Hindsight, Insight, Foresight: Thinking About Security in the Indo-Pacific Alexander L. Vuving,2020-09-30 Hindsight, Insight, Foresight is a tour d’horizon of security issues in the Indo-Pacific. Written by 20 current and former members of the faculty at the Daniel K. Inouye Asia-Pacific Center for Security Studies, its 21 chapters provide hindsight, insight, and foresight on numerous aspects of security in the region. This book will help readers to understand the big picture, grasp the changing faces, and comprehend the local dynamics of regional security.

The Science of Solar System Ices Murthy S. Gudipati,Julie Castillo-Rogez,2012-07-28 The role of laboratory research and simulations in advancing our understanding of solar system ices (including satellites, KBOs, comets, and giant planets) is becoming increasingly important. Understanding ice surface radiation processing, particle and radiation penetration depths, surface and subsurface chemistry, morphology, phases, density, conductivity, etc., are only a few examples of the inventory of issues that are being addressed by Earth-based laboratory research. As a response to the growing need for cross-disciplinary dialog and communication in the Planetary Ices science community, this book aims to achieve direct dialog and foster focused collaborations among the observational, modeling, and laboratory research communities.

Game of Life Cellular Automata Andrew Adamatzky,2010-06-14 In the late 1960s British mathematician John Conway invented a virtual mathematical machine that operates on a two-dimensional array of square cell. Each cell takes two states, live and dead. The cells’ states are updated simultaneously and in discrete time. A dead cell comes to life if it has exactly three live neighbours. A live cell remains alive if two or three of its neighbours are alive, otherwise the cell dies. Conway’s Game of Life became the most programmed solitary game and the most known cellular automaton. The book brings together results of forty years of study into computational, mathematical, physical and engineering aspects of The Game of Life cellular automata. Selected topics include phenomenology and statistical behaviour; space-time dynamics on Penrose tiling and hyperbolic spaces; generation of music; algebraic properties; modelling of financial markets; semi-quantum extensions; predicting emergence; dual-graph based analysis; fuzzy, limit behaviour and threshold scaling; evolving cell-state transition rules; localization dynamics in quasi-chemical analogues of GoL; self-organisation towards criticality; asynochrous implementations. The volume is unique because it gives a comprehensive presentation of the theoretical and experimental foundations, cutting-edge computation techniques and mathematical analysis of the fabulously complex, self-organized and emergent phenomena defined by incredibly simple rules.

Health Financing in Indonesia ,2009-01-01 In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (Ue and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

China's Global Influence Scott D. McDonald,Michael C. Burgyone,2019-08 From 30 January to 1 February 2019 the Daniel K. Inouye Asia-Pacific Center forSecurity Studies hosted a Department of Defense Regional Center collaborationtitled China's Global Reach: A Security Assessment. The goal of the workshopwas to leverage expertise and unique perspectives from all five Regional Centersto examine the actions and intentions of the People's Republic of China. To understand how these global activities impact the United States, this analysis was conducted within the context of the PRC's perspective of its own foreign policy, as well as under a state of strategic competition, as referenced in the 2017 National Security Strategy and 2018 National Defense Strategy. The workshopleveraged the insights gained from a broad range of experts to formulate policyrecommendations for defending state interests in the face of growing PRC assertiveness. Thescholarship, insights, and recommendations of the participants are collected in this volumefor the benefit of policy-makers, practitioners,and scholars.

Floral Diplomacy at the White House Laura Dowling,2017-02 Stunning floral creations from the Chief Floral Designer at The White House Laura Dowling served as Chief Floral Designer at the White House form 2009 until 2015. In this unique position, she managed décor and flowers for thousands of White House events while using flowers as a strategic tool for communicating diplomatic, symbolic and policy messages. She is renowned for creating a new romantic style of flower arranging featuring free-flowing lines of vines and flowers emanating from a classical bouquet. This style is most evocative of nature and the garden, and balances a strong artistic vision with the wildness of nature. Under her leadership, Laura implemented floral artistry at the White House, designing bouquets of seasonal garden flowers in a style that is both modern and refined, yet casually elegant. She often presents her innovative arrangements in hand-made organic containers composed of leaves, branches and berries that are woven into patterns and motifs, creating integrated, cohesive displays that conjure both nature and the garden. Here, she describes her inspiration, provides tips and techniques on flower arranging and entertaining, and offers readers a fascinating behind-the-scenes glimpse into

both official and private White House life.

The Annenbergs John E. Cooney,1982 This is the colorful and dramatic biography of two of America's most controversial entrepreneurs: Moses Louis Annenberg, 'the racing wire king, ' who built his fortune in racketeering, invested it in publishing, and lost much of it in the biggest tax evasion case in United States history; and his son, Walter, launcher of TV Guide and Seventeen magazines and former ambassador to Great Britain.-Jacket.

Walt Whitman Justin Kaplan,2003-07-08 Whitman's genius, passions, poetry, and androgynous sensibility entwined to create an exuberant life amid the turbulent American mid-nineteenth century. In vivid detail, Kaplan examines the mysterious selves of the enigmatic man who celebrated the freedom and dignity of the individual and sang the praises of democracy and the brotherhood of man.

Trafficking in Broken Hearts Edwin Sanchez,2014-12-15 When Papo, a tough-talking Puerto Rican hustler from the Bronx, meets Brian, a frightened young lawyer from the Midwest, Papo begins to glimpse the possibility of a romantic escape from his life on the streets. At the same time, Bobby, a 17-year-old runaway who has been repeatedly raped by his older brother, offers to take care of Papo and moves in with him in his fleabag hotel room. It is then when Papo suddenly finds his defenses melting and his heart torn in two directions. TRAFFICKING IN BROKEN HEARTS is a gritty, urban love story. Playwright Edwin Sanchez makes a promising New York debut with TRAFFICKING IN BROKEN HEARTS, a grim, streetwise and bracingly compassionate work ... he convinces with the honesty of his writing and a canny, thoughtful grasp of his trio of characters. The playwright does an especially effective job in penning the gray shades of his characters ... -Greg Evans, Variety

Something Inside So Strong Labi Siffre,Jonathan Wikeley,2011-05-01

Mathematics for Computer Students Rex Wilton,1992 Mathematics for Computer Students is a new text which takes a fresh approach to mathematics as it relates to good computing practice. The book is a new addition to the popular Threshold series which have been widely adopted on business and computing courses throughout colleges of further education worldwide. The book approaches the subject by encouraging students to understand the relationship between mathematics and computing so that they can select appropriate mathematical processes rather than seeing the former only as an assortment of disconnected practices. To help the student to see familiar ground between the two subjects the author considers the practical applications of mathematics for computing, before approaching the formal mathematics. He considers, step-by-step, the following: . * The skills of creating mathematical models - numerical and logical. * The existing processes for manipulating those models. * The special demands imposed by the computer. And throughout he considers how accuracy can be safeguarded and the control of the processing. The text contains exercises both within the text and at the end of each chapter
