh, the Quich'ꞌ Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the Quich'ꞌ Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new

illustrations.

**Reforming Juvenile Justice** National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Committee on Assessing Juvenile Justice Reform,2013-05-22 Adolescence is a distinct, yet transient, period of development between childhood and adulthood characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks. Research indicates that for most youth, the period of risky experimentation does not extend beyond adolescence, ceasing as identity becomes settled

with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States, and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.

**Eating Earth** Lisa Kemmerer, 2014-09-30 Exploring the environmental effects of animal agriculture, fishing, and hunting, *Eating Earth* exposes critical common ground between earth and animal advocacy. The first chapter (animal agriculture) examines greenhouse gas emissions and climate change, manure and dead zones, freshwater depletion, deforestation, predator control, land and use--including the ranching industries public lands subsidies. Chapter two first examines whether or not the consumption of fish is healthy and outlines morally relevant aspects of fish physiology, then scrutinizes the fishing industry, documenting the silent collapse of ocean ecosystems and calling attention to the indiscriminate nature of hooks and nets, including the problem of bycatch and what this means for endangered species and fragile seascapes. Chapter three outlines the historic link between the U. S. Government, wildlife management, and hunters, then systematically unravels common beliefs about sport hunting, such as the belief that hunters are essential to wildlife conservation, that contemporary hunting qualifies as a tradition, and that hunting is merciful, economical, or rooted in fair chase. At the end of each chapter, Kemmerer examines possible solutions to problems presented, such as sustainable meats, organic and local, grass fed, aquaculture, new fishing technologies, and enhanced regulations. *Eating Earth* offers a concise examination of the environmental effects of dietary choice, clearly presenting the many reasons why dietary choice ought to be front and center for environmentalists. Kemmerer's writing, supported by nearly 80 graphs and summary slides, is clear, straightforward, and punctuated with wry humor.

Department of Commerce, 2011-09 The Statistical Abstract of the United States, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.

A History of Advertising Stephane Pincas, Marc Loiseau, 2015-06-15 Strategic story: The making of modern advertising The history of western advertising dates back to at least the 1630s, when Frenchman Theophraste Renaudot placed the first advertising notes in La Gazette de France, but the term advertising agency first appeared in 1842, when Volney B.

Palmer opened for business in Philadelphia. Widely accepted as the birth of modern advertising, Palmer's venture marks the birth of a creative industry that has radically transformed our culture and language. Divided into sections by decades, this freshly updated edition explores the legendary campaigns and brands of advertising's modern history. With specific anecdotes and comments on the importance of every campaign, it curates advertising gold right through to the last decade. Check out the picture of the camel behind the legendary Camel pack, the first Coca Cola ad, and the masterworks by Picasso and Magritte that inspired advertising imagery.

**The Oxford Handbook of Organizational Climate and Culture** Karen M. Barbera,2014-05-07 The Oxford Handbook of Organizational Climate and Culture presents the breadth of topics from Industrial and Organizational Psychology and Organizational Behavior through the lenses of organizational climate and culture. The Handbook reveals in great detail how in both research and practice climate and culture reciprocally influence each other. The details reveal the many practices that organizations use to acquire, develop, manage, motivate, lead, and treat employees both at home and in the multinational settings that characterize contemporary organizations. Chapter authors are both expert in their fields of research and also represent current climate and culture

practice in five national and international companies (3M, McDonald's, the Mayo Clinic, PepsiCo and Tata). In addition, new approaches to the collection and analysis of climate and culture data are presented as well as new thinking about organizational change from an integrated climate and culture paradigm. No other compendium integrates climate and culture thinking like this Handbook does and no other compendium presents both an up-to-date review of the theory and research on the many facets of climate and culture as well as contemporary practice. The Handbook takes a climate and culture vantage point on micro approaches to human issues at work (recruitment and hiring, training and performance management, motivation and fairness) as well as organizational processes (teams, leadership, careers, communication), and it also explicates the fact that these are lodged within firms that function in larger national and international contexts.
