Materials Chemistry Bradley D. Fahlman, 2018-08-28 The 3rd edition of this successful textbook continues to build on the strengths that were recognized by a 2008 Textbook Excellence Award from the Text and Academic Authors Association (TAA). Materials Chemistry addresses inorganic-, organic-, and nano-based materials from a structure vs. property treatment, providing a suitable breadth and depth coverage of the rapidly evolving materials field — in a concise format. The 3rd edition offers significant updates throughout, with expanded sections on sustainability, energy storage, metal-organic frameworks, solid electrolytes, solvothermal/microwave syntheses, integrated circuits, and nanotoxicity. Most appropriate for Junior/Senior undergraduate students, as well as first-year graduate students in chemistry, physics, or engineering fields, Materials Chemistry may also serve as a valuable reference to industrial researchers. Each chapter concludes with a section that describes important materials applications, and an updated list of thought-provoking questions.

More Important Than the Music Bruce D. Epperson, 2013-10-01 Today, jazz is considered high art, America's national music, and the catalog of its recordings—its discography—is often taken for granted. But behind jazz discography is a fraught and highly colorful history of research, fanaticism, and the intense desire to know who played what, where, and when. This history gets its first full-length treatment in Bruce D. Epperson's *More Important Than the Music*. Following the dedicated few who sought to keep jazz's legacy organized, Epperson tells a fascinating story of archival pursuit in the face of negligence and deception, a tale that saw curses and threats regularly employed, with fisticuffs and lawsuits only slightly rarer. Epperson examines the documentation of recorded jazz from its casual origins as a novelty in the 1920s and '30s, through the overwhelming deluge of 12-inch vinyl records in the middle of the twentieth century, to the use of computers by today's discographers. Though he focuses much of his attention on comprehensive discographies, he also examines the development of a variety of related listings, such as buyer's guides and library catalogs, and he closes with a look toward discography's future. From the little black book to the full-featured online database, *More Important Than the Music* offers a history not just of jazz discography but of the profoundly human desire to preserve history itself.

Extreme Collecting Graeme Were, J. C. H. King, 2012-03-30 By exploring the processes of collecting, which challenge the bounds of normally acceptable practice, this book debates the practice of collecting 'difficult' objects, from a historical and contemporary perspective; and discusses the acquisition of objects related to war and genocide, and those purchased from the internet, as well as considering human remains, mass produced objects and illicitly traded antiquities. The aim is to apply a critical approach to the rigidity of museums in maintaining essentially nineteenth-century ideas of collecting; and to move towards identifying priorities for collection policies in museums, which are inclusive of acquiring 'difficult' objects. Much of the book engages with the question of the limits to the practice of collecting as a means to think through the implementation of new strategies.

Widescreen Worldwide John Belton, Sheldon Hall, Stephen Neale, 2010 Examining widescreen cinema as a worldwide aesthetic and industrial phenomenon, the essays in this volume situate the individual expressions of this new technology within the larger cultural and industrial practices that inform them. What Hollywood sought to market globally as CinemaScope, SuperScope, Techniscope, Technirama, and Panavision took indigenous form in a host of compatible anamorphic formats developed around the world. The book documents how the aesthetics of the first wave of American widescreen films underwent revision in Europe and Asia as filmmakers brought their own idiolect to the language of widescreen mise-en-scène, editing, and sound practices. The work of Otto Preminger, Anthony Mann, Samuel Fuller, Sam Peckinpah, Seijun Suzuki, Kihachi Okamoto, and Tai Kato, among others, is addressed.
