Cyber-Physical Threat Intelligence for Critical Infrastructures Security John Soldatos,Isabel Praça,Aleksandar Jovanović,2021-07-31 Modern critical infrastructures can be considered as large scale Cyber Physical Systems (CPS). Therefore, when designing, implementing, and operating systems for Critical Infrastructure Protection (CIP), the boundaries between physical security and cybersecurity are blurred. Emerging systems for Critical Infrastructures Security and Protection must therefore consider integrated approaches that emphasize the interplay between cybersecurity and physical security techniques. Hence, there is a need for a new type of integrated security intelligence i.e., Cyber-Physical Threat Intelligence (CPTI). This book presents novel solutions for integrated Cyber-Physical Threat Intelligence for infrastructures in various sectors, such as Industrial Sites and Plants, Air Transport, Gas, Healthcare, and Finance. The solutions rely on novel methods and technologies, such as integrated modelling for cyber-physical systems, novel reliance indicators, and data driven approaches including BigData analytics and Artificial Intelligence (AI). Some of the presented approaches are sector agnostic i.e., applicable to different sectors with a fair customization effort. Nevertheless, the book presents also peculiar challenges of specific sectors and how they can be addressed. The presented solutions consider the European policy context for Security, Cyber security, and Critical Infrastructure protection, as laid out by the European Commission (EC) to support its Member States to protect and ensure the resilience of their critical infrastructures. Most of the co-authors and contributors are from European Research and Technology Organizations, as well as from European Critical Infrastructure Operators. Hence, the presented solutions respect the European approach to CIP, as reflected in the pillars of the European policy framework. The latter includes for example the Directive on security of network and information systems (NIS Directive), the Directive on protecting European Critical Infrastructures, the General Data Protection Regulation (GDPR), and the Cybersecurity Act Regulation. The sector specific solutions that are described in the book have been developed and validated in the scope of several European Commission (EC) co-funded projects on Critical Infrastructure Protection (CIP), which focus on the listed sectors. Overall, the book illustrates a rich set of systems, technologies, and applications that critical infrastructure operators could consult to shape their future strategies. It also provides a catalogue of CPTI case studies in different sectors, which could be useful for security consultants and practitioners as well.

Designing Sidewalks and Trails for Access Peter Axelson,1999 This report focuses on how sidewalks and trails can be made accessible and usable by the widest possible segment of the population. Sponsored by the Federal Highway Administration, a project to research existing conditions on sidewalks and trails for people with disabilities was designed in two parts. Part I, covers literature surveys, site surveys and interviews along with the history of accessibility legislation, travel characteristics of the disabled and engineering and construction design practices. Part II provides data on implementing the requirements of parts of two acts, Title II of the Americans with Disabilities Act of 1990 and section 504 of the Rehabilitation Act of 1973.

Asian and Pacific Cities Ian Shirley,Carol Neill,2013-03-12 The cities of Asia and the Pacific are at the epicentre of development in what is arguably, the most populous, culturally distinctive, and economically powerful region in the world. 16 major cities such as Tokyo, Shanghai, Manila, Jakarta, Bangkok, Singapore,

Auckland, Kuala Lumpur and Santiago, located in countries as diverse as Mexico and Vietnam, Samoa and India, China and Australia, exemplify the changing patterns of development across this vast region of the world. By tracking economic and social trends the contributors to this collection reveal how a wide range of political and cultural factors have interacted over time to provide a powerful explanation for the shape and characteristics of ‘the city’ today. Based on a collaborative research programme and drawing on the work of local researchers, this book examines the realities of city development characterised by domestic migration, spatial and social fragmentation, squatter settlements and gated communities, economic experiments and the emergence of the ‘Asian Tigers’. The collection as a whole records the way in which countries in this region have moved from underdevelopment to become global economic and political powers. This book provides a fascinating journey through Asia and the Pacific by generating an insiders’ view of each city and an insight into national development. As such it will be of great interest to students and scholars interested in: the Asian and Pacific region; in disciplines such as economics, politics, geography and sociology; and in policy domains such as urban planning and economic development.

The Rational Optimist Matt Ridley,2011-06-07 For two hundred years the pessimists have dominated public discourse, insisting that things will soon be getting much worse. But in fact, life is getting better—and at an accelerating rate. Food availability, income, and life span are up; disease, child mortality, and violence are down all across the globe. Africa is following Asia out of poverty; the Internet, the mobile phone, and container shipping are enriching people's lives as never before. In his bold and bracing exploration into how human culture evolves positively through exchange and specialization, bestselling author Matt Ridley does more than describe how things are getting better. He explains why. An astute, refreshing, and revelatory work that covers the entire sweep of human history—from the Stone Age to the Internet—The Rational Optimist will change your way of thinking about the world for the better.

Introduction to Nanoscience and Nanotechnology Gabor L. Hornyak,H.F. Tibbals,Joydeep Dutta,John J. Moore,2008-12-22 The maturation of nanotechnology has revealed it to be a unique and distinct discipline rather than a specialization within a larger field. Its textbook cannot afford to be a chemistry, physics, or engineering text focused on nano. It must be an integrated, multidisciplinary, and specifically nano textbook. The archetype of the modern nano textbook

Risk Assessment, Modeling and Decision Support Ann Bostrom,Steven P. French,Sara J. Gottlieb,2008-02-10 The papers in this volume integrate results from current research efforts in earthquake engineering with research from the larger risk assessment community. The authors include risk and hazard researchers from the major U.S. hazard and earthquake centers. The volume lays out a road map for future developments in risk modeling and decision support, and positions earthquake engineering research within the family of risk analysis tools and techniques.
