Eastern Indian Ocean Lipi Ghosh,2011-05-25 The Indian Ocean has attracted scholarly attention through ages. As we talk of inter-Asian linkages and inter-regional arena studies, the connections through the Bay of Bengal (Eastern Indian Ocean) is a fascinating subject. This book is an attempt to understand how these issues of commercial and cultural linkages manifest along the Eastern Indian Ocean from the past to the present. It aims to look at the various dimensions of the contemporary Eastern Indian Ocean and seeks to determine whether the past has any role to play in shaping contemporary contexts. The discussions in the book will show how the revival of an ancient linkage can stimulate contemporary international trade and can promote regional cooperation. The findings of the book will definitely lay the foundations for future analyses of the emerging India-South East Asia relationship. It is expected to be a pioneering attempt for a comprehensive and multidisciplinary examination of the region under review.

Growing Business in Delaware William W. Boyer,Edward C. Ratledge,2015-12-09 Contemporary public policy analysis in response to the Great Recession, suitable for the study of economic development and public policy courses in higher education, focuses preponderantly on the national government. This book provides a unique case study of how one small state has employed strategies to grow business and jobs with mixed results, relevant for the study of such policies in other states.

The Skeptical Environmentalist Bjørn Lomborg,2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the best available statistical information from internationally recognised research institutes, Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world. His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjørn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The Skeptical Environmentalist offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

Beyond Borders Brian Doherty,Timothy Doyle,2013-10-18 Globalisation is about transnational politics. While nation-state governments increasingly struggle with this new politics, which moves beneath, between and beyond national borders, others entities like transnational corporations have flourished. But it is not just business which increasingly bypasses these traditional boundaries. Environmental groups are also moving through this transnational space, and their politics are defined by such qualities as fluidity, ambiguity and rapid changes in identity, mission and structure. In this book, the politics of environmental movements are presented as particularly salient examples of these new phenomena. Drawing on fieldwork from Europe, Asia, America, Africa and the Middle East, the contributors address a range of trans-national processes: efforts to construct common agendas transnationally; the diffusion of new repertoires of environmental protest; the role of environmental groups in the construction of new modes of environmental governance; how neo-liberalism affects local environmental activism; evidence of transnational influences and pressures on environmental politics in repressive regimes; and the dilemmas of defining questions of environmental justice and post-colonial environmental politics without suppressing the differences between environmentalism in different countries.

Tactical Rape in War and Conflict Brenda Fitzpatrick,2016-05-25 The use of rape as a deliberate tactic of war is a serious human rights issue that needs to be addressed as a threat to human and international security. This ground-breaking book is the first to analyse its use as an act of war against civilians and international progress away from tacit acceptance toward active rejection of this violation of international law. Exploring international responses to sexual violence in war, it introduces the main historical facts, theoretical terms and legal developments behind UNSC resolutions on women, peace and security and the emerging practice of international law in this area. It identifies best practice in moving beyond accepting rape in war as inevitable to the recognition of tactical rape as a security concern for women, men, states and the international community. Powerful testimonies of victims are included to bring the issue alive, making this a much-needed volume for academic and professional communities.

Challenged Justice: In Pursuit of Judicial Independence Shimon Shetreet,Hiram Chodosh,Helland Eric,2021-08-24 The book offers articles by senior jurists on important aspects of judicial independence and judicial process in many jurisdictions, including indicators of justice. It comes at the time of serious challenges to the judiciary, the rule of law and democracy.

Papers Presented at the FAO/NACA Consultation on Aquaculture for Sustainable Rural Development Food and Agriculture Organization of the United Nations,2005 This document contains the papers presented at the Consultation on Aquaculture for Sustainable Rural Development which was organized jointly by FAO and NACA and held in Chiang Rai, Thailand, from March 29-31,1999 in order to develop the detailed structure of a regional program on aquaculture for sustainable rural development and to propose a strategy for its implementation. The consultation took an overview of the relevant information emerging from the presentations of country reports; lessons learned by specific projects; experiences of regional and international organizations and donor agencies; and findings of expert

