Big-Time Sports in American Universities Charles T. Clotfelter,2019-02-21 For almost a century, big-time college athletics has been a wildly popular but consistently problematic part of American higher education. The challenges it poses to traditional academic values have been recognized from the start, but they have grown more ominous in recent decades, as cable television has become ubiquitous, commercial opportunities have proliferated, and athletic budgets have ballooned. In the second edition of his influential book Big-Time Sports in American Universities, Clotfelter continues to examine the role of athletics in American universities, building on his argument that commercial sports have become a core function of the universities that engage in them. Drawing on recent scandals on large-scale college campuses and updates on several high-profile court cases, Clotfelter brings clear economic analysis to the variety of problems that sports raise for university and public policy, providing the basis for the continuation of constructive conversations about the value of big-time sports in higher education.

Messina,2021-06-19 This volume provides a critical response to the COVID-19 pandemic showcasing the full range of issues and perspectives that the discipline of geography can expose and bring to the table, not only to this specific event, but to others like it that might occur in future. An Introduction to the Law of Contract P. S. Atiyah,1995 The last edition of this book saw a major restructuring of the whole work, and in particular, to stress the resurgence of freedom of contract ideology, and to introduce some basic economic issues in contract law. In this edition, the general shape and structure of the book have been left untouched, although as with previous editions, the whole work has been completely updated and modernized by replacing old and outdated examples with more modern questions with which the student may be assumed to be more familiar. The aims of the book remain unchanged: to supply a basic introduction, not merely to the law of contract, but also to theories and policies and ideas underlying the subject. In addition, the author has constantly resorted to a modern historical approach, giving the student some sense of how the law has developed over the past 100 years or so. widely recognized as one of the most interesting and innovative books to have been published in the last 25 years, An Introduction to the Law of Contract remains as popular today with students and their teachers as it was when it was first published.

The Upgrade J.Renee,2015-04-16 I wrote this book for you. You're not happy with the way that you look. You don't feel pretty. You've always been the "plain Jane." Your insecurities show in the way you walk, talk, and interact with others. Your moments of self-satisfaction are few and far in between. You wish you looked like "her". Life has beat you up to the point that you don't even look like yourself anymore. You're so "busy" that you don't have time for yourself. If he doesn't tell you you're beautiful, you don't feel like you are. Your husband doesn't look at you the way he used to. You look at old pictures of yourself and remember when..... You're tired, you want to make a change. I wrote this book for you. Some of our greatest issues as women are centered around the way we look, and the way that we feel about the way that we look. However, what is seen on the outside is merely a physical representation of our internal woes. I believe any woman that can get to the psychological root of her physical issues, and conquer those issues, can conquer the world. In this book we will do just that, and give you the tools and knowledge need to look your best, feel your best, and ultimately be your best. Let's begin YOUR UPGRADE!

The book offers critical insights on the impact of the pandemic on migrant workers in different world regions including North America, Europe and Asia. The book addresses several categories of migrants including medical staff, farm labourers, construction workers, care and domestic workers and international students. It looks at border closures for non-citizens, disruption for temporary migrants as well as at special arrangements made for essential (migrant) workers such as doctors or nurses as well as farmworkers, 'shipped' to destination with special flights to make sure emergency wards are staffed, and harvests are picked up and the food processing chain continues to function. The book illustrates how the pandemic forces us to rethink notions like membership, citizenship, belonging, but also solidarity, human rights, community, essential services or 'essential' workers alongside an intersectional perspective including ethnicity, gender and race.
