Leveraging Mobile Media Valerie Feldmann, 2006-03-30 Mobile communications and next generation wireless networks emerge as new distribution channels for the media. This development offers exciting new opportunities for media companies: the mobile communication system creates new usage contexts for media content and services; the social use of mobile communications suggests that identity representation in social networks, impulsive access to trusted media brands, and micro-coordination emerge as new sources of value creation in the media industries. In the light of this background, this book takes two different viewpoints on the development of mobile media: from a competitive strategy point of view it analyzes the extension of cross-media strategies and the emergence of cross-network strategies; from a public policy point of view it develops demands and requirements for an innovation policy that fosters innovation in mobile media markets.

Sustainable Energy - without the hot air David JC MacKay, 2016-05-14 The enlightening, best-selling book on understanding sustainable energy and how we can make energy plans that add up. If you've ever wondered how much energy we use, and where it comes from – and where it could come from – but are fed up with all the hot air and 'greenwash', this is the book for you. Renewable resources are 'huge', but our energy consumption is also 'huge'. To compare 'huge' things with each other, we need numbers, not adjectives. *Sustainable Energy – without the hot air* addresses the energy crisis objectively, cutting through all the contradictory statements from the media, government, and lobbies of all sides. It gives you the numbers and the facts you need, in bite-sized chunks, so you can understand the issues yourself and organises a plan for change on both a personal level and an international scale – for Europe, the United States, and the world. In case study format, this informative book also answers questions surrounding nuclear energy, the potential of sustainable fossil fuels, and the possibilities of sharing renewable power with foreign countries. Written by David MacKay, who was an esteemed Professor of Engineering at the University of Cambridge and Chief Scientific Advisor to the UK

Department of Climate Change, this is an uplifting, jargon-free and informative read for all. In it, David debunks misinformation and clearly explains the calculations of expenditure per person to encourage people to make individual changes that will benefit the world at large. If you've thrown your hands up in despair thinking no solution is possible, then read this book - it's an honest, realistic, and humorous discussion of all our energy options.

From Curses to Blessings Ken Harrington, Jeanne Harrington, 2011-01-01 From Curses to Blessings takes readers through a thorough teaching on the various causes that allow curses to enter our lives, including generational patterns and personal sin. The authors give substantial scriptural support to their message, along with lists of demonic spirits associated with various sins and prayers for freedom. Since the material covers the full range from murder and prostituting oneself to the way one speaks about one's neighbor or thinks about one's spouse, all believers will be able to find something to apply to their lives to gain greater freedom. The final chapters include faith-building material on how to release God's blessings into our lives.

Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

Rebuilding the State Institutions Juan Antonio Le Clercq, Jose Pablo Abreu Sacramento, 2019-11-29 Contemporary Mexico faces a complex crisis of violence and insecurity with high levels of impunity and the lack of an effective rule of law. These weaknesses in the rule of law are multidimensional and involve elements of institutional design, the specific content of the laws, particularities of political competition and a culture of legality in a country with severe social inequalities. This book discusses necessary institutional and legal reforms to develop the rule of law in a context of democratic, social and economic transformations. The chapters are organized to address: 1) The concept of the 'rule of law' and its measurement; 2) The fragility of the 'rule of law' in Mexico; 3) Structural reforms and implementation challenges; 4) Social exclusion and the culture of legality. The book addresses decision-makers, civil servants, consultants, scholars, lecturers, and students focusing on public policy, rule of law, sociology of law, legislative studies and practice, impunity, and areas of political philosophy. • The book presents an interdisciplinary and integrated approach for understanding the rule of law in Mexico,

taking into account national particularities, the regional context and global comparisons. • Chapters discuss recent institutional reforms in Mexico from a critical point of view and explore possible next steps to achieve effective implementation. • This book addresses the links between a weak rule of law and social phenomena like insecurity, violence, corruption and democratic deficits.

Hegemony and Resistance Around the Iranian Nuclear Programme Moritz Pieper,2017-04-21 This book is the first to provide comprehensive and comparative analyses to conceptualise the interaction between 'hegemonic structures' and those actors resisting them using the Iranian nuclear case as an illustration. It analyses the foreign policies of China, Russia and Turkey towards the Iranian nuclear programme and thereby answers the question to what extent these policies are indicative of a security culture that resists hegemony. Based on 70 elite interviews with experts and decision-makers closely involved with the Iranian nuclear file, it analyses resistance to hegemony across its ideational, material and institutional framework conditions. The cases examined show how 'compliance' on the part of China, Russia and Turkey with parts of US approaches to the Iranian nuclear conflict has been selective, and how US policy preferences in the Iran dossier have been resisted on other occasions. As such, the Iran nuclear case serves as an illustration to shed light on the contemporaneous interaction of the forces of consent and coercion in international politics.
