Australia's Poisonous Plants, Fungi and Cyanobacteria Ross

McKenzie, 2020-05-01 *Australia's Poisonous Plants, Fungi and Cyanobacteria* is the first full-colour, comprehensive guide to the major natural threats to health in Australia affecting domestic and native animals and humans. The overriding aim of the book is to prevent poisoning, as there are few effective treatments available, particularly in domestic animals. The species have been chosen because of their capacity to threaten life or damage important organs, their relative abundance or wide distribution in native and naturalised Australian flora, or because of their extensive cultivation as crops, pastures or in gardens. These include flowering plants, ferns and cone-bearing plants, macrofungi, ergot fungi and cyanobacteria. The plant species are grouped by life form such as herbs, grasses and sedges, shrubs, trees, and for flowering plants by flower type and colour for ease of identification. Species described have colour photographs, distribution maps and notes on confusing species, habitats, toxins, animals affected, conditions of poisoning, clinical signs and symptoms, post mortem changes, therapy, prevention and control. Symbols are used for quick reference to poisoning duration and available ways of managing poisoning. As further aids to understanding, poisoning hot-spots are highlighted and the book lists plants under the headings of animals affected and organs affected. A Digest gives brief details for all poisonous species in Australia. This book is written in a straightforward style making it accessible to a wide audience including farmers, veterinarians, agricultural advisors, gardeners, horticulturists, botanists and park rangers, medical practitioners and paramedics, teachers, parents and pet owners. First published in 2012 as a hardback and made available in eBook format in 2020.

Countering Terrorism Michael Chandler, Rohan Gunaratna, 2007 Chandler and Gunaratna employ their unparalleled expertise to probe the West's responses to the catastrophic attacks so indelibly seared into the history of the early twenty-first century, from 9/11 to the Madrid bombings to deadly strikes in Afghanistan, Iraq, Pakistan, Palestine, and elsewhere.

Forgotten Families Jody Heymann, 2006-02-16 In the last half-century, radical changes have rippled through the workplace and the home from Boston to Bombay. In the face of rapid globalization, these changes affect us all, and we can no longer confine ourselves to addressing working and social conditions within our own borders without simultaneously addressing them on a global scale. Based on over a thousand in-depth interviews and survey data from more than 55,000 families spanning five continents, *Forgotten Families* is the first truly global account of how the changing conditions of work threaten children, women and men, and the infirm. It addresses problems faced by working families in industrialized and developing countries alike, touching on issues of child health and development, barriers to parents getting and keeping jobs, problems families confront daily and in times of crisis, and the roles of growing inequalities. Rich in individual stories and deeply human, Heymann's book proposes innovative and imaginative ideas for solving the problems of the truly belabored together as a global community.

AIDS, South Africa, and the Politics of Knowledge Professor Jeremy R Youde, 2013-03-28 Through an in-depth examination of the interactions between the South African government and the international AIDS control regime, Jeremy Youde examines not only the emergence of an epistemic community but also the development of a counter-epistemic community offering fundamentally different understandings of AIDS and radically different policy prescriptions. In addition, individuals have become influential in the crafting of the South African government's AIDS policies, despite universal condemnation from the international scientific community. This study highlights the relevance and importance of Africa to international affairs. The actions of African states call into question many of our basic assumptions and challenge us to refine our analytical framework. It is ideally suited to scholars interested in African studies, international organizations, global governance and infectious diseases.

Interviewing and Investigating Stephen P. Parsons, 2000 In his exciting new book, author Stephen Parsons drives home the point that interviewing and investigating skills are to be mastered--not memorized. He also instills in students the fact that these skills are essential For The well-trained paralegal--every bit as critical as legal research skills. As such, his approach is two-fold: First, join textual discussion of the subject matter with hands-on learning activities. And, second, provide varied and realistic scenarios in which the student applies the principles studied. The first part of the book's two-part organization, Foundations for Interviewing and Investigation introduces the student To The legal contexts in which interviewing and investigating skills are utilized. The second part, Formulating and Executing a Plan of Investigation, walks the student, step by step, through an investigation. Parsons puts students on a path to being able to effectively assist an attorney in case or project investigation, by helping them: Understand The critical connection between law and fact engage in effective factual analysis develop communication skills commit To The highest standards of legal ethics get grounded in the adversarial system, The formal discovery rules in civil and criminal cases, The distinctions between formal and informal investigation, And The basic rules of evidence. Special features, at a glance: Numerous brief examples-sprinkled throughout the text--are drawn from a variety of both civil and criminal, litigation and non-litigation scenarios. Frequent illustrations accompany the examples. Lengthier hypotheticals, positioned at key points throughout each chapter, presents a specific factual and legal context in which students can see the application of the concepts. Discussion questions enable students to engage in immediate analysis as they reinforce the lessons taught by the hypotheticals. Learn by Doing exercises provide hands-on learning activities related To The subject covered in the chapter. Four case studies (a murder case, a personal injury case, a domestic relations case, and a real estate development project) are designed to be used with the Learn by Doing exercises in each chapter and provide realistic scenarios for applying the concepts. Excellent appendices provide resources for students, including extensive information on on-line resources for investigators.
