The Rough Guide to Film Rough Guides,2008-05-01 Get the lowdown on the best fiction ever written. Over 230 of the world's greatest novels are covered, from Quixote (1614) to Orhan Pamuk's Snow (2002), with fascinating information about their plots and their authors – and suggestions for what to read next. The guide comes complete with recommendations of the best editions and translations for every genre from the most enticing crime and punishment to love, sex, heroes and anti-heroes, not to mention all the classics of comedy and satire, horror and mystery and many other literary genres. With feature boxes on experimental novels, female novelists, short reviews of interesting film and TV adaptations, and information on how the novel began, this guide will point you to all the classic literature you'll ever need.

**Fingerprints and Other Ridge Skin Impressions** Christophe Champod,Chris J. Lennard,Pierre Margot,Milutin Stoilovic,2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

**The Film Handbook** Geoff Andrew,1990 The Film Handbook examines the current status of filmmaking, how film is produced and distributed and its relation with today's digital and web-based climate.

**Homo Deus** Yuval Noah Harari,2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon Sapiens, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

**Botnets** Craig Schiller,James R. Binkley,2011-04-18 The book begins with real world cases of botnet attacks to underscore the need for action. Next the book will explain botnet fundamentals using real world examples. These chapters will cover what they are, how they operate, and the environment and technology that makes them possible. The following chapters will analyze botnets for opportunities to detect, track, and remove them. Then the book will describe intelligence gathering efforts and results obtained to date. Public domain tools like OurMon, developed by Jim Binkley of Portland State University, will be described in detail along with discussions of other tools and resources that are useful in the fight against Botnets. This is the first book to explain the newest internet threat - Botnets, zombie armies, bot herders, what is being done, and what you can do to protect your enterprise Botnets are the most complicated and difficult threat the hacker world has unleashed - read how to protect yourself

**Handbook of hair in health and disease** Victor R. Preedy,2012-05-23 Hair is a major component of the body's tissue system that contributes to the individual's make up and confers a large degree of personal identity. Apart from its visible façade, hair also has a functional role. It has a unique structure and complex molecular development. The very nature of hair makes it a suitable marker for the prognosis of disease. Hair can also be used to screen for toxins and changes in the diet. However, there are currently no suitable publications available that describe hair in a rational scientific context. This handbook provides an academic approach to hair in health and disease. Divided into five sections the Handbook of Hair in Health and Disease provides an insight into hair growth and loss, molecular and cellular biology of hair, dietary toxicity and pathological history, diseases and treatments of hair, as well as shampoos and conditioners. Unique features of each chapter in this volume include relevant and useful 'Key facts' which highlight interesting or important findings of the specific subjects and 'Summary points' that will give a clear overview of the subjects treated in each chapter. The Handbook of Hair in Health and Disease will be essential to a variety of users, such as trichologists, doctors and nurses and all those interested or working within the area of hair health. This includes nutritionists and dieticians, scientific

beauticians, health workers and practitioners, college and university lecturers and undergraduate and graduate students.

**Minor Histories** Mike Kelley, 2004-02-06 The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the blazing network of focused confluences from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in voices that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. Statements consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including *Ajax*, which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; *Some Aesthetic High Points*, an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of creative writings that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. Video Statements and Proposals are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. Image-Texts offers writings that accompany or are part of artworks and installations. This section includes *A Stopgap Measure*, Kelley's zestful millennial essay in social satire, and *Meet John Doe*, a collage of appropriated texts. Architecture features an discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, *Ufology* considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

**Commerce Business Daily**, 1999-11

**Widescreen Worldwide** John Belton, Sheldon Hall, Stephen Neale, 2010 Examining widescreen cinema as a worldwide aesthetic and industrial phenomenon, the essays in this volume situate the individual expressions of this new technology within the larger cultural and industrial practices that inform them. What Hollywood sought to market globally as CinemaScope, SuperScope, Techniscope, Technirama, and Panavision took indigenous form in a host of compatible anamorphic formats developed around the world. The book documents how the aesthetics of the first wave of American widescreen films underwent revision in Europe and Asia as filmmakers brought their own idiolect to the language of widescreen mise-en-scène, editing, and sound practices. The work of Otto Preminger, Anthony Mann, Samuel Fuller, Sam Peckinpah, Seijun Suzuki, Kihachi Okamoto, and Tai Kato, among others, is addressed.

*Springer Handbook of Optical Networks* Biswanath Mukherjee, Ioannis Tomkos, Massimo Tornatore, Peter Winzer, Yongli Zhao, 2020-10-15 This handbook is an authoritative, comprehensive reference on optical networks, the backbone of today's communication and information society. The book reviews the many underlying technologies that enable the global optical communications infrastructure, but also explains current research trends targeted towards continued capacity scaling and enhanced networking flexibility in support of an unabated traffic growth fueled by ever-emerging new applications. The book is divided into four parts: Optical Subsystems for Transmission and Switching, Core Networks, Datacenter and Super-Computer Networking, and Optical Access and Wireless Networks. Each chapter is written by world-renown experts that represent academia, industry, and international government and regulatory agencies. Every chapter provides a complete picture of its field, from entry-level information to a snapshot of the respective state-of-the-art technologies to emerging research trends, providing something useful for the novice who wants to get familiar with the field to the expert who wants to get a concise view of future trends.

**Problem Gambling in Hong Kong and Macao** Chi Chuen Chan, William Wai Lim Li, Eugene Chung Ip Leung, 2016-06-08 This book critically examines the psychology of gambling in Hong Kong and Macao. Covering the history of gambling and its development in the two jurisdictions, it highlights the prevalence and status quo of problem gambling, the theoretical perspectives on the etiology of gambling disorder, and the treatment of problem gambling. The book also introduces a personality and pathways development model of Chinese problem gamblers and concludes with outlooks on the future of gambling in Hong Kong and Macao.

*War Photographs Taken on the Battlefields of the Civil War* Mathew B. Brady, Alexander Gardner, 2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

**Safety Measures** Laura Madeline Wiseman, 2021-05

*Disrupt Aging* Jo Ann Jenkins, 2016-04-05 This book sets out to change the current conversation about what it means to get older. In it, Jenkins chronicles her own journey, as well as those of others who are making their mark as disrupters, to show readers how we can all be active, financially unburdened, and happy as we get older. It's [a] ... narrative that touches on all the important issues facing people 50+ today, from caregiving and mindful living to building age-friendly communities and attaining financial freedom--

*Molecular Identification, Systematics, and Population Structure of Prokaryotes* Erko Stackebrandt, 2010-09-08 Systematic biology has a far wider application than merely the provision of a reliable classification scheme for new strains. With the framework of the hierarchic system stabilizing, genomes, noncoding regions, and genes and their products can now be evaluated in an evolutionary context. This book summarizes recent developments in the molecular characterization of cultured and as-yet uncultured prokaryotes, emphasizing the strengths and weaknesses of individual approaches. The chapters of the book are compiled to stimulate students to enter the field of bacterial diversity, presenting a broad spectrum of fascinating multifaceted disciplines that illuminate the paths to ecosystem functioning, communication within communities, symbiosis, life in extreme environments, astrobiology, and more.

**Friction Ridge Skin** James F. Cowger,2020-07-24 Here is a complete guide to the collection, classification, and comparison of friction skin prints and the determination of identity and nonidentity. It discusses: the cause and significance of variations in prints; the importance of class characteristics in print; the application of probability in decision making; and photographic techniques and considerations.