reviews. More sharply focused examination of critical issues and discussions on specific components of the draft program concept were followed through parallel working group discussions. The outputs of the working groups were further discussed during the concluding plenary. Finally, a detailed Program Framework on Aquaculture for Sustainable Rural Livelihood Development was conceived through consensus to serve as guiding principles for the formation of the program.--Publisher's description.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Defending the Environment Linda Malone,Scott Pasternack,2012-08-09 Defending the Environment provides the means for nongovernmental organizations, community groups, and individuals to bring environmental and public health problems to the attention of international courts, tribunals, and commissions, or to their domestic counterparts. It suggests specific strategies and provides detailed information for taking action. This revised and updated edition also contains new case studies of the application of those strategies that has occurred in recyears. Each chapter provides a description of the institutional mechanisms that can potentially receive, review, and remedy the alleged violation, along with a set of guidelines that explain how the reader can employ a particular strategy, and an example that indicates the effectiveness of a given strategy. In addition, the book offers an appendix that lists individuals and organizations who can assist with the various strategies described. Defending the Environment represents the first concise, comprehensive guide to international environmental law and institutions that offers readers hands-on strategies for addressing environmental and public health problems.

Framework for Equitable Allocation of COVID-19 Vaccine National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Board on Health Sciences Policy,Committee on Equitable Allocation of Vaccine for the Novel Coronavirus,2020-11-30 In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. Framework for Equitable Allocation of COVID-19 Vaccine offers an

overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

Children's Health and the Peril of Climate Change Frederica Perera, 2022 Today, approximately two billion children breathe toxic air at levels exceeding standards set by the World Health Organization, causing immediate and long-term physical and mental health effects. Nearly every child around the world is at risk from at least one climate-related shock such as severe heat, flooding, drought, air pollution, forest fires, water scarcity, and displacement. Air pollution and climate change, largely driven by emissions from fossil fuel, are widening inequality in children's health. From urban centers in the United States to remote villages in the furthest corners of Asia, we are seeing the effects of our inaction on climate change affecting the next generation—even those still in utero. The global transition away from fossil fuel to a low carbon economy creates a major opportunity for the health and future of our children, but only if we all take action. *Children's Health and the Peril of Climate Change* brings to light the mental and physical harms to children's health inflicted by climate change and its root cause—our addiction to fossil fuel. Drawing on the author's extensive expertise in children's environmental health, this essential and thought-provoking text exposes the unique vulnerability of the developing child and the multiple and synergistic effects of climate change and air pollution on child health, especially for disadvantaged children. However, it also shows how all children, regardless of their generational wealth or birth country, are imperiled by climate change. While this book provides specific evidence for the escalating dangers of climate change, it also presents a roadmap to a brighter future with case studies of climate change and air pollution policies that have benefitted children's health and the economy. Through facts and compelling storytelling, Frederica Perera shares the growing power of advocacy by youth, environmental justice, and Indigenous groups. She describes the many solutions now available, highlighting the need for integrated climate and social policies to accelerate the transition into a zero-carbon future. Leveraging the universally shared value of protecting children, *Children's Health and the Peril of Climate Change* is a call to action to replace denial and despair around climate change with purpose and commitment for a healthier, more sustainable future.

Assessment in Support of Instruction and Learning National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematical Sciences Education Board, Committee on Science Education K-12, Board on Testing and Assessment, Committee on Assessment in Support of Instruction and Learning, 2003-09-17 *Assessment in Support of Instruction and Learning* is the summary of a National Research Council workshop convened to examine the gap between external and classroom assessment. This report discusses issues associated with designing an assessment system that meets the demands of public accountability and, at the same time, improves the quality of the education that students receive day by day. This report focuses on assessment that addresses both accountability and learning.

Arab American Children with Disabilities Jamal M. Al Khatib, 2016-07-22 Despite a proliferation of special education literature on racial minorities over the past three decades, research and writing on Arab American children with disabilities remain remarkably sparse. This book fills that gap by promoting culturally appropriate services for Arab American children with disabilities. Special education and service providers in the U.S.—including school psychologists, rehabilitation counselors, and social workers—are increasingly likely to work with Arab Americans with disabilities. By focusing on this marginalized minority population, Al Khatib provides much-needed context and direction for service providers and researchers working with the Arab American community. Offering an overview of special

education and the rights guaranteed under the Individuals with Disabilities Education Act (IDEA), this book also helps Arab American families understand the special education process and advocate for their children.
